WILSON & JOHNS' SEEDS

**TAKE THE LEAD FOR GERMINATION, PURITY
AND QUALITY.**

Again it is our pleasure to submit to you a copy of the latest edition of our Seed and Plant Manual, which we trust is worthy of your favourable consideration. We hope, also, to be favoured as hitherto with your orders, and that you will bring our firm under the notice of any of your friends who are interested in gardening—a kindness we always appreciate.

You will observe that we have listed, besides the Standard varieties, practically the whole of the Novelties in Vegetable Seeds, Flower Seeds, and Plants of all descriptions; but should we have omitted anything you require, it will be our pleasure to procure it for you if possible.

When sending your orders, please note the following:—

New Customers are requested to forward CASH with their orders, or refer to any well-known Perth firm as a guarantee of good faith.

All Orders should be written separately from general letters, or letters of enquiry, and your **ADDRESS** should be written in full, together with the nearest Station or Shipping Port to which you wish your goods consigned.

Always Remit by crossed cheque, bank draft, postal note, or post office order. Exchange must be added to country cheques. For small amounts postage stamps will be accepted.

NOTHING IS GUARANTEED.

As we take every possible precaution to protect our customers by sending out only the best of Seed, procured regardless of expense from the most reliable sources, it must be clearly understood that we give no warranty as to description, quality or productiveness, and accept no responsibility regarding the yield of the crop, or the failure of the crop, there being too many causes, known and unknown, which prevent the most fertile of seed from germinating or maturing after germination. It is only under these conditions that all seeds and plants are sold.

If the purchaser does not agree to accept delivery of the seeds, plants or trees on these terms, they must be returned immediately.

This Catalogue supersedes all lists previously issued.

All Correspondence should be Addressed—

WILSON & JOHNS

70 BARRACK STREET, PERTH.

Extract From Review.—"The experienced will profit by reading this much-needed book, and the inexperienced need no longer fear failure."

The "Western Mail" recommends The "West Australian Gardening Guide" to its readers as a source of information and pleasure.

The "Producers' Review" says.—"This book richly deserves a place among the books of any professional or amateur gardener throughout W.A."

Saynor's Celebrated Pruning and other Garden Tools.

TABLE SHOWING THE NUMBER OF TREES OR PLANTS THAT CAN BE PLANTED IN AN ACRE AT THE DISTANCES APART GIVEN BELOW.

Feet.	Number.	Feet.	Number.	Feet.	Number.
10 x 10	435	25 x 25	69	4 x 4	2722
9 x 9	537	10 x 30	48	4 x 3	3630
8 x 8	680	20 x 20	108	4 x 2	5445
7 x 7	888	19 x 19	120	4 x 1	10890
6½ x 6½	1031	18 x 18	134	3 x 3	4840
6 x 6	1210	17 x 17	150	3 x 2	7260
5½ x 6½	1417	16 x 16	170	3 x 1	14520
5 x 5	1742	15 x 15	193	2 x 2	10890
5 x 4	2178	14 x 14	222	2 x 1	21780
5 x 3	2904	13 x 13	257	1 x 1	43560
5 x 2	4356	12 x 12	302		
5 x 1	8712	11 x 11	360		

When the distances between the plants differ from that between the rows, divide 43,560, the number of sq. ft. in an acre, by number of sq. ft. to each plant, and the quotient will be number of plants to acre.

The sq. ft. to each tree is found by multiplying number of feet between rows by number of feet, or fraction of a foot, between plants.

The side of a square containing an acre is, in feet—208.72 feet, or 208 feet 8½ inches; in links—316.23.

ALL PRICES ARE SUBJECT TO MARKET FLUCTUATIONS.

For the convenience of residents in the country we have affixed the prices to many of the seeds, etc. These are generally for small quantities, and should you require a larger quantity we shall be pleased to send you special quotations on application stating quantities required.

All previous lists are hereby cancelled.

Our seeds in packets are obtainable from the principal Storekeepers in the State. The packets are stamped with the year of sending out.

Storekeepers and the trade supplied at Wholesale Rates.

We make a Specialty of growing Plants suitable for Bazaars, Fetes, &c., at specially reduced rates..

All Flower Seeds post free to all parts of the world.

Strong Hardy Roses for the Garden is a Specialty.

GENERAL LIST OF

Vegetable Seeds

FOR SEASON 1925-26.

In presenting this Catalogue for 1925-26, we beg to inform our Customers that we have only listed the varieties of Seeds, Plants, etc., that we know will thrive in this State, but should any variety, other than those which appear in this Catalogue, be asked for, we shall be only too pleased to procure same. The descriptions given with the various kinds of Vegetables in the List below is, to the best of our belief, correct. Change of soil, modification of food supplies, and other changed conditions, so influence the growth of plants, that it is impossible to give a guarantee of correctness to name, quality, or productiveness of Seeds, but as we purchase our Seeds from growers of great repute in England, the Continent and America, we have no hesitation in saying that with proper care and attention, they cannot fail to give good results.

ASPARAGUS

(6d. per pkt., post free.)

Sow in rich, light soil, in rows 18in. apart. When large enough to handle, thin out to 9in. Care should be taken to keep weeds down for first year. Apply plenty of water and liquid manure during dry weather.

Conovers Colossal.—A well known variety, large size, tender, good quality.

Asparagus Roots.—Obtainable from May to September. Two year old plants, 2/6 doz., 12/6 per 100.

ARTICHOKE

(6d. per pkt., post free.)

Sow in September or October, in a row where they are to remain; thin out to 1ft. or 18in. and transplant the following year. Allow each plant 4ft. on all sides.

Jerusalem.—Not procurable from seed. Plant the tubers in Spring, in rows 18in. apart and 12in. in the row. Price fluctuates, 6d.; cheaper in quantity.

BEET

(6d. per pkt., post free.)

Requires a deep open soil. The ground should be heavily manured and well dug, the manure being thoroughly mixed with the soil. Sow seeds in drills 18in. apart and 1in. deep; thin out when large enough to handle to 6in. apart. 2/- 1lb.

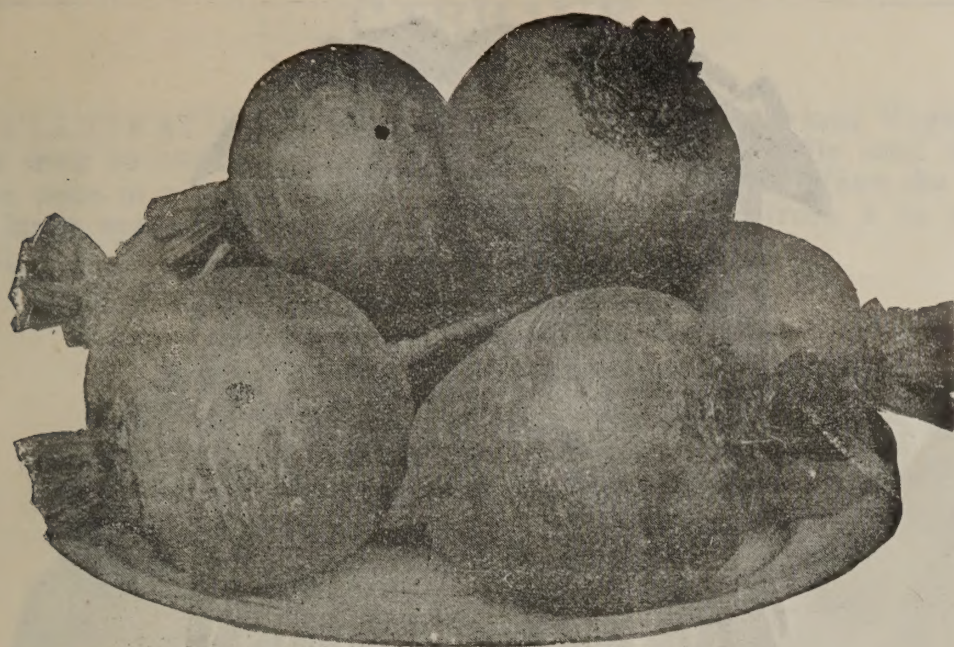

Erfurt Long Black Red.—Long smooth Red, almost black.

Eclipse.—Turnip-shaped, fine dark blood colour, very sweet.

Egyptian (Turnip Shaped).—Very distinct, flesh deep red, valuable for summer use.

Silver or Swiss Chard.—The midribs are used served up as asparagus, they are silvery-white and very large; the leaves make a nice dish served up as spinach. This variety is reproductive and will stand cutting, but the roots are not edible. Good for poultry.

Soudan Grass the "Camel" of the Grasses.

Crimson Globe Beet.

Sutton's Crimson Globe.—The finest of all turnip-shaped varieties.

BROAD BEANS

(6d. per pkt.)

Sow from March onward, in drills 3ft. apart and 1ft. in the rows, covering the seeds to a depth of about 2in. When the crop commences to flower, the top of each stem should be pinched off to increase the growth of pods.

Leviathan.—A very long-podded variety, the best in cultivation, very prolific. 1s. 1b. Postage, 9d. 1b. extra.

Broad Windsor.—A very productive variety, with good large pods. 1s. 1b. Postage, 9d. 1b. extra.

BUTTER BEANS

(6d. per pkt.)

The pods of these varieties are stringless and can be cooked whole. The flavour is excellent. Cultivation same as French Beans.

Golden Butter Wax.—Dwarf. An exquisitely flavoured variety, immense cropper.

RUNNER BEANS

(6d. per pkt.)

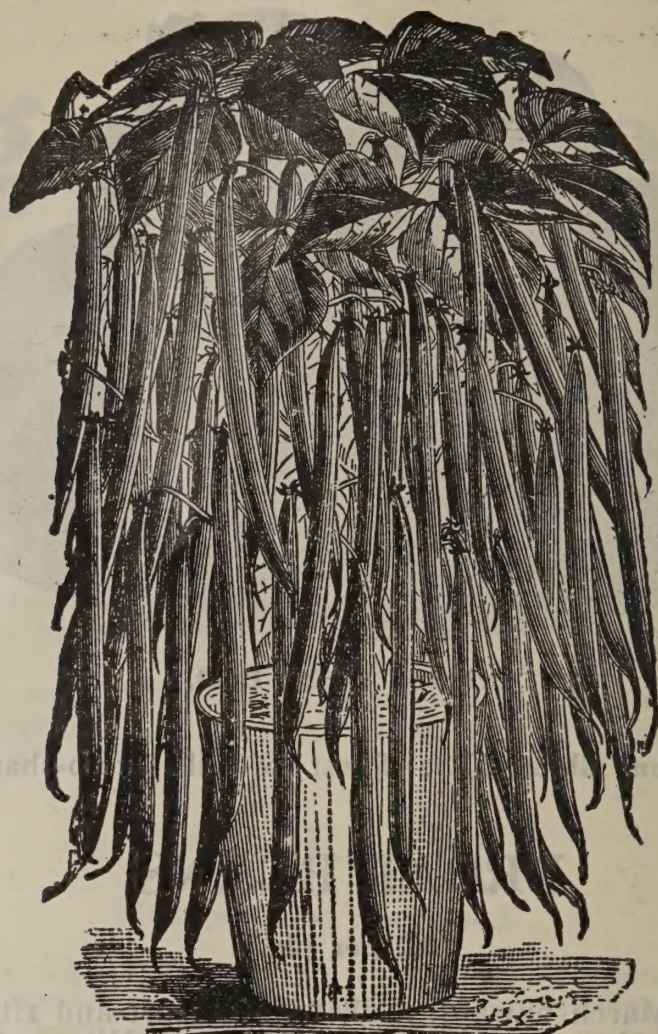

Epicure Runner Bean.—Seed brown, pods are often 15in. long, thick, fleshy, stringless, tender and fine flavour.

Scarlet Runner.—This variety is valuable as an ornamental climber, also very useful as a vegetable.

Kentucky Wonder.—This most popular of the pole varieties should be in every garden where beans are planted. It grows luxuriantly and bears for a long period. Pods are very long, very fleshy, and deeply crested or saddle-backed; green in colour and stringless.

Great Snake or Extra Early Asparagus.—A very productive and vigorous growing variety, producing pods, which sometimes measure 33in. in length.

GLADIOLI AND CARNATIONS—A GREAT SPECIALITY WITH US.

Dwarf French Beans.

FRENCH BEANS

(6d. per packet.)

Sow from September in a warm part of the garden. Late crops should be sown in a damp situation, in drills 2ft. apart and 2in. in depth, leaving 3in. or 4in. between the seeds.

Canadian Wonder.—The most prolific bean in the cultivation. 1/- lb., postage 9d.

BORECOLE or KALE

(6d. per pkt., post free.)

Sow Seed from November to March and again in June, and transplant as soon as large enough to handle, into rows 2ft. apart and 2ft. between. 6d. per pkt.

Dwarf Green Curled.—A useful, hardy variety, best for table use. 9d. oz.

Thousand Headed.—A splendid variety for poultry, stock and pig feeding. 6d. oz.

Jersey or Tree.—Very valuable for stock and poultry.

BRUSSELS SPROUTS

(6d. per pkt., post free.)

Sow seeds in November and January in beds, transplant into rows 2ft. apart and 18in. between plants.

Scrymger's Giant.—A very fine valuable variety, producing very large sprouts.

Flowering Gums are useful as Shade Trees.

CABBAGE

(6d. per pkt., post free.)

CULTIVATION.—This is one of the most important Vegetables, as it may be had in use every day in the year. A little seed may be sown once in every month, except in May and June. When the plants are large enough to handle, transplant into rows from 2 to 2½ feet apart.

Copenhagen Market.

Copenhagen Market.—This superb new Cabbage is undoubtedly without a rival as the finest large round-headed Cabbage in cultivation. 1/6 oz.

Chinese Cabbage.—(Pe-tsai). Grows similar to Silver Beet, cultivation the same as for early Cabbages.

Early Drumhead.—This splendid cabbage, whether grown for medium, early, main crop, or late use, is unsurpassed. 1/6 oz.

Red Dutch.—For pickling, good colour. 1/- oz.

Brunswick, Large White.—Heads very solid, of a large size, compact, and flat, splendid garden variety.

Danish Ballhead.—This excellent variety is very hardy solid, and a splendid keeper. 6d. per pkt., 1/6 oz.

Early York.—Very early sort, suit private gardens.

Henderson's Succession.—A variety largely grown for medium, early and late use, large heads, good shape and colour. 1/6 oz.

Improved Enfield Market.—Valuable winter variety, largely grown by market gardeners.

Improved St. John's Day, Early.—One of the finest summer cabbages, will heart through the hottest months and produce large, solid heads.

Jersey Wakefield.—One of the earliest sorts, grows very uniform, the heads are pyramidal in shape, with a round peak.

Enkhuizen's Glory.—Amongst many sorts of white Cabbages, none of them combines these two desirable qualities of being early and large, so well as this sort. For the market one of the very best sorts. 1/6 oz.

Sugarloaf.—Distinct variety, excellent for private use, early.

CABBAGE Plants, 1/6 per 100. CAULIFLOWER Plants, 1/6 per 100. Supplied March to September.

Use only Wilson & Johns' Reliable Seeds—they give results.

SAVOY CABBAGE

CULTIVATION.—The general cultivation of Savoys is similar to that of the Cabbage. Savoys are generally preferred for Winter use, being then of a better flavour. 6d. pkt., 1/6 oz.

Savoy, Dwarf Green Curled.—A curly, early variety, with compact head.

Savoy Drumhead.—A large variety, compact and of excellent flavour.

CELERY

(6d. per pkt., post free.)

Celery requires a very rich, deep soil, and a moist situation. Sow seeds in beds or in boxes in July, August and September.

Cole's Crystal White.—Large, crisp and fine flavoured; one of the best. 1/6 oz.

White Solid Paschal.—Remarkable for the breadth and thickness of its stalks. It keeps splendidly, therefore is good for export. 1/6 oz.

Soup Celery.—A splendid substitute for stick celery, for flavouring. 6d. oz., 1/- ¼lb., 3/6 lb.

Henderson's White Plume (American grown). A self-protecting variety of delicious flavour, very early and of easy culture. 1/6 oz.

CARROTS

(6d. per pkt., post free.)

A rich, deep soil that has been previously manured is the best to grow Carrots properly. The soil should be made fine, and the seeds sown ½ in. deep and the ground pressed very hard after the seeds are sown, leaving 1 ft. between the rows, thinning out where required.

Early Short Horn.—A well-known variety, largely grown for table use. 1/- oz., 2/- ¼lb.

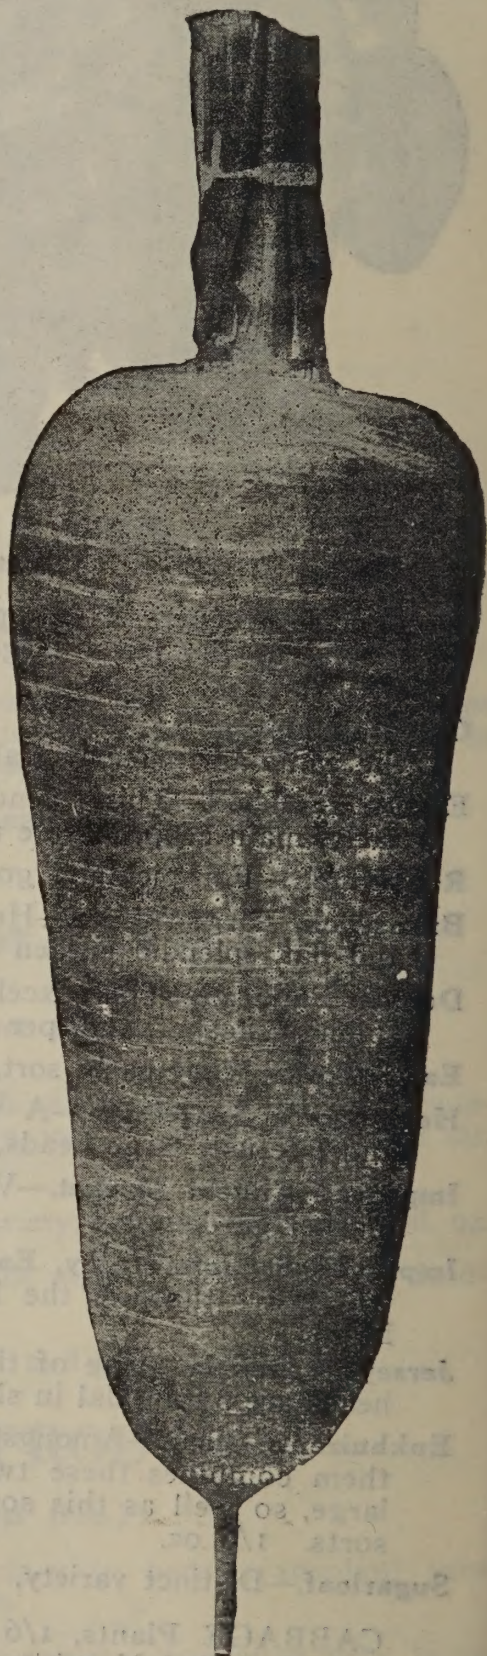

James' Scarlet Intermediate.—The standard variety for main crop. 1/- oz., 2/- ¼lb.

Luc, Half Long.—Stump rooted, a very fine variety, largely grown for market. 1/- oz.

Long Red Altringham.—An extra fine sort. The roots grow to a large size. 1/- oz.

Guerade, or Oxheart.—A French variety of recent introduction, which is a decided acquisition. The shape is nearly oval, and the colour and quality all that can be desired. 6d. pkt., 1/- oz.

Early Market.—Best for market or home use. 1/- oz., 2/- ¼lb.

Carrot, Early Market.

Gladioli and Carnations are a great specialty with us.

CAULIFLOWER

(6d., 1/- and 1/6 per pkt.)

CULTIVATION.—Cauliflowers may be obtained in this climate during at least half the year under ordinary treatment, and in cool situations or where water is plentiful, nearly the whole year round. The soil for them should be equally rich as for Cabbage. For the first or Autumn crop, the seed must be sown from December to February, and for later crops, a little may be sown every month; but heads can rarely be obtained during the hottest months.

Early London.

Dry Weather.—Produces large, solid, pure white heads of excellent quality, sweet. It is specially adapted for growing in dry locations where other varieties fail. Make soil rich and give thorough cultivation. 1/6 pkt.

Erfurt Giant.—An excellent variety, producing fine white heads, which remain a long time in perfection. 4/- oz., 1/- pkt.

Autumn Mammoth.—One of the best Cauliflowers in cultivation; compact, dwarf grower, with very large white heads. 1/- pkt., 4/- oz.

Extra Early Dwarf Snowball.—Is extremely early, very dwarf and compact in its habit of growth, and produces large snow-white heads. 1/6 pkt., 5/- oz.

Early London.—A well-known, quick-growing, hardy variety, with fine white heads. 6d. pkt., 2/- oz.

Eclipse.—A splendid summer variety, with large, pure white heads. Withstands drought well. 6d. pkt., 2/6 oz.

Veitches Autumn Giant.—An exceedingly valuable variety, producing heads large, white, compact, and firm. 6d. pkt., 2/6 oz.

CABBAGE PLANTS, 1/6 per 100. CAULIFLOWER PLANTS, 1/6 per 100. LETTUCE and ONION PLANTS, 1/- per 100. Cheaper in large quantities. Supplied from March to September.

Our Latest Novelties in Carnations are unsurpassable.

SWEET CORN TABLE MAIZE

This is a delicious vegetable served with white sauce or with gravy. The cobs should be taken off as soon as the grains are fully formed, and before they have begun to harden. Sow seed in August, September, October and November, in drills 3ft. apart, and the plants 1ft. apart. 2/6 lb.

Triumph.—A very large extra early variety, producing a fine cob of very rich and sweet flavour.

Golden Bantam.—Early, quick grower, golden colour; very good.

CAPE GOOSEBERRY

(6d. per pkt., post free.)

Sow in beds or boxes in September or October, plant out into rows 3ft. or 4ft. apart. The plants last some years, but require to be pruned annually, the old wood being cut out.

CAPSICUM or PEPPER

(6d. per pkt., post free.)

Sow in beds or boxes in September or October. When large enough to handle, transplant into rows, leaving 2½ feet between each plant.

Elephant Trunk.—Fleshy scarlet, mild flavour.

Ruby King.—Bright red.

Celestial.—Charming variety.

CUCUMBER

(6d. per pkt., post free.)

For the earliest crops, out of doors, seed may be sown in July, in bottom heat, harden off and plant out in early September. For later crops, seed may be sown in the open ground protected by a little hessian from wet weather in October, and sow on till December in open ground.

Apple Shaped.—This variety is much appreciated in this country, having a delicious flavour.

Early White Spine.—A most popular variety, flesh crisp and of a fine flavour. 1/6 oz.

Japanese Climbing.—This variety is very hardy, climbs freely and is of excellent flavour. 1/6 oz.

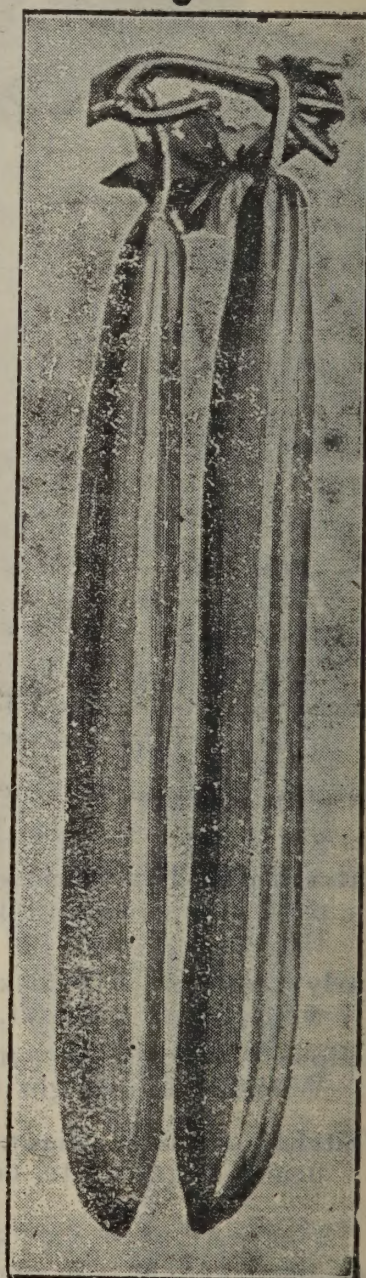

Stockwood Long Ridge.—Early, heavy cropper, fine outdoor variety.

Short Green.—Largely grown for pickling.

Long Green Grecian.—A valuable variety, producing long fruits, of excellent flavour.

Long Green Prickly.—A very hardy variety. 1/6 oz.

Russian Gherkin.—A valuable variety for small pickles.

Cucumber.

Sow Iceland Poppies from January to February.

CRESS

Cress may be grown all the year round. In winter the seeds should be sown in a warm sheltered border protected by a breakwind, in narrow, shallow drills, the seeds being sown thickly, barely covered with soil, and beaten down firmly with the back of the spade. In summer shade is necessary.

Extra Fine Curled.—A very fine variety that will stand cutting 2 or 3 times. 1/6 ¼lb., 6d. pkt.

Water Cress.—Sow in moist, shaded ground or sluggish stream. 6d. pkt.

EGG PLANT

(6d. per pkt., post free.)

This fruit may be treated in exactly the same manner as the Capsicum. The plants may stand eighteen inches to two feet apart, and if a finer sample is required, the fruit must be thinned.

Long White. Long Purple.

ENDIVE

CULTIVATION.—This vegetable is a suitable substitute for Lettuce during Winter and the treatment is similar. To secure delicate white heads, tie them up closely so that they may become blanched. 6d. per pkt.

Green Curled.—Beautifully curled, dark green leaves; an excellent salad.

HERBS

(6d. per pkt., post free.)

Sow seed in boxes or in the open rows about 18in. apart; mulch during the Summer, and keep the surface loose.

Basil, Sweet.—For flavouring soups, stews, sauces, etc.

Borage.—Useful for salads, excellent for bees.

Chervil.—For flavouring soups.

Dill.—For soups.

Horehound.—For medicinal purposes.

Hyssop.—Used for making Hyssop Tea, etc.

Lavender.—Cultivated for its aromatic flowers.

Marjoram.—Used in soups and stuffing.

Rosemary.—An aromatic Herb used for making Hairwash.

Rue.—Used for medicinal purposes and for roup in fowls.

Sage.—Used for stuffing and sauces.

Savoury.—Greatly used for seasoning.

Thyme.—For soups, sauces, and stuffings.

Taragon.—For flavouring.

Plants of Sage, Thyme, Mint and Marjoram can be supplied. Postage extra.

Khol Rabi or Turnip-Rooted Cabbage.

(6d. per pkt., post free.)

This is a delicious vegetable; it is greatly superior as a table vegetable to any kind of turnip, but must be eaten while young.

Large Green. Large Purple.

LEEK

(6d. per pkt., post free.)

Leeks like a deep, pliable and rich soil. When as thick as a pen handle, transplant into deep holes made with a dibble.

London Flag.—A well-known variety, largely grown. 1/6 oz.

Lyon.—Favourite exhibition variety, large, thick, solid, and of fine quality. 1/6 oz.

Saynor's Celebrated Pruning and other Garden Tools.

LETTUCE

(6d. per pkt.)

This salad may be had all the year round by frequent sowings and plantings, choosing a warm situation in the winter, and a moist situation in the summer.

New York.

All the Year Round.—A black seeded variety of great merit.

Australian Yellow.—A Cabbage Lettuce that will withstand our hot dry spring and summer.

Webb's Wonderful.—Large size, tender and crisp, long stander. 6d. pkt., 1/6 oz.

Drumhead.—Forms large heads, which are firm, crisp and tender. 1/6 oz.

First Crop.—A very early variety, growing nice crisp heads.

Iceberg.—A large variety with solid crisp heads, largely grown.

Neapolitan.—Beautiful curled leaves, with firm, crisp, large, solid heads. 1/6 oz.

New York.—Crisp, solid, good quality, large size and long standing. 1/6 oz.

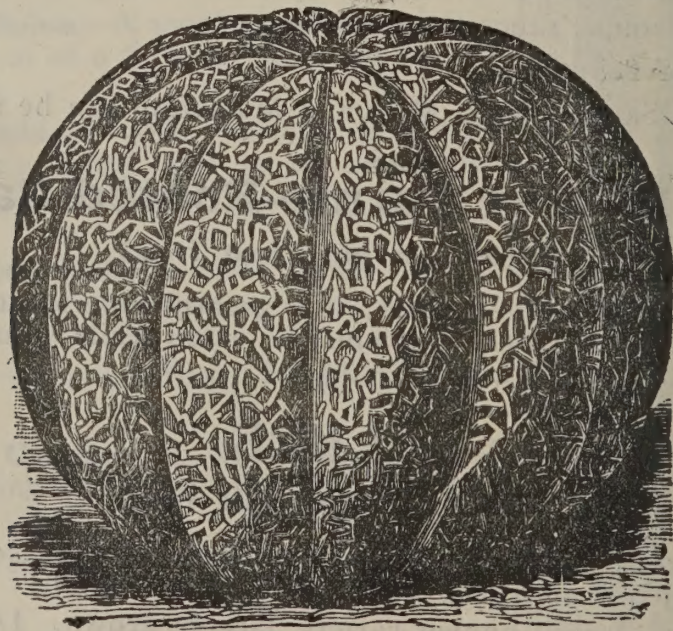

Paris White Cos.—The best of the Cos variety.

LETTUCE PLANTS, 1/- per 100. ONION PLANTS, 1/- per 100. CABBAGE and CAULIFLOWER PLANTS, 1/6 per 100. Cheaper in large quantities. Supplied from March to September.

ROCK MELON

(6d. per pkt., 1/6 oz., post free.)

To give the plants a start the soil should be fairly rich, but not over-manured. The seed should be sown in hills, leaving from 5 to 6 feet between each hill, placing 9 or 10 seeds in each, and when the plants have 2 or 3 rough leaves on, thin out to about 4 plants.

Extra Early Hackensack.

Our Latest Novelties in Carnations are unsurpassable.

Emerald Gem.—A deliciously flavoured variety, flesh salmon colour.

Extra Early Hackensack.—Flesh light green, nutmeg shape.

Large Yellow Cantaloupe.—A salmon flesh variety, very prolific.

Long Island Beauty.—A very handsome melon, very early, excellent quality.

Rockyford.—A splendid early fruiting variety, flesh light green, melting and luscious.

CASSABA or WINTER ROCK MELON

A distinct class of Rock Melon, very popular in America, where they have a great reputation for their long keeping qualities. If stored in a cool shed or cellar, they can be kept throughout the Winter. Cultivation similar to Rock Melons.

Honey Dew.—Emerald green flesh, very thick, melting and fine grained. Most exquisite flavour. 1/- pkt.

Golden Beauty.—An early variety. Fruit is almost round, with yellow wrinkled skin and white, thick flesh. Later fruits if kept in cool store can be used right through the Winter. 1/- per pkt.

MUSHROOM SPAWN

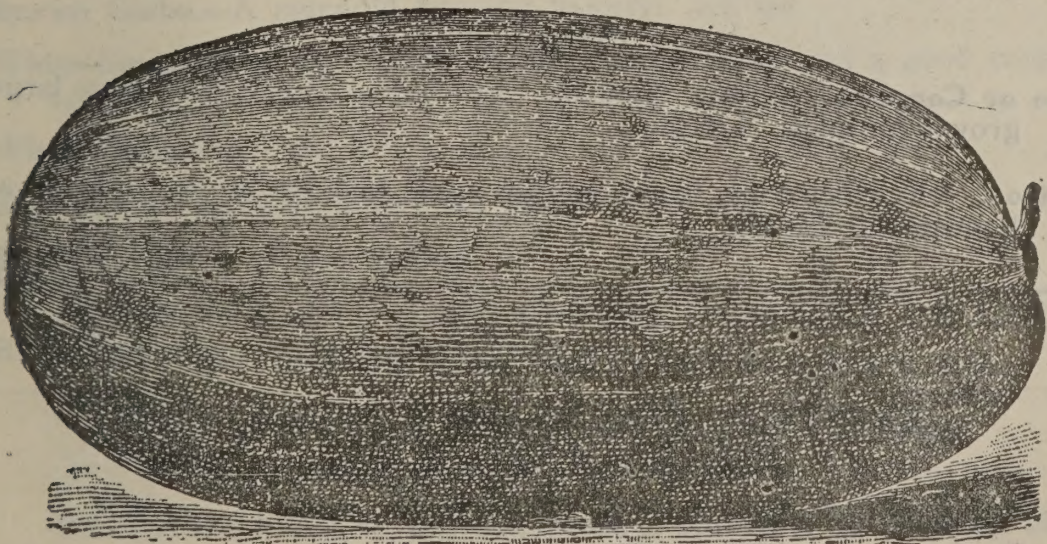

Can be successfully grown in pots, or boxes, or beds, either out of doors or in a shed or cellar, during autumn or winter months. The beds are made of fresh horse dung and fermented until the violent heat is gone. Make a bed 4 feet wide and 1 foot deep, beaten hard with the back of a spade and left till the heat is steady at about 60 to 70 degrees, then pieces of spawn, about the size of a walnut, should be inserted an inch deep and 3 or 4 inches apart all over the bed, which must be covered with 3 inches of soil, such as Mushrooms naturally grow in. Mushrooms may be expected about six weeks from time of spawning.

English Mushroom Spawn.—1/6 per brick. Postage 9d. extra.

WATER MELON

(6d. per pkt., post free.)

The Water Melon requires a richer soil than the Rock Melon, and if grown properly, will give a good return from the little care bestowed upon it. Sow seed in the same way as for Rock Melon. 1/- oz.

Tom Watson.

Coles Early.—A very extra early variety and good prolific bearer; it is very solid, of good colour and delicious flavour.

WILSON & JOHNS, 70 Barrack Street, Perth.

Mammoth Ironclad.—One of the largest, best keeping Melons grown, flesh deep red, highly flavoured, good shipper, attractive.

Cuban Queen.—One of the best, solid, heavy, early, and of excellent quality.

Black Spanish.—An old favourite, having dark red flesh, very early and of round shape.

Mammoth Santiago.—A very large fruiting variety, producing enormous fruits, 2ft. in length, 12 to 14 in. in diameter, and weighing up to 85lbs.

Fordhook Early.—Bright-red flesh, very sweet, extra early.

The Melvor Sugar.—Soft, pale-pink flesh, crisp, free from stringiness.

Tom Watson.—Produces Melons 16 to 22 in. long and 8 to 10 in. in diameter. The dark green rind is thin but tough. Stands shipping well. Flesh deep red and melting, and of finest flavour. Finest of all Melons.

Rattlesnake.—Good main-crop sort, fruit oblong, large and juicy.

Blue Gem.—Large, thick, oval form, slightly depressed at the blossom end; colour, rich dark green, with faint stripings of a lighter shade.

Seminole.—Very large, first-rate flavour.

MUSTARD

Treat same as Cress.

Best White.—6d. per oz., 1/- per $\frac{1}{2}$ lb.

MANGO MELON or VEGETABLE PEACH

Splendid for cooking, makes excellent preserves. This is one of the most valuable and unique novelties offered to the public for many years. They grow on vines same as melons, are of beautiful golden yellow, almost exactly resembling Oranges in colour, shape and size, very prolific, early and hardy. Directions given for the culture of Rock Melon will answer for these. Sow in September and October. 6d. per packet.

PRESERVING, PIG and PIE MELONS

(6d. per pkt.)

Pie or Common.—(Green Seeded.) For Jams, Preserves, etc.; largely grown for pigs. 1/6 $\frac{1}{2}$ lb.

Citron.—(Red Seeded.) Excellent for Jams and Preserves. Round and handsome. 2/- $\frac{1}{2}$ lb.

ALL PACKETS OF VEGETABLE SEEDS POST FREE,
EXCEPTING PEAS, BEANS & SWEET CORN.

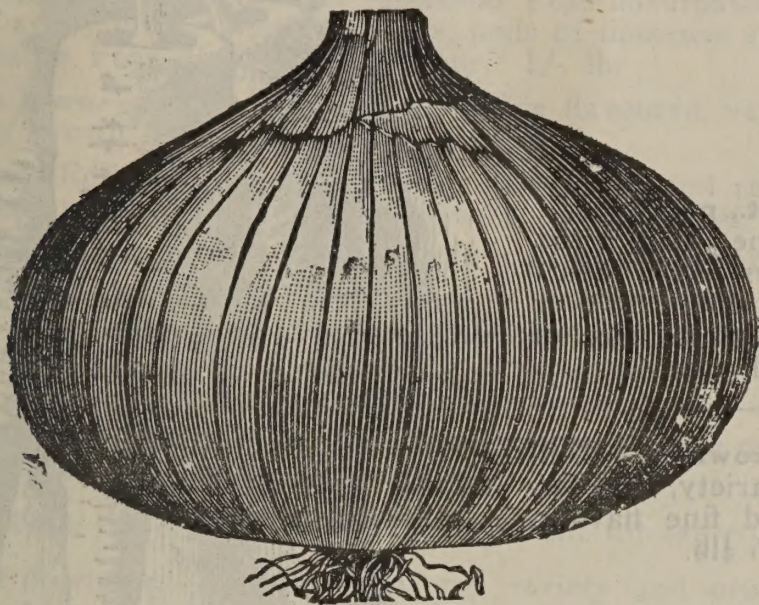

We regularly test samples of all Vegetable and Flower Seeds to see that the bulk germinates freely, and only those that grow well are sent out. Our system of testing samples is as complete as it is possible to make it.

Wilson & Johns' Special Mixed Parrot and Canary Seed.

ONION

(6d. per pkt., post free.)

Good loamy ground should be selected, which should be well worked and manured. Sow seeds from March to April in beds, and transplant into rows 1ft. apart, with from 9 to 12 in. between the plants. Onion Seeds should not be covered, but pressed firmly into the soil. As some of the plants transplanted are likely to start for seed, the flower heads must be pinched out as soon as they appear.

Brown Spanish Onion.

Brown Spanish.—Colonial grown. Undoubtedly the very best variety grown, large bulbs, splendid keeper. 1/- oz., 2/6 ½lb.

Extra Early Golden Globe.—A beautiful onion of fine shape and one of the earliest cultivated. Excellent keeper. 1/6 oz., 3/- ½lb.

New Queen.—A silver skinned variety of quick growth and mild flavour. 1/6 oz., 4/- ½lb.

James' Long Keeping.—Elongated oval, brown outer skin, salmon below, medium size, very hard and strong.

Giant Rocca.—A large, reddish-brown Tripoli. 1/6 oz., 4/- ½lb.

Adriatic Barietta.—An early, small white Italian Onion, for Pickling; should be sown thickly.

White Flat Mammoth.—(Tripoli.) A very large variety, very mild and largely grown. 1/6 oz.

Brown Globe.—A splendid keeping variety. 1/6 oz.

White Spanish.—A very large Onion of even shape and a good cropper. 1/6 oz.

White Globe.—2/- oz.

Silver Skin.—Largely grown for pickling. 1/6 oz.

Shallots.—Seed, 6d. per packet.

POTATO ONIONS, TREE ONIONS, SHALLOTS and GARLIC BULBS can be supplied from February onward.

**THE PRICES IN THIS CATALOGUE ARE FOR
HIGH CLASS SEEDS ONLY.**

BAZAARS, FETES, &c.—We make a speciality of growing plants suitable for Bazaars, Fetes, etc., and are in a position to supply them at specially reduced rates.

TESTED SEEDS.—All our Seeds are carefully tested before being sold to our customers.

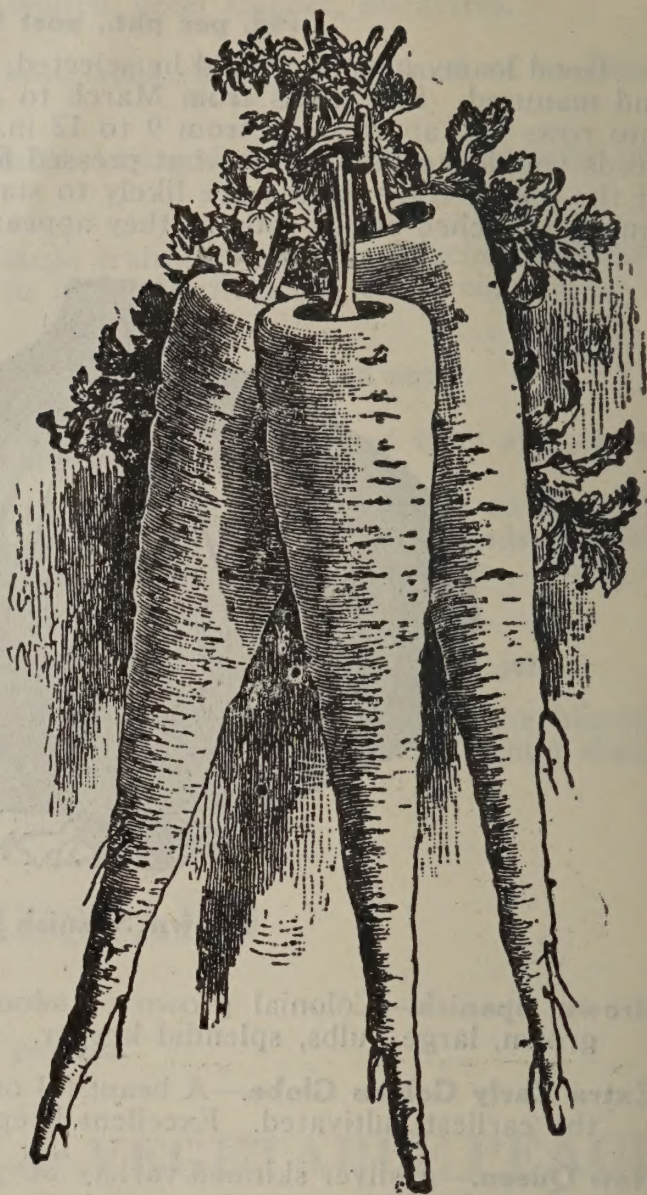

Strong Hardy Roses for the Garden is a Speciality.

PARSNIP

(6d. per pkt., post free.)

Treat same as Carrot, leaving rows 18in. apart and thinning plants to 6 or 8 in., according to size of root required.

Hollow Crown. — Well known variety, tender, sugary and fine flavour. 9d. oz., 1/6 1/2 lb.

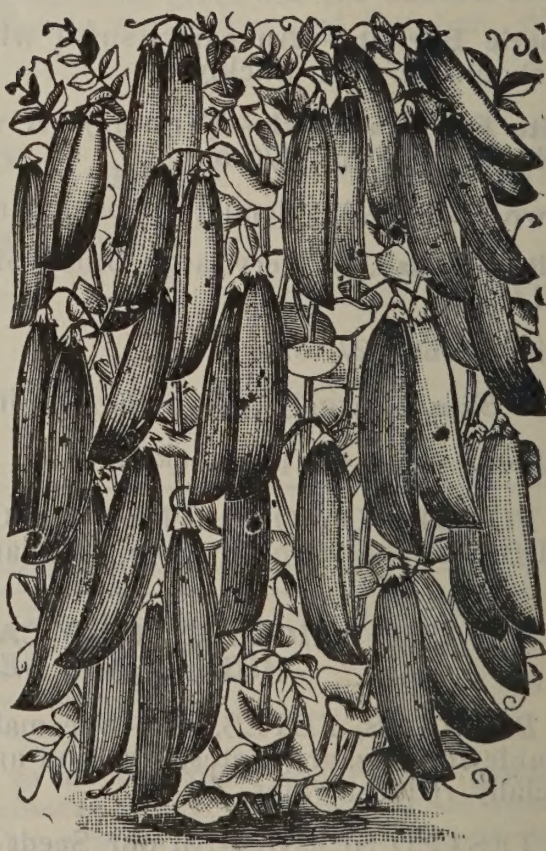

Parsnip—Hollow Crown.

PEAS

Soil that has been manured for a previous crop preferred for Peas sown in the winter, but for those sown in summer an additional dressing should be given. Sow in rows 3ft. apart and the seeds 2in. apart. To have a succession, it is a good plan to sow when the previous crop is well above the ground. 6d. packet, postage extra.

American Wonder. — A very early dwarf marrow-fat, very prolific (1ft.). 1/- lb. postage extra.

Little Gem. — A superior flavoured dwarf marrow-fat, abundant bearer (1ft.). 1/- lb., postage extra.

Wm. Hurst Peas.

February is the best month to sow Delphiniums.

Nurserymen, Seedsmen and Florists.

Gradus.—(Height 2½ft.) One of the finest early Peas in cultivation. It produces uniformly large pods, measuring from 4 to 4½ in. in length, nearly round and well filled with very large handsome Peas, of the finest flavour. 1/- lb.

Stratagem.—A very good cropping variety, with long pods, marrow-fat. 1/- lb., postage extra.

Daisy.—A very valuable variety, large handsome pods, generally containing 7 to 12 large Peas in each pod, delicious flavour. 1/- lb.; postage extra.

Duke of Albany.—Five feet. A splendid Pea, unsurpassed as a main crop variety or for show purposes, pods of immense size, well filled with large Peas of excellent flavour. 1/- lb.

Yorkshire Hero.—A well-known variety, fine flavoured, very productive, largely grown by market gardeners. 9d. lb.

Sugar Peas (Edible Podded).—Tall and dwarf. Do not require shelling if picked young. Culture same as early varieties. 6d. pkt.

William Hurst.—A very early Pea, an abundant bearer, marrow-fat. 1/6 lb.

PARSLEY

(6d. per pkt., post free.)

Sow seed in a warm border in winter and in a shady one in summer. Apply plenty of water in warm weather.

Triple Curled.—A very curled variety, excellent for table. 1/6 oz.

Beauty of Partesse.—A very handsome variety and ornamental, perfectly distinct from all other varieties. 1/6 oz.

PUMPKIN

(6d. per pkt.)

Sow in hills, from September to January, in well-manured ground, each hill being 10ft. apart. Sow 10 seeds in each hill, but do not allow more than 3 to run.

Triamble.—The best Ironbark, having a very small seed centre. The rest solid flesh. 1/- oz., 3/- ¼lb., 10/6 per lb.

Turk's Cap.—A splendid table variety, and a good keeper. 9d. oz., 2/- ¼lb., 7/6 lb.

Ironbark Selected.—Best variety grown, averaging 8 to 12 lbs. in weight, splendid keeper, and always fetching to price in the market. 6d. pkt., 2/6 ¼lb.

Pumpkin—Ironmark Selected.

Mammoth.—A very large, good keeping variety. 2/6 ¼lb.

Connecticut Field.—Very large and productive variety, relished by all kinds of stock.

Bugle (True).—A first-class table variety, prolific bearer. 1/- oz., 3/6 ¼lb.

Mammoth King.—Splendid Pumpkin, large size, good keeper, nicely flavoured. 6d. packet.

POTATOES

Soil should be well manured and plenty of water applied during dry weather. Plant during May for first crop, and on till January for an Autumn crop. When well up, dig or hoe frequently between the rows, which should be 2ft. apart, and 10 to 12 in. between the tubers. Prices on application. **All varieties.**

Our Latest Novelties in Carnations are unsurpassable.

SWEET POTATO

The best and cheapest way to grow Sweet Potatoes is from rooted cuttings, which should be planted in rows, 2½ft. apart. Cuttings planted in moist land as late as January will produce a good crop in about four months. When thoroughly matured, the tubers should be taken up, stored in a warm place, packed in sand. 1/6 doz., 7/6 100, postage extra.

RADISH

(6d. per pkt., post free.)

Sow seed in drills during the winter months, and in beds during summer, in fairly thick soil, applying plenty of water, thinning out as in the case of all root crops. Seed can be sown fortnightly throughout the year, choosing a dry situation during winter and a moist one in summer.

Turnip-Shaped White.—

Very early, crisp. 9d. oz., 1/6 ¼lb.

Ditto Red.—Early, crisp, mild flavour. 9d. oz., 1/6 ¼lb.

Black Spanish.—Very hardy, attains a large size. 9d. oz.

French Breakfast.—A very quick growing variety, oval shaped, scarlet, tipped with white. 9d. oz.

Long Scarlet.—A well-known variety, largely grown, good flavour 9d. oz., 1/6 ¼lb.

Radish—Long Scarlet.

Giant Crimson Forcing.—This new variety produces roots 6 inches to 7 inches in circumference, of the mildest flavour, firm and crisp without getting pithy. An excellent variety for both market and private use. 9d. oz.

White Icicle.—A new, extra early variety, of excellent flavour, short top, maturing in twenty-two days from time of sowing seed; highly recommended. 9d. oz., 1/6 ¼lb.

Mammoth White Chinese.—A giant white variety, mild in flavour, tender and crisp. 9d. oz.

RHUBARB

(6d. per pkt., post free.)

Sow seed in August, September and October, in rich loose soil, in drills for transplanting; sow seed thinly, plant out leaving plants 3½ feet apart. Do not gather any stalks from seedlings the first year, and apply plenty of manure and water during dry weather.

Myatt's Victoria.—A very large variety, of excellent flavour and very prolific. 2/- oz.

Topp's Winter (True).—A splendid variety, producing long crimson stalks during winter months. Should be largely grown. 2/- oz.

RHUBARB ROOTS, 1/6 each.

SQUASH

CULTIVATION.—The Squash is closely related to the Pumpkin and Vegetable Marrow, except the bush varieties, which do not run or require so much room. 6d. per packet.

Early White Scalloped Bush (Custard Marrow).—A nearly flat, scalloped shaded sort, of a light cream colour.

Hubbard.—Large size, flesh fine grained, dry, and of good flavour. A splendid keeper.

Strong Hardy Roses for the Garden is a Speciality.

SPINACH

(6d. per packet.)

Sow Seeds thinly in drills, in rich soil, thinning out so as to leave plants standing 9in. apart. Spinach may be obtained throughout the year by sowing the proper varieties of seed.

New Zealand.—A rapid grower that will stand transplanting. 6d. oz.

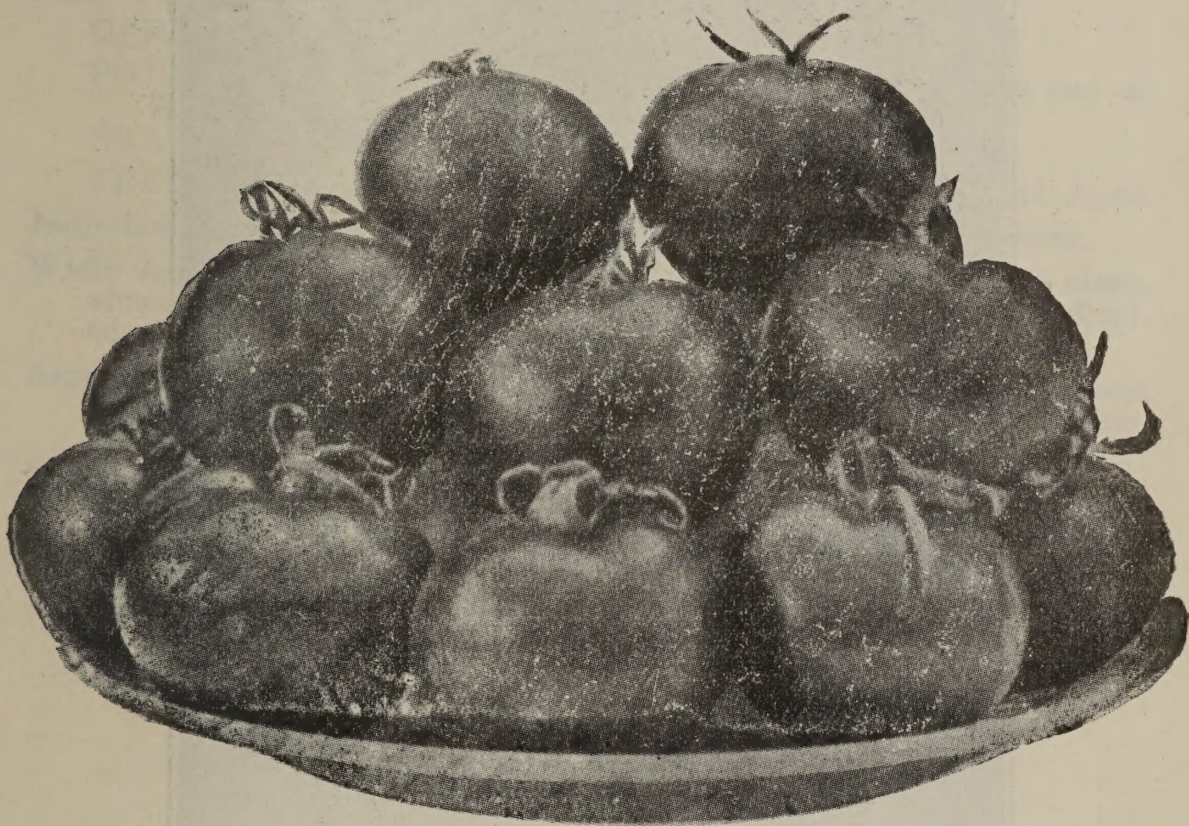

Round.—For spring and summer use. 9d. oz., 2/- 4lb.

Prickly.—For autumn and winter use. 9d. oz., 2/- 4lb.

TOMATO

(6d. per packet.)

Sow seed in boxes in July and transplant into pots as soon as large enough to handle, transplanting to open ground as soon as warm weather sets in. For later crops, seed may be sown in the open ground towards the end of August and September. The plants, as they grow, should be kept thin of shoots, the weak laterals being picked off, and those that are to remain stopped at the flower. Apply plenty of water during dry months.

Tomato—Dwarf Champion.

Burwood Prize.—Second early. A most vigorous and hardy variety, an enormous cropper, smooth, oval-shaped fruit, a good carrier, an excellent market sort. 3/- oz.

Dwarf Champion.—A very distinct early variety, potato-like foliage sheltering its fruit from the sun; highly recommended, 2/6 oz.

Freedom.—Fruit of large size, round and extremely smooth, of a lovely scarlet colour, foliage of a dark green colour, protecting the fruit. 2/6 oz.

Ponderosa.—A very shy seeding variety, of a dark crimson colour, smooth and of a delicious flavour. 2/6 oz.

Chalk's Early Jewel.—A splendid new variety, extremely early, large size, handsome smooth fruits. The growth is most compact. A plant in full fruit bears sixty to eighty fine large tomatoes of good size. The large handsome fruits are very solid and deep through, being almost round or ball shaped. Colour, brightest scarlet. Price, 6d. per packet, 2/6 per oz.

Early Large Red.—A well-known hardy variety, crinkled fruit of excellent flavour. Very early. 1/6 oz.

Acme.—Fruit medium size, dark glossy red, early. 2/6 oz.

Sow Iceland Poppies from January to February.

Mikado.—Produces fruit of bright scarlet colour, quite distinct foliage to any other variety, large size. 2/6 oz.

Pear Shaped.—For preserves and pickling. 2/6 oz.

The Peach.—Resembling a peach in size and colour, excellent for dessert. 6d. per packet.

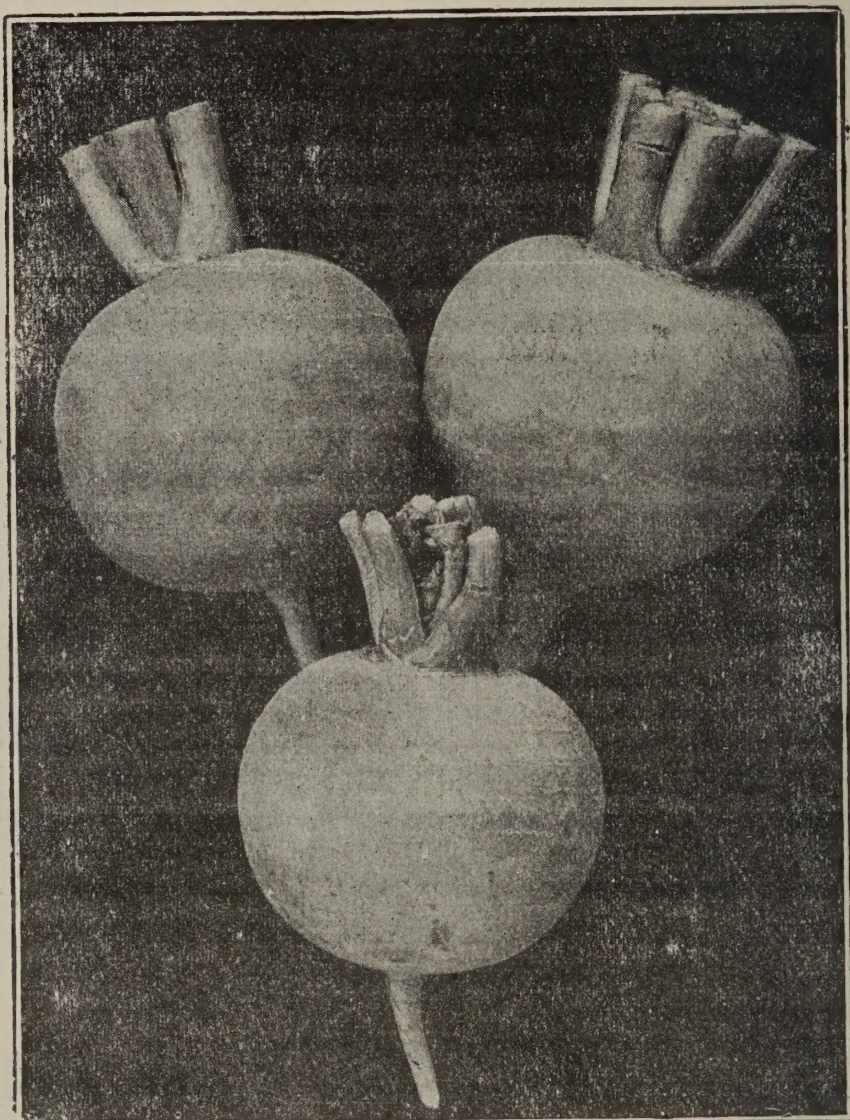

Earliana.—Large size, handsome shape, a lovely red colour and the most prolific Tomato grown; in solidity and extra fine quality it is unsurpassed. It has been known to produce over 60 well-formed fruits on one single vine. It is almost seedless. 2/6 oz.

Trophy.—A very large fruiting sort, solid and excellent flavour. 2/6 oz.

Tomato.—Six choice varieties. Post free, 2/-.

Tomato Plants.—All the best varieties can be supplied from July to December. 1/- doz.; cheaper in quantities.

Tree Tomato (Edible).—6d. per pkt. A sub-tropical shrub, the fruit of which somewhat resembles the Tomato, hence the reason it is called "Tree Tomato." The fruit makes a good jam. Plants in pots, 1/6 each.

Turnip—Non-Seeding White.

TURNIP

(6d. per pkt., post free.)

Sow seeds in beds or rows in good, rich soil, and then thin out when large enough to handle, always keeping the surface of the soil in a loose state, giving plenty of water during summer.

Purple Top White Globe.—A very handsome, early variety, pure white flesh and superior flavour. 1/6 ½lb.

Early White Stone.—A well-known variety, nice flavour, good shape, early. 6d. oz., 1/6 ½lb., 4/- lb.

Extra Early Milan.—A first-rate purple-topped variety, white flesh, extra early. 1/6 ½lb.

Orange Jelly.—A splendid summer variety, withstands heat, medium size. 9d. oz., 1/6 ½lb.

Roses on our new stock cannot fail anywhere.

Nurserymen, Seedsmen and Florists.

Snowball.—Largely grown by Market Gardeners, very early, good shape, fine flavour. 6d. oz., 1/6 ½lb.

Non-Seeding White.—An exceedingly early white turnip. Very rich flavour, which is entirely distinct from any of the early white fleshed sorts, being much richer and sweeter. 6d. pkt., 1/6 ½lb.

White Red Top.—Round Autumn. 6d. packet.

New Champion.—Fine white globe shape, the most profitable Turnip in cultivation, and is held in high esteem by all growers who have tried it. The finest variety for market gardeners. Grows to good size quickly. 9d. oz., 1/6 ½lb.

SWEDES

Improved Purple-Top Swede.—The best for general purposes, large, fine grained, yellowish flesh, a good keeper. 6d. packet, 1/6 ½lb.

Lang's Garden Swede.—A splendid table Swede, handsome shape, excellent quality. 9d. oz., 1/6 ½lb.

VEGETABLE ROOTS, PLANTS

Onions, Bulbs, etc.—

GARLIC, 1/- lb. Obtainable all the year round.

POTATO ONIONS.—1/- lb. Obtainable from February to end of April.

SHALLOTS.—1/- lb. Obtainable from February to July.

TREE ONIONS.—1/6 lb. Obtainable from February to end April.

Jerusalem Artichokes.—Strong tubers. Obtainable July to October.

White Jerusalem.—A pure white variety, the tubers of which are clean, almost round, with few and very shallow eyes, flavour excellent. 6d. lb.

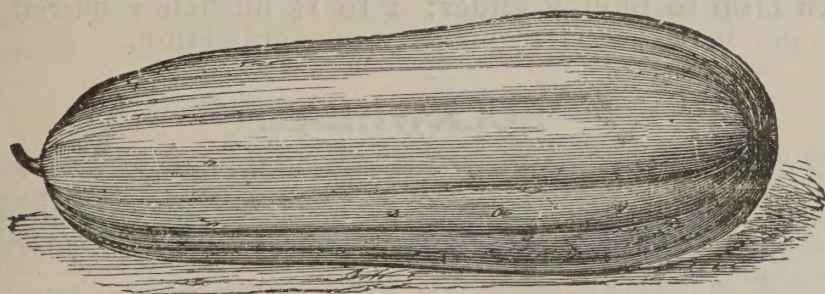

Asparagus Roots.—Obtainable from May to August, Conover's Colossal. A well-known variety, of large size, tender and of good quality. Two and three years old roots. 2/6 doz. to 12/6 per 100.

Rhubarb Roots (Topp's Winter).—This is an extraordinary variety, being in the greatest perfection during the Winter months, namely, between the months of May and September, when every other variety is at rest. It is very hardy, being unharmed by the severest frosts. It is very prolific, stalks long, rather below medium size, the pulp and juice when cooked being highly coloured, flavour good. Price, 1/6 each; 15/- doz.

VEGETABLE MARROW

(6d. per pkt.)

Similar treatment to that required for Cucumber will suffice for Vegetable Marrow, planting the bush varieties 4ft. to 5ft. apart, and running varieties 8ft. 6d. packet, post free.

Vegetable Marrow—Long White Bush.

Long White Bush.—An excellent variety, abundant bearer, superior flavour. 2/- ½lb., 7/- lb.

Custard.—A bush variety, taking up little room, very prolific. 2/- ½lb., 7/- lb.

Early Long White.—A quick-growing variety, trailer, excellent flavour, very prolific. 2/- ½lb., 7/- lb.

Long Green.—Similar to the above, excepting that it cooks drier and is of different colour. 2/- ½lb., 7/- lb.

Grow your own Vegetables: it is healthier and cheaper.

FARM SEED

DEPARTMENT.

FORAGE CROPS

A LEADING SPECIALITY OF OURS.—When enquiring for samples and prices, kindly state approximate quantities required.

IMPORTANT NOTICE.—As we deal very largely in Agricultural Seeds of all descriptions, and make them one of our specialities, we are enabled to supply large purchasers on unusually favourable terms, and will be pleased to give any information regarding cultivation, sowing, etc.

AUSTRALIAN SALT BUSH.

This is one of the most useful of our native fodder plants. Particularly adapted for a dry climate like ours. 7/6 lb.

SUNFLOWER.

A valuable plant, furnishing a large yield of excellent poultry food. Sow the seed about September, leaving the plants about two feet apart; apply plenty of manure and a good crop will follow. 7lbs. of seed will sow an acre.

Large Russian.—1/- per lb. Cheaper in quantities.

SHEEP'S BURNET.

This fodder plant has proved itself to be eminently suitable for dry inland country, where it would be futile to sow English grasses, and where the soil is not suitable for growing Lucerne. 1/6 lb. Price in quantities on application.

TAGASASTE.

(Commonly called Tree Lucerne)

About 4lbs. of seed is sufficient to sow an acre. 6d. per oz., 1/6 ½ lb., 5/- lb.

COW PEA.

A valuable fodder plant, sheep being very fond of it when in flower, when they will eat the entire plant. It is also very valuable as a green crop to plough under; 1 to 1½ bushels required to sow an acre. 9d. per lb. Price for quantity on application.

BUCKWHEAT.

(50lbs. to the Bushel.)

In China and Japan the seed is used for making bread, and in Europe it is employed for various purposes. It is an excellent food for poultry, and is useful for bees. 9d. lb.

TARES or VEITCHES.

The Tare or Veitch is a most valuable forage plant, and also makes excellent green food. The crop should be sown in Autumn as early as the seed is able to germinate. It is most commonly sown with Barley and Rye (which helps to support it, and thus adds to its productiveness) at the rate of half bushel (60lbs. bushel) to the acre, or singly, 2 bushels.

Golden Gray or Black.—9d. lb. Prices for quantity on application.

Our Latest Novelties in Carnations are unsurpassable.

— PURE —
Clover Seeds.

Please state approximate quantity required. Prices for 14lbs. to ton lots, with samples, post free on application.

TREFOIL or HOP CLOVER.

This Clover is very distinct, bearing a yellow flower, is erect and branching, and yields a large crop. It is useful for sowing with other grasses, at the rate of 2 to 3 lbs. per acre. This is a clover highly esteemed in England. It grows on any soil that contains lime, and although it is an Annual, it seeds itself so freely that it may almost be classed as perennial. 20 lbs. required to sow an acre. 1/6 lb.

TRIFOLIUM SUBTERRANEUM.

This Clover, which is one of the most nutritious plants known to agriculture, is indigenous to Britain and is found growing on dry, sandy and gravelly soil. It is an Annual, but may be almost classed as perennial, because it sows itself when once it gets a start, and this peculiarity cannot be claimed by any other member of the Clover family. The stems grow over each other to a depth of 6 or 7 inches, the lower ones being as healthy as those above; indeed the lower shoots are those that force their seed pods into soil in readiness for the following season's crop, hence the distinction applied to it. "Subterra." When once introduced into grazing land, there it will remain until ploughed in. Clean seed, 1/2 lb. 2/-. Price for quantity on application.

BURR TREFOIL.

This Clover we recommend as the best variety of all Clovers or other Grasses for our dry districts. It will grow anywhere and in any soil, and it has the special qualification of doing better than any other grass in our dry districts. This is the plant that is grown all over the dry plains in the Western District of Victoria for sheep feeding. The seed should be sown before the first autumn rains so that the plant gets the benefit of every drop of rain that falls. The plant is a rapid grower, and quickly produces a great amount of good food. It dies off in the hot weather, but when dead it is good feed for sheep and is readily eaten by them. It seeds very freely, and when once introduced is difficult to eradicate, as the seeds germinate with first Autumn rains each year. Price 2/- per lb. Special price for quantities.

COW GRASS or PERENNIAL RED.

This is distinct from the Common Red Clover, possessing a strong and more penetrating root, and is less affected by either drought or frost. It is of quicker growth than the other varieties and yields an immense crop, which is highly nutritious. This should be introduced into all permanent pastures. 20lbs. required to sow an acre by itself, or 4lbs. mixed with other grasses. 2/6 lb.

BOKHARA CLOVER.

A very coarse growing Clover, which is found to do well in our country and other districts. We would advise a trial of this in dry situations; it is a good drought resister, the roots penetrate very deeply into the sub-soil, and it remains green and continues to grow long after everything else is dried up. It is a splendid plant for bees, or would make good ensilage. 2/6 per lb.

TRIFOLIUM INCARNATUM.

(Crimson or Italian Clover.)

A very heavy cropping Annual Clover. It can either be grown for hay crop or for green soiling (ploughing-in). All the Clovers absorb their nitrogen from the atmosphere, and when ploughed in are nearly as good as a dressing of stable manure. Autumn is the best

season to sow, and 12 to 15 lbs. of seed are required for an acre. The land should be well rolled after sowing, otherwise this crop will not succeed. Even after taking off a heavy hay crop the land will be found much enriched. 1/6 lb.; cheaper over 14 lbs.

ALISKE or HYBRID CLOVER.

A Perennial variety, hybrid between the red and white, but of much stronger growth than the latter; it will do well on all kinds of soil, yielding a heavy crop where no other Clover will succeed. Aliske Clover is highly valuable for permanent pasture. 12lbs. is required to sow an acre by itself, or 2lbs. if mixed with other grasses. 2/6 lb.

YELLOW SUCKLING CLOVER (*Trifolium Minus*).

This is an Annual Clover, native of Europe, which must have been introduced many years since, and has proved its suitability to the conditions of Western Australia by spreading over all the older settled districts. It seeds freely, and once introduced becomes permanent, coming up after the first rains. Sow from 10 to 20 lbs. to the acre before the first rains. A dressing of Thomas' Phosphate helps it wonderfully. 1/6 lb.

EGYPTIAN CLOVER (or Berseem).

This variety grows a little taller than Lucerne, and yields an immense crop of very succulent fodder, which is much relished by stock. The best time to sow is with the first Autumn rains, the first cutting can then be made before the Winter, and the second growth is better fitted to withstand the cold. 2/- lb. Price on application for quantity.

WHITE DUTCH CLOVER.

One of the most valuable forage plants we possess. In any cool, moist district this Clover, if once introduced, will soon spread, as the cattle carry it everywhere. Scarce and dear this year.

Superfine, 3/6 lb.

STRAWBERRY CLOVER.

Quite distinct from other clovers. When established grows very rapidly and gives an immense quantity of fattening herbage. Thrives best on land subject to flood, or any damp situation.

Shelled Seed, 15/- per lb.

MELILOTUS OFFICINALIS.

(King Island Fodder Grass.)

This is nearly related to Bokhara Clover, and has the same strong smell and deep rooting habits. It is a wonderfully successful fodder plant on King Island, off the coast of Tasmania. It grows there most luxuriantly, and the cattle fatten rapidly upon it. The farmers there have a very high opinion of it, but we consider that it should be sown with caution, as the smell may taint the milk from cattle fed upon it. 1/6 lb.

Natural Grasses.

ITALIAN RYE GRASS.

This grass is really only a Biennial, but practically will last for many years if not eaten too closely in the late spring. as it readily propagates itself by seeding. It is one of the earliest grasses to come in the Spring, and it will give a good bite long before most others start into growth. Planted in early Autumn, it will give an enormous crop of winter and spring feed, especially suitable for milch cows. If sown alone 2 bushels are required per acre. Heavy re-cleaned samples, 1/- lb. Price for quantity on application.

RIB GRASS.

Is one of the best of our grasses, and holds a place in almost every pasture. Sow with other grasses, 2lbs. to the acre. 1/- lb.

CRESTED DOGSTAIL.

A valuable fine short grass. It forms a close dense turf of graceful nutritive herbage, and is little affected by extremes of weather. Stock

Sow Iceland Poppies from January to February.

Nurserymen, Seedsmen and Florists.

of all kinds, especially sheep, are very fond of it. From 3 to 6 lbs. per acre with other grasses. 2/- lb.

PERENNIAL RYE GRASS.

This is one of our most largely cultivated and valued grasses, and its merits are becoming more and more recognised every year. It adapts itself to almost any soil, germinating freely from seed, is easily propagated, and seeds abundantly. It is of upright habit, bearing abundance of foliage, which is at all times relished by stock; it stools out very freely, but does not grow in tufts; its roots are fibrous and penetrating, giving it a permanency that does not belong to many others. Sow (it alone) 40 lbs. to the acre. 1/- lb. Cheaper in quantity.

RYEGRASS WESTERNWORTHS.

Everybody should grow this wonderful quick-growing Rye. Has been cut three times in a year, last cutting being 3ft. high. It is the quickest growing grass known. It will thrive on almost any soils, but the best results have been had from land of a moist character. As the seed is indistinguishable from ordinary Indian Rye, buyers should be careful to secure seeds true to type. Price 1/- lb.

WIMMERA RYE.

(*Lolium Subulatum*.)

Is stated to be a native of Southern Europe. Commences to grow with the first autumn rains, but makes best growth in the spring. Stock relish it and fatten quickly. It also makes excellent hay. Should be cut immediately after flowering, otherwise depreciates in quality. 1/- per lb.; cheaper in quantity.

SHEEP FESCUE.

A portion of this grass should be included in all mixtures for dry districts, especially for sheep grazing, as they greatly relish it. 1/6 per lb.

TIMOTHY GRASS.

This grass thrives best on moist soils on rich wheat-bearing alluvial clay lands, also on newly-reclaimed soils. It is of strong growth and yields abundantly. Sow if alone 30 lbs. to the acre. 1/- lb.

PRAIRIE GRASS.

This is one of the most nutritious of fodder and pasture grasses. It produces enormous crops, and can be cut four or five times a year, provided it is not allowed to go to seed. It succeeds well in almost any soil, but prefers that which is wet or moist. Stock will eat it greedily, either in the green or dry state. A small proportion of it is valuable in mixtures; but upon the whole it is best alone. The demand for this grass increases year by year, proving that it will repay cultivation. Sow (if alone) 40 lbs. to the acre. Price on application.

COUCH or BERMUDA.

Valuable in dry situations. It is exceedingly useful for binding railway embankments and hills, dams and river banks, on account of long creeping shoots which root at every joint. It also makes a very good lawn when kept well cut. March, April, October and November are the best months to sow, as during the cold winter months it is unlikely to germinate if put down. 4/- per lb. Couch roots, 6/- per sack.

Rape.

Every Sheep Farmer should try it. Dwarf Essex is the Genuine Dwarf Broad-Leafed Essex Rape.

Rape is, without doubt, one of the most useful plants for fattening sheep, containing, as it does, about 80 per cent. of carbohydrate, 2 per cent. albumen, and a little fat. It succeeds best in the cooler districts during the summer, and in the warmer districts during the winter. It likes well cultivated land, fairly moist, and if sown in August or September will give a good summer crop. If sown early in April, just after the first Autumn rains, it will provide good winter

Strong Hardy Roses for the Garden is a Speciality.

feed. The seed should be sown broadcast on a finely harrowed surface, and the roller passed over it. This is sufficient covering, for if buried too deeply it will not germinate. Stock should never be turned into rape when hungry, otherwise they will become blown and many may die. One acre will fatten about a dozen lambs. If not eaten too bare, its broad foliage enables it to smother the weeds, and by judicious grazing, it will last throughout the season, and leave the ground in good condition. It is also exceedingly valuable as green manure, for which purpose a top-dressing should be given immediately after harvest, worked into the land with a scarifier, and the seed sown broadcast. It may be ploughed in as soon as large enough, or a flock of sheep may be fed on it for a few days previous to ploughing. 4 to 6 lbs. required to sow an acre.

14lbs., 1/- lb. Price for quantity on application.

PASPALUM DILATATUM

Withstands drought and is not affected by frosts.

This wonderful Fodder Grass is one of the most valuable ever introduced into Australia, for it not only withstands drought, but frosts will not kill it. It should be sown only during the spring and early autumn months, say from September to April, when it will germinate easily in a month. According to our experience, it succeeds best in light, sandy soils. It takes 6 to 8 lbs. to sow an acre. Price for prime hand-shaken Paspalum Seeds, 2/6 lb.; cheaper in quantity.

PASPALUM ROOTS.

To those who wish to obtain quick results, we would advise planting roots, which come away at once. Planted at a distance of 3 feet each way, it takes 4840 plants to do an acre.

Strong Roots, 10/6 per Sack.

CLUSTER CLOVER.

(Trifolium Glomeratum.)

This Clover spreads rapidly, and yields an abundance of good pasture. It is purely an Annual, which seeds freely, and so maintains itself even on dry, sandy soil. It is a splendid plant for improving bare, arid pasture lands. 1/6 lb.

PHALARIS BULBOSA CANARY GRASS.

It first appeared at Toowoomba, Queensland, amongst a number of trial plots of grasses sent out from Italy, and it proved to be so suitable to Australian conditions, that it soon made a local reputation, and is being extensively grown in all the Australian States, New

Roses on our new stock cannot fail anywhere.

Zealand and South Africa. It is a very strong grower, particularly in the winter season, when most other grasses are dormant and foliage so scarce. It is relished by all kinds of stock. 7/- per lb.

LOTUS MAJOR.

(The Greater Birdsfoot Trefoil.)

A deep rooted Perennial Clover, producing an enormous amount of fodder. It is highly nutritious and is eaten with avidity by cattle and sheep. From the great depth to which the roots penetrate, it is not liable to be injured by drought. It does particularly well in bushy and moist localities, or in wet meadows, and attains its greatest luxuriance on soils which have some peat in their composition. Very highly recommended. Sow 10 to 12 lbs. per acre, 6/- per lb.

FIELD CABBAGE

The Cabbage can be cultivated in two ways—by raising your plants in a seed bed and transplanting, and by sowing the seed in drills where the crop is to grow. For the former style 1 lb. is sufficient for an acre; for the latter 4lbs. to 6lbs. are required.

Giant Drumhead.—A late variety, growing an immense size; very solid and largely cultivated. 1/- per oz., 4/- ½lb., 12/6 lb.

Thousand Headed Cabbage or Kale.—This is invaluable as a fodder for sheep, cows, etc., on account of the immense quantity of food it produces. It grows to a height of from three to four feet, and may be fed off twice and sometimes thrice. It is a plant that produces more food per acre than any other, does not disagree with any stock, and does not impoverish the land, and never causes sheep or lambs to blow or scour. Excellent for poultry. 9d. per oz., 1/6 ½lb.

Jersey Cow Kale.—A valuable fodder for cows, sheep, etc. Highly recommended. 6d. oz., 1/6 ½lb., 2/6 ½lb., 4/- lb.

FIELD PEAS

One of the most profitable crops. Valuable in rotation with cereals, and useful for land fouled by weeds. Whether grown for its seed or for fodder in mixture with oats, or for ploughing under, there is no crop we can recommend for more extensive culture. Like all leguminous crops, Peas have the power of extracting nitrogen from the air, and the soil from which a crop of peas has been harvested is richer in nitrogen than before. The pea, like the bean, delights in soil of a calcareous character, but succeeds best in light loam. If grown for green peas or seed on strong clay or soils rich in vegetable matter the growth is too luxuriant, and if the season be wet the pods will not fill out. Sow during the wet season either broadcast at the rate of two bushels per acre, or in drills 2ft. apart.

Blue Prussian, Blue Imperial, Gray or Partridge Dunns. (Prices on application.)

KALE

Ghou Moellier.—A very valuable fodder plant of rapid and vigorous growth, highly nutritious and eagerly sought after by stock. It belongs to the Kale family, and is perfectly hardy. The plants should stand from 12 to 14 inches apart, and 2 feet between the rows, thus giving each other support when they are standing in exposed positions. 2lbs. in drills and 1lb. transplanted is sufficient to plant one acre. Price 1/- per oz.; 8/- per lb.

COCKSFOOT or ORCHARD GRASS

Cocksfoot has now become the greatest favourite with stock holders and farmers, and is considered a most excellent permanent pasture grass. All kinds of stock are fond of it; sheep fatten on it, and eat it most greedily. It yields a large quantity of herbage, and

Our Latest Novelties in Carnations are unsurpassable.

from the rapidity of its growth after cutting or feeding off it is a very desirable grass to introduce into all pastures; it is perhaps the hardiest of all perennial varieties. We have no hesitation in recommending this as a pasture grass that must prove of the highest value to all who are engaged in pastoral or agricultural pursuits. Sow on scrub land, 20lbs. to the acre. 1/6 per lb. Prices for quantities on application.

RHODES GRASS

An introduction from South Africa, which is finding great favour in Queensland, but we do not recommend it for districts where cold winters are experienced, as it goes down with the first heavy frost. It is a very strong grower, rooting at the joints and soon covering a large area; on this account it should not be planted in land intended for cultivation. It should be tried in semi-tropical moist climates. Mr. Newton, of the Queensland State Nursery, at Cairns, says he finds it the most suitable grass for that district. It is said to be the only grass that will hold its own with Paspalum in hot, moist climates, and it is largely sown in mixtures with Paspalum. It is not suitable for cold or very dry districts. The seed is very light, 2lbs. being a fair seeding per acre. Price, 2/6 per lb. Special quotations for quantities.

Lucerne

Should be grown by every Farmer. Excellent for Cattle, Horses, Sheep, etc.

HUNTER RIVER (Saved Seed).

The droughts which have been experienced in many parts of Australia during past seasons should awaken those who have not already prepared for such emergencies by taking time by the forelock and laying down a certain portion of land in Lucerne, as owing to its deep rooting qualities, it withstands drought excellently, and with a shower or two of rain, produces an abundance of fodder, which is

Our Latest Novelties in Carnations are unsurpassable.

Nurserymen, Seedsmen and Florists.

eaten by horses, cattle and sheep with great relish. It can be depastured on during the winter months, if cut during the summer, without destroying its permanence. It excels all other Fodder Plants for the purpose of hay, our climate and deep soil being especially adapted to its growth. In a very favourable season it will produce 4 or 5 cuttings from the beginning of August to the latter end of March, according to the character of the soil. The seed should be sown in good deep rich land, the roots penetrating to a great depth. The more the land is worked, the better chance there will be of producing a crop. It should be subsoiled during the summer to as great a depth as possible. After this, cross plough, harrow and roll, until staple is as well pulverised and the surface as smooth as it is possible to get it. Care should be taken to eradicate all couch grass from the land before the seed is sown, as it is very injurious to a Lucerne crop. The thicker the crop, the finer and better will be the quality of the hay. The seed should be sown in autumn and spring, 5 to 6 lbs., in drills, or 10 to 12 lbs. broadcast required to sow an acre.

NOTE.—All seed is specially machined and hand-sieved before being sent out.

PRICE.—Hunter River (Saved Seed), guaranteed, 3/- per lb. Price for quantity on application.

SUDAN GRASS.

The Wonderful Drought-resistant Summer Fodder.

Sudan Grass produces a higher yield of forage under drought conditions than any other summer plant under ordinary conditions; grows to 6ft. high. In favourable seasons if sown early it will yield 3 or 4 good cuttings. After each cut cattle can be turned into the stubble for a period.

Prime Re-cleaned Seed, 1/- per lb. Price for quantity on application.

SORGHUMS.

All the following are most excellent fodder plants for dairy cows; they will give an enormous yield in suitable seasons, and may be grown either for summer or for autumn or early winter feed. The early crop should be sown directly the frosts are over, and the second crop may be planted up to the end of January. November and December being the best months. In rich moist land, and where fineness is desired, 60lbs. are not too much to sow broadcast per acre; but in drier situations 30lbs. are ample, and it is a good method in such land to sow in drills three feet apart, and keep the land between the rows cultivated.

Sorghum Saccharatum.—The old variety, hardy, 1/- per lb.

Early Amber Cane.—The earliest and best for dry situations. 1/- lb.

Planter's Friend.—Best for winter crop. 1/- lb.

AFRICAN WONDER GRASS.

(Roots only.)

A marvellously strong and rapid grower, of very high feeding value, and remarkably drought resisting. 3/6 per 100.

JOHNSON GRASS or EVERGREEN MILLET.

(Sorghum Halapense.)

A valuable Perennial variety of Sorghum, which has now come largely into use. It thrives well in almost all soils and situations, however warm or dry; but where it can be irrigated it produces enormous crops. Cattle, horses and pigs are exceedingly fond of it. The seed takes a long time to germinate. 2/- per lb. cheaper in quantity.

MILLETS

JAPANESE MILLET.

Sow from September to December, in drills, 3ft. apart, 8 to 10 lbs. per acre. Broadcast, 15 lbs. per acre.

Special Quotations for large quantities of Farm Seeds.

Called in America "The Billion Dollar Grass." The most wonderful fodder plant ever introduced. Should be grown by all Dairy Farmers. The Millet has proved itself to be one of the most popular forage plants grown in W.A. It is an Annual of exceedingly rapid growth, standing 6 to 8 feet high, and yields 10 to 12 tons per acre of green fodder, which, when cured, makes an excellent quality of hay. If cut before flowering it starts again rapidly, and yields a second crop. Its drought-resisting qualities will also render it a valuable green food when pastures are short. The Millet will prove most desirable, being rich in milk-producing qualities, and yielding a much heavier crop than the grasses and clovers generally used. When ripe, it has a large, loose seedhead, and the seed is greedily eaten by all kinds of birds. 9d. lb.; cheaper in quantity.

HUNGARIAN MILLET.

A very quick-growing variety, excellent for a summer crop, and producing in a moist season two crops of hay. For warm districts it cannot be excelled. 9d. per lb., cheaper in quantity.

EGYPTIAN or PEARL MILLET.

(Penicillaria).

Called in America "The Wonderful Fodder Plant." A very productive and useful forage plant, which has been grown in New South Wales with great success. It is a strong grower, and yields a great amount of green fodder. When the plant first comes up the stems are prostrate, but assume an upright position when two feet long. Stock eat it with great avidity. It can be cut three or four times, sprouting readily and growing rapidly after each cutting. 2/- per lb., cheaper in quantity.

Root Crops.

SUGAR BEET.

Culture same as Mangels, excepting that the roots can be planted closer, as large roots are not desirable for Sugar making. This is the root from which nearly all the sugar is made, which is not produced from sugar cane, though it is not grown here for that purpose. Sugar Beet requires very deeply worked ground, so that the roots may easily penetrate it, as it is the thin part of the roots that contain the most sugar. It is excellent feed for cattle and pigs. 3/- lb.

SILVER BEET.

(The New Sheep Fodder.)

During the past year or two, experiments have been made in New Zealand with Silver or Spinach Beet for sheep grazing. The plant is grown for the green tops, not for the roots, as with other Beet, and it is found that the foliage is re-produced so quickly after being eaten down, that it makes one of the most profitable plants for sheep fattening. Plant in rows, 30 inches apart, so that the land can be hoed, and thin from 9 to 12 inches apart in the rows. Sow 3 or 4 lbs. per acre. 4/- per lb.

TOBACCO.

The soil best adapted for Tobacco culture is a deep chocolate or rich sandy loam. Sow the seed in July or August in a warm position, transplant in September or October, 2 ozs. of seed are sufficient to plant an acre. 6d. per packet.

Connecticut Virginian.

MANGEL WURZEL.

1/- ½lb., 3/- lb.; postage extra. Sow 4 to 6 lbs. per acre.

Mammoth Long Red.—The heaviest cropping Mangel grown, and the best variety for deeply-worked land.

Champion Yellow Globe.—An excellent variety of splendid feeding value. Best for shallow soils.

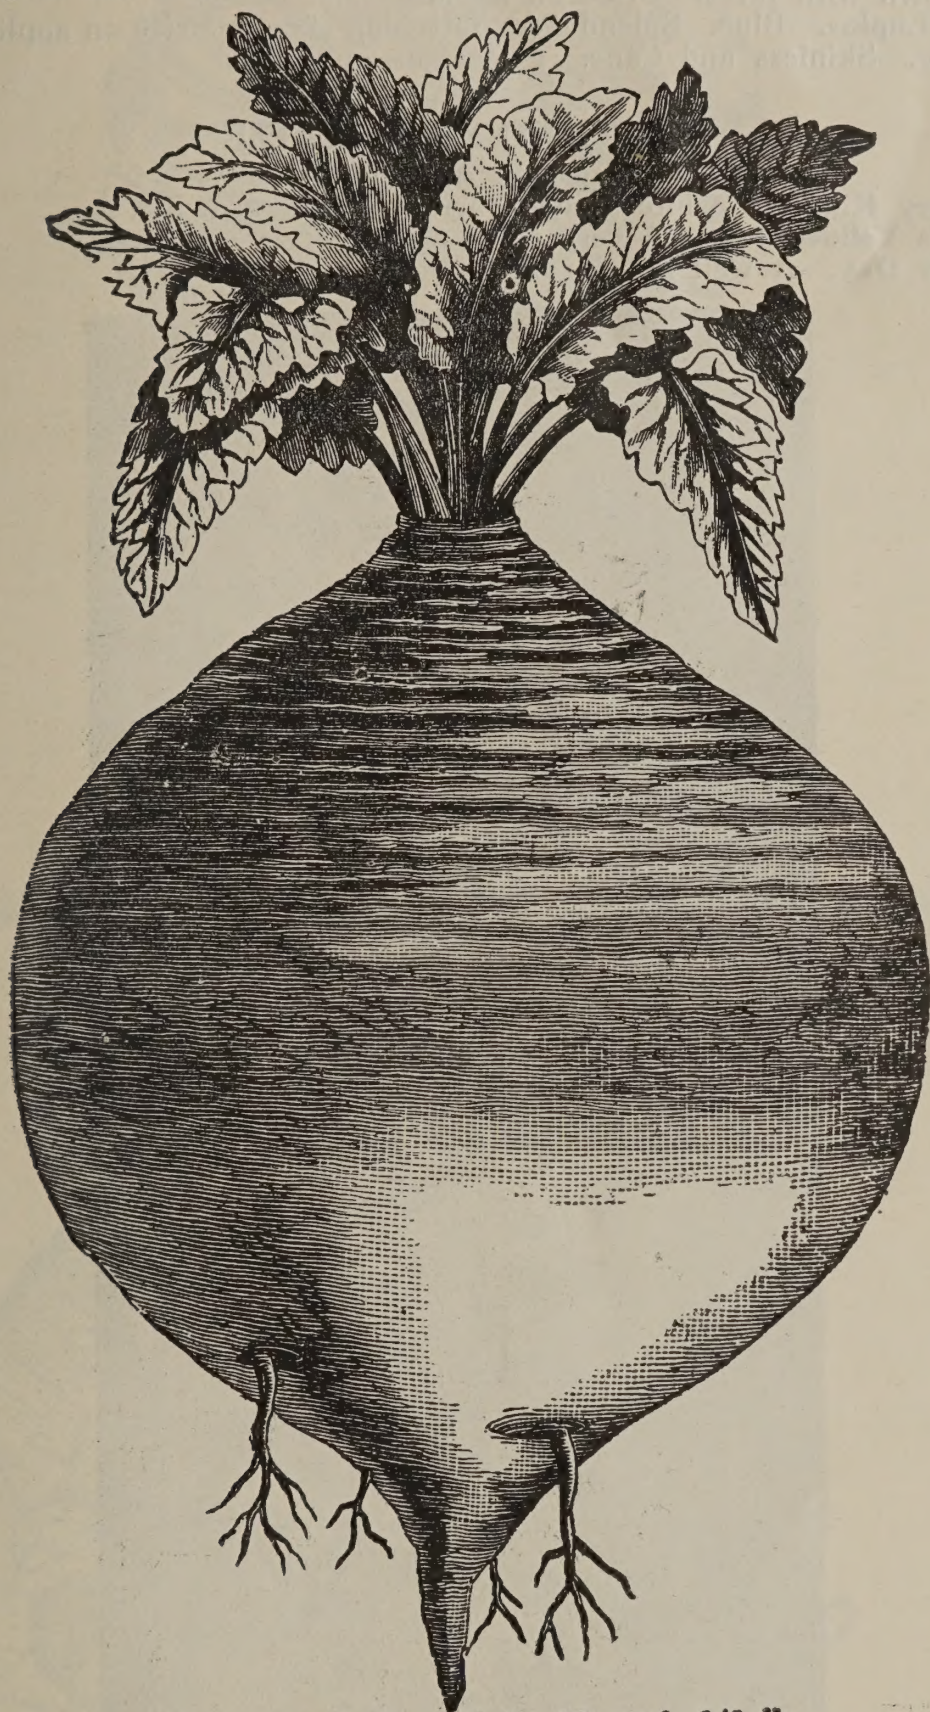

For dairy farmers this is one of the most valuable crops grown, as cows fed on Mangels give a greater quantity of milk.

All Flower Seeds post free to all parts.

Nurserymen, Seedsmen and Florists.

The ground for Mangels should be deeply and thoroughly worked by ploughing and harrowing twice. Roll and harrow lightly. Sow seed in drills 2ft. apart, thin out to 12 to 18ins. from plant to plant. Seed can be sown in spring or early autumn.

Skirving's Improved Purple Top Swede.—A splendid variety, good keeper, fine shape, excellent quality. 1/3 4lb., 3/- lb.

Champion Yellow Globe Mangel, 2/6 lb.

CARROT.

(Sow 4lbs. per acre).

The best soil for the field growth of Carrots is a loose sandy, friable loam of about 18ins. in depth. Soils of almost any kind are suitable which possess the requisites of depth, openness and freedom from stones.

Improved White Belgian.—Grows to a very large size and produces a heavy crop. Suitable for all soils. 1/6 4lb., 4/6 lb.

Long Red Altringham.—An extra fine sort. The roots grow to a large size, and are of excellent quality. 2/- per 4lb.

Strong Hardy Roses for the Garden is a Speciality.

Miscellaneous Crops.

RYE GRAIN.

Rye Grain.—Very useful to sow on poor soils for green fodder. Often sown with tares. Price on application.

Field Lupins.—Blue. Splendid for fattening sheep. Price on application.

Barley.—Skinless and Cape. Prices on application.

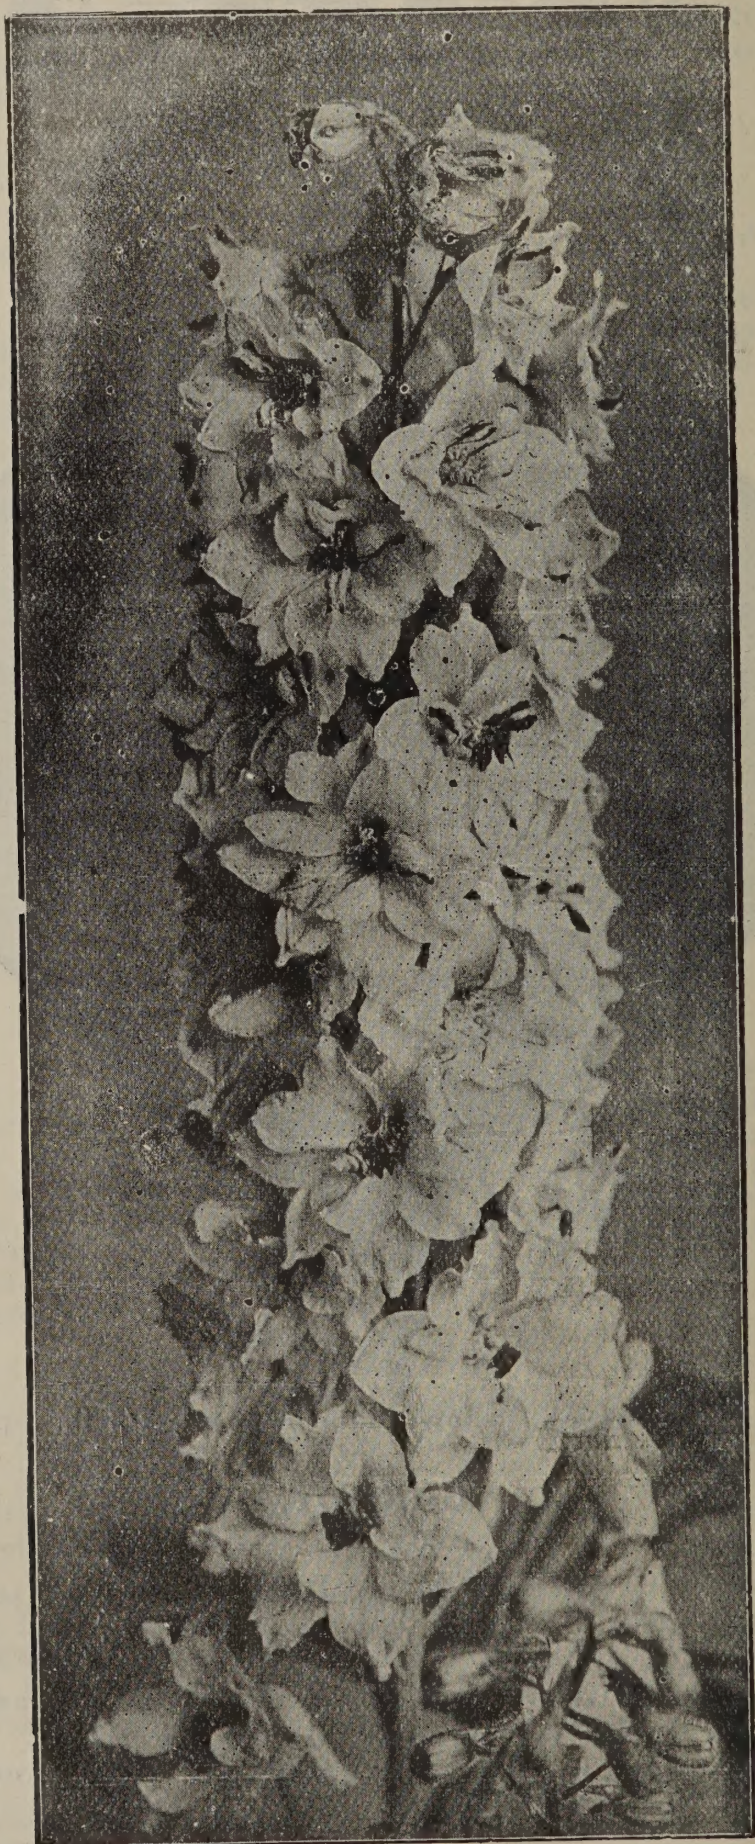

SELECTED SEED MAIZE.

Price on Application.

Hickory King.—A white seeded variety; quick growing.

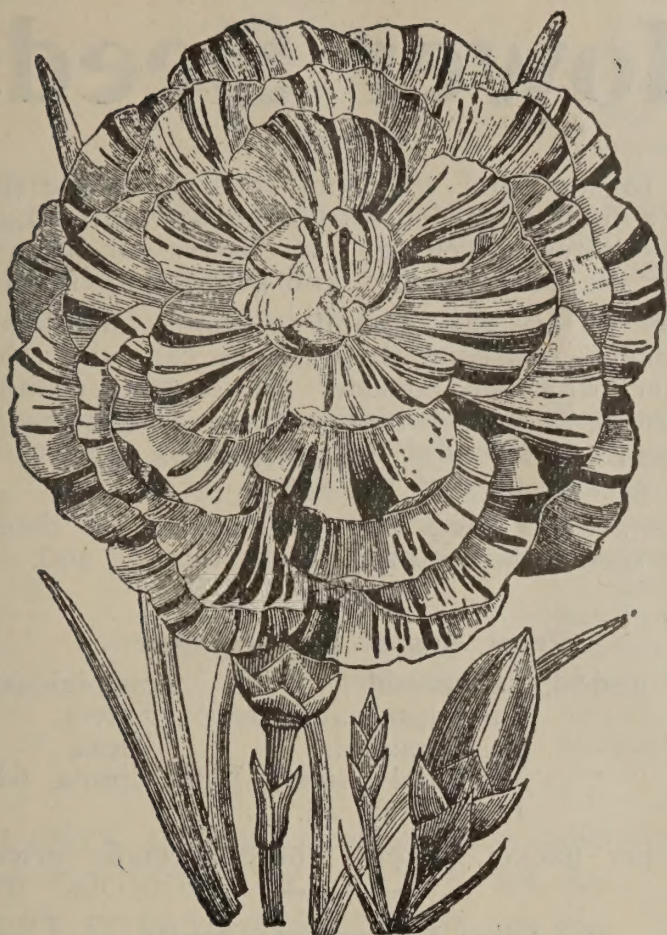

Funk's Yellow Dent.—A very early maize.

Ninety Day.—A well known variety. Early.

DELPHINIUM—6d. and 1/6 per pkt.

Our Latest Novelties in Carnations are unsurpassable.

Carnations and Picotees.

2/- and 2/6 packet.

We make a specialty of growing plants suitable for Bazaars, Fetes, &c., at specially reduced rates.

All Flower Seeds post free to all parts of the world.

Sweet Peas—Mixed, 3d. and 6d. per packet.

All Flower Seeds post free to all parts.

Flower Seeds.

What sort to sow, and what not to sow, is the problem. The gardener, with a limited garden-area, who attempts to grow anything and everything, wastes his energy; far better for him to concentrate on growing only the best varieties, and growing them to perfection.

Almost daily we are called upon to choose suitable collections of seeds for customers; consequently we have carefully selected, and are listing hereunder, what we consider the best all-round varieties for cultivation in the open border in this State, they being easy to grow, useful for cutting, and splendid for maintaining a succession of bloom throughout the greater part of the year.

Best results are obtained by treating most of them as Annuals, and sowing the seed in boxes of fairly rich sandy soil.

From August to November:

Amaranthus, 3d. and 9d.	Cockscomb	Salpiglossis, 3d.
Arctotis	Dahlia, 6d. and 1/-	Salvia
Aster	Hunnemannia	Vinca
Balsam	Marigold (African), 3d.	Zinnia, 6d. and 1/-
	Portulacca, 3d.	

6d. per packet, except where specially priced.

From February to April:

Anemone, 6d.	Foxglove	Nigella
Aquilegia, 6d.	Godetia	Pansy, 6d., 1/- and
Calliopsis	Iceland Poppy, 6d. &	2/- pkt.
Candytuft	1/-	Pentstemon, 6d.
Chrysanthemum	Larkspur	Petuna, 6d., 1/- and 2/-
Cineraria, 1/6	Leptosyne, 6d.	Pkt.
Cornflower	Lobelia, 6d.	Ranunculus, 6d.
Daisy, 6d.	Lupin (Pink Beauty)	Scabiosa
Delphinium, 6d. & 1/6	1/-	Shirley Poppy
Dimorphotheca	Marigold (French)	Sweet Pea, 6d. and 1/-
Forget-me-not	Nemesia, 6d.	Sweet William

3d. per packet, except where specially priced.

From August to November and February to April:

Antirrhinum	Gerbera Jamesoni, 1/6	Pyrethrum, 6d.
Canterbury Bell	Gillardia	Snapdragon
Carnation, 6d., 1/- and	Holyhock, 6d.	Stock, 6d.
1/6	Lupins	Sunflower
Cosmos	Mignonette	Verbena
Dianthus	Phlox	Wallflower
	Polyanthus, 6d.	

3d. per packet, except where specially priced.

Besides the above, we are fully stocked with New Season's Seeds of practically every Annual, Biennial and Perennial in cultivation, which we are retailing at very reasonable prices.

Choice Flower Seedlings.

These we grow in exceptionally large quantities, and always have a good collection suitable for any particular season of the year. The following sorts can be obtained from March to August.

Antirrhinum	Gaillardia, double	Phlox
Aquilegia	" single	Stock, 10 week, 1/6
Calliopsis	Golden Feather	doz.
Candytuft	Scabiosa	Sunflower

Sow Cineraria Seed not later than April.

Nurserymen, Seedsmen and Florists.

Canterbury Bells	Hollyhock, 1/6 doz.	Sweet Peas, best, 1/6 doz.
Chrysanthemums	Iceland Poppy	Sweet William
Annuals	Larkspur	Verbena, mixed, 1/6 doz.
Cornflower	Leptosyne	Verbena, Mammoth, 2/6 doz.
Cosmos	Lobelia	Wallflower, single
Daisy	Mignonette	Wallflower, double, 1/6 doz.
Delphinium, 2/6 doz.	Nigella	
Dianthus, Single	Pansy, mixed	
" Double	" best, 2/6 doz.	
Forget-me-not	Petunia	

1s. per doz., except where otherwise priced. Freight or postage extra.

The following Sorts can be obtained from September onwards:

Amaranthus	Gaillardias	Pyretherum
Arctotis	Hunnemannia, 2/- doz.	Salpiglossis, 1/6 doz.
Aster	Marigold, African	Scabiosa
Balsams	Marigold, French	Stocks, 10-week, 1/6 doz.
Carnations	Mignonette	Sunflower
Cockscomb	Phlox	Verbenas, 1/6 doz.
Cosmos	Portulacca, double, 1/6	Vinca, 1/6 doz.
Dahlias, single	" single	Zinnia, best, 1/6 doz.
Dianthus	Petunias	Snapdragons
Foxglove		

STRONG PLANTS, 1/- dozen, except where otherwise priced.

CAPE GOOSEBERRY PLANTS, 1/6 doz.

SWEET POTATO PLANTS, 1/6 per doz.

Ranunculus.—We have a beautiful strain. Price, 2/6 doz.

Anemone (St. Brigid).—A beautiful strain. Price, 2/6 doz.

Cineraria.—Acclimatised Seed. Sow during January and February, 1/6 packet.

Bazaars and Garden Fetes Supplied.

A verdant Lawn, a trim Hedge, a beautiful Flower Garden, a useful Vegetable Garden, and a profitable Fruit Garden.

are available to all who follow the directions given clearly and concisely in

The West Australian GARDENING GUIDE.

(Price, 1/- Post Free).

Celosia pyramidalis—6d. packet.

Carnations.

That the Perpetual Flowering Carnations of Western Australia are unrivalled for size, beauty, vigor of constitution and robustness of growth throughout Australasia is now accepted as an unassailable fact, and that our stock of the very best varieties procurable has brought to us practically the whole of the Carnation trade of the State is another. It is our ambition to maintain our reputation not only by keeping our stock up to its present high standard, but by improving it by every means possible, regardless of cost. To do this we have secured the most perfect of all the latest Western Australian varieties, as well as the pick of Messrs. Allwood Bros. English varieties, which we are submitting to our numerous clients this season as novelties. Messrs. Allwood Bros. are recognised as the most successful Carnation specialists in Europe.

Among our Novelties are some unsurpassable blooms, raised at our nurseries, by crossing the West Australian with the English varieties, and there is no reason why the practice should not be generally adopted, and Western Australia be famed for its carnations throughout the world. We have the soil, we have the climate, we have the stock, we have the ability, all we need is the desire.

Before sending out any new varieties, the plants undergo a severe test in the trial beds of our nurseries, all the weaklings and undesirables of every description being discarded.

English Carnations.

They are the best English Carnations to date, we have them established at our nurseries and they are doing well.

Price, 2/6 each; 24/- per doz.

Aviator.—Flower of medium size, brilliant scarlet at all seasons of the year.

Bona.—Flowers medium to large, of bright salmon-pink colour, nicely scented.

Brilliant, A.M., B.C.S.—Flowers of medium size, colour brilliant scarlet, as intense during winter as during summer.

Beta.—The chief attraction is the colour, which is of a most beautiful violet mauve, much deeper than Mikado.

Carola, A.N., R.H.F.—A well-known crimson, of exceptional merit.

Cupid, A.M., B.C.S.—A strong healthy-growing variety, with large flowers of light salmon-pink colour, good shape.

Delice, A.M., B.C.S.—Sport of "Enchantress," of light rose pink colour, distinct.

Destiny.—Flowers of medium size, colour deep rose pink, stem and calyx perfect.

Fancy Carola.—This is a new and distinct sport of the well-known "Carola." Colour of the flower is salmon-pink with numerous red stripes and splashes.

Iona.—Flowers large, of bright salmon-pink shade, pencilled and spotted with deep pink.

Jazz.—The flowers of this variety are of the most striking combination of colour, the ground being of light orange, heavily flaked with deep pink, of medium size.

Laddie, A.M., R.H.S., B.C.S.—Flowers are of good substance and exceptionally large, often exceeding 4ins. in diameter. Colour, light salmon-pink, stems very long and strong, calyx perfect.

Lady Northcliffe, F.C.C., B.C.S.—The flowers are of medium size, strongly scented, of an exquisite shade of light salmon-pink.

May Day, A.M., B.C.S.—Lovely shade of light pink, flowers round petalled. One of the most profitable and popular market varieties.

Mrs. Edward Douty, A.M., R.H.S.—Flowers of medium size, deep crimson during winter.

Sow Iceland Poppies from January to February.

- Mrs. Walter Hemus.**—A popular market variety. Flowers large, light pink, very free-flowering.
- Peerless.**—Flowers full, medium, deep rose cerise. Exceptionally large.
- Pink Sensation.**—Light rose pink, exceptionally large.
- Rose Sensation.**—Rose pink sport of the well-known "Pink Sensation."
- Saffron, A.M., B.C.S.**—A clear yellow sport of "Sunstar." The best yellow variety to date, unsurpassed for market and exhibition.
- Scarlet Glow.**—Flowers medium, very brilliant scarlet, variable in winter.
- Snowstorm, A.M., R.H.S.**—Large white Exhibition variety, sometimes tinged with pink. Strongly scented.
- Thor, A.M., R.H.S.**—A grand variety, with orange scarlet scented flowers, of excellent shape.
- Triumph, A.M., R.H.S.**—The flowers are fairly large, of bright crimson and excellent shape.
- Variegated Carola.**—A sport of "Carola." Colour is of a light purple pink, heavily striped with crimson.
- White May Day.**—Pure white re-selected sport of "May Day." An excellent market variety.
- Wivelsfield Apricot.**—Flowers fairly large, of good form and substance, colour light apricot, deeper towards the centre, with occasional deep pink markings.
- Wivelsfield Beauty.**—Pale yellow, pencilled and suffused pink, very free flowering.

Price—2/6 each; 24/- dozen.

**OUR LATEST NOVELTIES IN NEW CARNATIONS,
Raised at our Nursery. Proved worthy of Special Attention.
3/- each, 30/- dozen.**

- Donald.**—A robust growing pink of merit.
- Lionel.**—A splendid yellow with red pencilling. Flowers nicely built.
- Lily.**—Rose ground marked with blue. Good.
- Marion.**—Pale pink, flaked with scarlet; vigorous.
- Leslie.**—An exquisite purple maroon flowers, medium size, very distinct.
- Mary Lawrence.**—A very vigorous grower and profuse bloomer. Flowers right through the winter; colour, white ground, pencilled and edged with purple. Up to 4½ in. across.
- Primrose.**—A superb yellow of fine form, consistent. We gave this variety a severe test and can honestly recommend it. In our opinion the best yellow to date.
- Raymond.**—Robust yellow ground, marked with red.
- Sultan.**—A fine free-flowering maroon, very rich colour.
- W. Barry.**—Pink ground peppered with maroon, very novel; a good grower.

Australian Raised Varieties

RECENT INTRODUCTIONS—THE CREAM OF PERFECTION.

Price: 3/- each.

- Admiration.**—Yellow ground colour, edged and laced with scarlet. A lovely perpetual.
- Constance.**—Ground colour clear yellow, edged and lightly marked with carmine. Flowers large.
- Crimson Queen.**—Vivid Crimson Self, growth strong and prolific, flowers large and well-balanced.
- Croesus.**—A true perpetual yellow, of good substance and perfect form, growth vigorous.
- Crystal Queen.**—The most perfect pure white ever raised.
- Dainty Maid.**—An intensely pure white, with strongly defined pencilings of scarlet on each petal. Model flowers of good size and beauty.
- Delightful.**—Rich yellow ground colour, edged and heavily marked with bright carmine.
- Edenhope.**—A vast improvement on Happy Jack. Perfectly formed flowers of pure white ground colour, heavily striped with vivid pink.
- Fairy Queen.**—Ground colour yellow, heavily suffused with red salmon pink. Flowers very large, but somewhat too full in the spring.

Our Latest Novelties in Carnations are unsurpassable.

WILSON & JOHNS, 70 Barrack Street, Perth.

- Iolanthe.**—Beautiful yellow with a few streaks of pink. A majestic flower of exceptional size, borne on long, strong stems.
- Jo Janet.**—An ideal flower, with broad rounded petals, flaked and laced bright red.
- Leonie.**—A charming flower, of creamy yellow ground colour, edged and pencilled with bright pink.
- Lovelace.**—A model flower of creamy-white colour, laced with vivid pink.
- Marie Melrose.**—A full-sized, strong-stemmed flower, of perfect contour, the unique colours being old rose speckled with bright scarlet.
- Minerva.**—Yellow ground colour, edged and heavily marked with crimson, flowers of full size and perfect form.
- Modesty.**—A clear bright bloom, ground colour white, suffused with tints of blush-rose. A splendid utility flower.
- My Lady.**—Ground colour white, almost overlaid with rich maroon, the flowers being large, beautifully rounded and well built up.
- Nicko.**—Warm glowing crimson, exceptionally strong growth, immense flowers, borne on long stiff stems.
- Olivera.**—Creamy olive ground, colour shading off to a delightfully delicate blush-rose tint. Very distinct.
- Ruby.**—Salmon ground colour suffused with deep ruby. A decidedly new colour-break. Flowers very large.
- Salmonade.**—An admixture of yellow and salmon. Flowers of medium size but novel blends of colouring.
- Sweet Peggy.**—A brilliant flower with broad shell-shaped petals of white ground, heavily pencilled with bright-red. Growth perfect.
- The Lubra.**—Dark self-crimson, sturdy vigorous growth; flowers of good size and contour.
- Venus.**—An exquisite bloom of exceptional beauty; ground colour cream, daintily pencilled with bright pink.
- Vera.**—Flowers large and bold, ground colour white edged, and heavily laced with crimson.
- Vulcan.**—Bright crimson at base of petals, shading off to deep glossy crimson, growth vigorous, calyx perfect, flowers large.
- Your Choice.**—Ground colour white, lightly pencilled with pink; flowers of great size and substance.
- Zareba.**—Yellow ground, heavily marked with maroon, balance and contour perfect. A most consistent bloomer.
-

The following Australian raised varieties are a tip-top lot, which we can thoroughly recommend. Price, 2/6 each; 25/- doz.

- Alma Pulford.**—White ground, lightly edged and closely pencilled crushed strawberry.
- Blighty.**—Flowers large light pink, with a few flakes of crimson.
- Blue Bell.**—Pink ground, heavily overlaid lavender.
- Blanche.**—Yellow ground, heavily edged and marked bright crimson.
- Bushbee.**—An excellent variety, lightly edged and evenly marked crimson.
- Corona.**—A lovely white ground, perpetual and almost a picotee. Beautifully edged crimson.
- Coralina.**—A coral-pink variety, large smooth petals, strong perpetual habit and good.
- Corrigin.**—Dark scarlet, large full flowers. An attractive variety for garden, strong robust habit.
- Decorator.**—Colour pink ground, striped and marked rose-pink.
- Eudunda.**—A deep pink self, with large, almost smooth petals.
- Freedom.**—A very large pure white, with strong scent and serrated petals. One of the best for cutting.
- Goldfinch.**—Colour rich lemon yellow, with a few red and cerise flakes. Well-filled flowers.
-

Sow Cineraria Seed not later than April.

WILSON & JOHNS, 70 Barrack Street, Perth.

- Gosnells.**—Colour white ground, edged and marked purple.
- Harry Stone.**—White ground, distinctly edged and marked with bright purple.
- Kia Ora.**—Ground colour, silver, yellow marked and pencilled terracotta, strong perpetual habit.
- Lucy Cox.**—Yellow ground, edged distinctly and speckled with maroon purple.
- Molly.**—White ground, with a wire edge and a few markings of pink.
- Mrs. Martin.**—White ground, with a wire edge and speckled with carmine.
- Moral.**—A grand scarlet red, growth strong.
- Millie.**—Yellow, with a few flakes and marks of red; extra large.
- Miss Beaty.**—Yellow ground, edged and flecked with purple-maroon.
- Nellie Parker.**—Colour light ground, a few flakes and markings of crimson.
- One Dooke.**—A very beautiful variety, and one of the very best. Large flowers up to 3½ in. across. White ground, distinctly edged and marked with bright crimson.
- Ooldea.**—An excellent perpetual with large, full flowers, yellow ground.
- Petunia.**—Ground colour cream, heavily margined and laced dark purple.
- President.**—A beautiful flower of size and form, petals almost smooth. Colour, white, mottled cherry-red.
- Postal.**—A perfectly formed flower, of good size; colour, white ground, pencilled and marked with pink.
- Ringneck.**—Yellow ground, distinctly edged and marked terracotta. Well built flowers on long stems.
- Smoker.**—An extra large flower, colour, pink ground. As the blooms develop the colour changes to a smoky lavender.
- Sweet Alice.**—Colour, cream ground, evenly pencilled pink. Should be reserved for autumn and winter flowering.
- Swanston.**—Pale yellow, speckled and marked mauve.
- Sweetheart.**—A good grower, and blooms continually on good stems; colour, different shades, salmon, terracotta and flakes of crimson.
- Sadie Page.**—A refined, large pencilled flower, yellow ground, lightly but distinctly edged and pencilled bright scarlet.
- Starlight.**—White ground, marked and striped rose pink, not very large, but perfect, with large perpetual habit.
- Tom Wood.**—The colour, yellow ground, closely marked terracotta, of fair size, and the flowers always come good.
- Vie Viv.**—Yellow ground, few red marks, of good size and distinct from others. Circular, well-built flowers.
- Wahroonga.**—A good growing perpetual, with large yellow flowers, a few red marks.
- Wedgwood.**—A light ground, and quite distinct from any other. Large flowers with heavy petals, heavily laced and margined with crimson.
- White Cap.**—A good white, of show form. A seedling from May Day; but in every way a decided advance on that variety.
- Win Hook.**—White ground, a few pink lines, of good show form, and almost smooth petal.
- Zurana.**—This is a very pretty variety, with full flowers, good colour, rich lemon yellow, marked with cerise.

BAZAARS, FETES, ETC.

We make a speciality of growing plants suitable for Bazaars, Fetes, &c., and are in a position to supply them at specially reduced rates.

Remember the Best Seed is the Cheapest.

ALLWOODII CARNATIONS.

Raised by Messrs. Allwood Bros., Sussex, England.

The new race of hardy plants is Half Carnation and Half Pink, being a Hybrid between the Perpetual Flowering Carnation and the Hardy Garden Pink. We have thoroughly tested at our Nursery, and can recommend them. They are very easy to grow—they flower very freely all the winter, when flowers are scarce, and they have the perfume of the old Garden Pink. Price, 2/- each; 18/- per dozen.

Dorothy.—Deep rose magenta, with a rich dark centre. The petals are slightly fringed.

Harold, A.M., R.H.S.—A large double-white solid calyx, and the flower is symmetrical in form. The habit of growth is of a tall, free, hardy character. Its adaptability for garden decoration is unequalled by any other *Dianthus*.

Mary, A.M., R.H.S.—Pale rose pink, with bright maroon centre. A bold, full flower, smooth edged petals and compact in form, with exceptionally strong stem and calyx.

Ruby.—Light red maroon, with a deep tone of chocolate at the base of the petal. The growth is of a wiry nature, deep in colour, with crimson blotches at the base of the leaves and calyx. During the second and third year "Ruby" is seen to the best advantage.

Robert, A.M., R.H.S.—A delicate shade of rose magenta, with a light maroon centre. The flowers are very large and semi-double, with a rich perfume and sound calyx.

The following List of Carnations are not new, they are, however, first-class Varieties, to which we wish to draw special attention—

Carmel.—Bloom very large, with full rounded petals; white ground, heavily marked with maroon.

Elma.—Bloom very large and perfect form, a self pink of unique shade, sturdy of growth and free-flavouring.

Enchantress Supreme.—Very similar to Enchantress, slightly different shade, said to be a decided improvement on that variety.

Happy Jack.—A fine bold flower, the blooms being large, beautiful and perfect, the heavily fimbriated petals of white ground colour, being delicately shaded with markings of bright rosy-pink.

Highland Lassie.—White ground, picotee edged red. The flowers are of an exquisite form, like the best Border Carnation, with petals of wonderful depth and substance.

Lara.—A spring bloomer only, but well worth growing on account of the beautiful terra-cotta flowers.

Marjorie.—A fine bold flower of dazzling white ground colour, evenly pencilled with bright red.

Marechal Foch.—Our own raising. A beautiful flower; colour, yellow ground, striped light red, very distinct; good show flower.

Nancy.—Very large and of good habit. Similar in colour to Pink Randel, but very much larger and of better form.

Pink Pearl.—A beautiful bloom of soft living pink, large and of perfect form.

President.—An improvement on Prosperity, the growth stronger and the blooms larger.

Price's Red.—A large, clear, bright-red self, free-flowering and of good form.

Princess Mary.—A great strong plant bearing a wealth of beautiful bloom; colour, white ground prettily flaked with deep rich pink.

Ray Daglish.—A perfect bloom of great purity, white ground, delicately pencilled with rose. A show flower of exceptional merit.

Rosemond.—A very fine variety; colour, light red. Strong grower.

Rose Pink Enchantress.—A lovely soft pink sport from that grand variety Enchantress. It has all the good qualities of its parent.

Salmon Enchantress.—A duplicate of Enchantress in growth, freedom of flowering, size and formation; the only difference being in colour, which is a rich, deep shade of salmon pink.

Our Latest Novelties in Carnations are unsurpassable.

Salamander (D).—A lovely Carnation of the decorative type, with good size, prettily-shaped flowers, borne on stiff stems. The growth is strong and vigorous, and the calyx is perfect. Colour, a pleasing shade of salmon, between Enchantress Supreme and Salmon Enchantress.

Sunday.—A yellow ground variety, lightly striped. When well grown one of the best show flowers.

The Bride.—White ground, lightly tinted and pencilled with soft delicate pink. Growth exceptionally good.

White Freedom.—The best white to date. Habit perfect. Throughout the year it yields multitudes of full-sized dazzling white blooms.

PRICE, 2/- each; 18/- per doz.; except where priced.

The following List contains the Older Varieties—they are, nevertheless, all very good sorts:—

Young Rooted Plants, 1/- each; 10/- doz. October to May, in 5in. pots, 2/6 each, 18/- doz.

Arras.—A fine bloom of light ground edged and striped purple. A show of sturdy habit and true perennial type.

Alsace.—A very nice flower, coppery yellow, lightly splashed pink; very pretty.

Bullecourt.—A lovely smooth edged bloom, of show form, of deep crimson colour with a few white streaks; very distinct.

Ella.—An exceptionally fine bloom of white ground colour, delicately flaked with pink, the petals large and beautiful.

Florence Dodd.—An exceptionally free-flowering, purple or plum-coloured self.

Gallipoli.—An exceedingly fine bloom of light heliotrope ground colour, with deep heliotrope markings.

Enchantress.—Colour very pleasing shade of pink.

Jeanette Campbell.—An exquisite bloom, white ground, beautifully striped reddish carmine, very large and most prolific bloomer.

Kalgoorlie.—One of the largest Carnations ever raised, good show bloom of light pink ground, heavily marked with heliotrope. Habit of plant dwarf and very sturdy.

Lincoln.—A fine large rose-pink self, strong growing and very free-flowering; distinct.

Luck Wilson.—An excellent bloom of white ground colour, lightly striped with pink, the heavily fimbriated petals of this flower gives it a striking effect.

Mona.—Colour, cerise lake—one of the best.

Mikado.—A most unique colour, being a slaty heliotrope.

Mrs. John Wren.—A very large flower; white, evenly striped with bright pink, sweetly scented. One of the best.

Nellie Dunn.—White ground, finely and evenly pencilled red, liable to burst the calyx, but when this does not occur, the flowers are very beautiful.

New York.—One of the best; light cream ground edged and pencilled light red; good shaped flower and a good show bloom.

Pride of Perth.—A distinct and beautiful bloom of delicate pink ground colour; edged and slightly splashed magenta.

Prosperity.—Best of all. White ground splashed with pink; very free-bloomer.

Regina.—A large stately flower, white ground, almost completely overlaid rich crimson, non-burster; long stiff stems.

Sandstone.—A very fine show flower, of soft salmon-pink shade. A free-flowering and prolific bloomer.

Sabine.—A very beautiful variety, light pink ground with darker marking. A splendid sort.

The Scarpe.—A deep purple self, large and free-flowering. A splendid bloom to show.

Verdum.—A beautiful flower, colour, light ground, striped light purple. A fine show flower and very free.

Sow Iceland Poppies from January to February.

PETUNIA PLANTS.

Single Fringed and Double Varieties.

We have made a speciality of these and can offer a big range of colours. We propagate these from cuttings of stock plants kept specially for the purpose and labelled and can give you almost any colour. Plants in 3in. pots, 9d. each, 7/6 per doz. Freight extra.

DELPHINIUM.

Giant Victoria Strain.

This magnificent strain is undoubtedly the finest yet introduced, and is quite unsurpassed for quality of flower and variety of colours.

The flowers comprise many new and rich shades, including deep blue, exquisite and distinct shades of mauve, and delicate and charming colours of mauve-pink.

They are exceedingly free and vigorous, growing six to seven feet high. Individual spikes attain a length of from three to four feet. Nothing yet has been offered to equal this strain, and it should have a definite assured place in every garden. 1/6 packet.

ICELAND POPPY.

(Sunbeam Strain).

We have secured a very beautiful strain of this popular flower, containing a large number of lovely colours, including white, cream, yellow, orange (several shades), pink, red picotee and mottled varieties, with stems up to 2ft. long.

We planted out a large number of plants last April and they flowered from May to December, giving an immense number of blooms. They are very valuable flowers, as they do better during the winter months when flowers are scarce.

To keep flowers when cut it is necessary to plunge the ends of the stems in boiling water for a few minutes. Do not allow them to seed, otherwise they will finish flowering months before their time.

Selected Seed, 1/- per packet; Fine Mixed Strain, 6d. per packet.

GIANT GREGO ASTER.

A new strain, grown in Tasmania, of free sturdy growth and attaining a height of two feet, well branched, with long strong stems, flowers are exceptionally large, often over four inches across. They last long when cut, and resemble Chrysanthemums in size and shape. We strongly recommend these Giant Flowered Asters. We offer a mixture of colours—white, rose, lavender, pink, dark blue and crimson, or each separate. Each small packet, 6d.; larger packet, 1s.

GERALDTON WAX PLANT.

Newmaracarra.—A magnificent variety of these splendid Shrubs. The flowers are distinct from any other sort, being a deep red magenta colour. A favourite wherever seen. 3/6 each.

CINERARIA.

Wilson & Johns' Celebrated Acclimatised Strain.—The strain of Cineraria we are offering has been grown without any shade in open borders for the past five years, and has developed into a hardy class. This plant is very suitable for growing in open flower borders, in nice sheltered positions. To get the best result they should be sown in beds by themselves. Seed should be sown only from January 1st to end of March. It is useless sowing later. The beds should be well enriched with manure; put the plants about 18in. apart each way. When better known they will be grown by everyone. 1/6 packet.

THE PRICES IN THIS CATALOGUE ARE FOR HIGH CLASS SEEDS ONLY.

Strong Hardy Roses for the Garden is a Speciality.

Ornamental Trees and Shrubs.

For the guidance of those who may not have at their command the services of a professional gardener, we have described, as nearly as possible, the colours of the flowers and what height the plants may ultimately be expected to attain in this climate in favourable soils and situations. We may, however, remark that a great many Evergreens and Deciduous Shrubs may be kept to almost any required size by judicious pruning.

E.T. signifies Evergreen Tree; E.S., Evergreen Shrub;
D.T., Deciduous Tree; D.S., Deciduous Shrub.

Abution—(Chinese Lantern).

All the best plants. 1/6 each.

Acacia—

Silver leafed, the earlist flowering Acacia and one of the very best. 1/6 each.

E.S. BAILEYANA (Cootamundra Wattle). 15f., 1/- to 1/6. This is of a beautiful glaucous green, the flowers are globular, of a bright yellow colour, and produces in great profusion, is sure to become a general favourite.

E.T. PYCNANTHA (Golden Wattle)—1/- to 1/6 each; other varieties, 1/- to 1/6 each. Handsome Flowering Shrubs, with orange or yellow flowers; bloom early in spring.

E.T. PODALYRIAFOLIA (Queensland Wattle).—Silver leafed. The earliest flowering Acacia. One of the best. 1/6.

E.T. DECURRANS (Black Wattle).—Yellow, 20ft. 1/6.

E.T. DEALBATA (Silver Wattle).—Yellow, 20ft. 1/6.

Aclypha, Marginata (Fijian Fire Plant).—

4ft. A very handsome variegated plant, quite hardy and easy to grow. 2/- each.

BROWNII, E.S.—Foliage brown, red colour, edged lightly with yellow; hardy. 1/6.

Acmena—

E.S. PENDULA. 12ft. 1/6 each.—The Acmenas may be classed amongst the best of our Evergreen Shrubs; they are free, hardy, and of quick growth. Pendula is one of the finest Shrubs in cultivation.

Agonis—

E.T. FLEXUOSA. 30ft. 1/6 each.—A nice Evergreen weeping tree, very hardy, stands the heat and drought well.

Ailanthus—

D.T. GLANDULOSA. 20ft. 1/6 each.

Aloysia—

D.S. CITRIODORA (Lemon Scented Verbenia).—White, 6ft. 1/- each.

Arundinara (Bamboo)—

E.S. DONAX VARIEGATA (The variegated Bamboo). 12ft., 1/6 each.

Arduina (Cape Plum)—

E.S. GRANDIFLORA. White. 5ft., 1/6 each. A beautiful flowering, strongly scented like the Jasmine, and bearing fruit which, when ripe, has an agreeable sub-acid flavour.

Australian Lily (See Doryanthea).

Blue Marguerite (See Agathoea).

Boronia—

E.S. MEGASTIGMA. 3ft. 1/- to 3/6 each. A beautiful little plant, flowers coppery colour, with a most powerful lemon and violet scent. A great favourite. A desired plant for any garden.

Brachychiton—

E.T. ACERIFOLIUM (The Flame Tree), Scarlet. 20ft. 2/- each. This tree is a native of New South Wales, and there known as the Illawarra Flame Tree. It is of a fine sturdy pyramid growth, with a large handsome foliage. A good specimen in flower, makes a grand effect among other trees.

Buddlea—

E. VEITCHIANA. Bright violet. Spikes, 1/6.

GLOBOSE. Orange. 1/6.

Remember the Best Seed is the Cheapest.

Nurserymen, Seedsmen and Florists.

Brugmansia (The Trumpet Flower)—

E.S. KNIGHTII. Semi-double white, 6ft.; 1/6 each. A very handsome flowering Shrub, producing very large pendulous flowers, having a beautiful perfume.

Camalauceum Uncinatum—

E.S. 6ft. Known as the Geraldton Wax Plant, it being a native of near Geraldton. One of the best shrubs flowering freely during the winter and on that account valuable as a cut flower. Grows well in sandy soil, and should be in every garden. White, light and dark pink, 2/6 each; Newmarracarra (red), 3/6 each.

Camellias—

We have a splendid collection of these beautiful hardy plants. Strong plants, 3/6 to 5/- each.

Camphora—

E.S. OFFICINALIS, 20ft. 1/6 to 2/- each. This plant produces the Camphor of commerce.

Canna—

A fine collection. (See Special List). 1/6 each.

Cassia—

E.S. CORYMBOSA. Yellow, 6ft. 1/6 each.

E.S. FLORIBUNDA. Yellow, 10ft. 1/6 each.

Fine flowering Shrubs, for hot, dry districts.

Callistemon (Bottle Brush)—

Evergreen trees, producing flowers like a bottle brush. Coccinea, scarlet, 1/6.

Ceanothus—

E.S. DIVARICATUS. Blue. 12ft. 1/6 each.

E.S. FLORIBUNDUS. Blue. 12ft. 1/6 each.

Very handsome flowering Shrubs, of quick growth and very hardy.

Ceratonia—

E.T. SILIQUA (The Locust Tree of Scriptures, St. John's Bread). Yellow, 15ft. 1/6 each. A fine tree for hot climates.

Chrysanthemum (White Marguerite)—

E.S. FRUTESCENS GRANDIFLORUM. Fl. pl. (Double Marguerite). 4ft. 1/- each.

Clethra (Lily of the Valley Tree)—

E.S. ARBOREA. White, 8ft. 1/6 to 2/-. A splendid Evergreen Shrub, of compact growth, bearing racemes of pure white flowers, similar to Lily of the Valley, and quite hardy. A magnificent Shrub.

Clianthus—

E.S. PUNICEUS (The Glory Pea) ;5ft. 1/- to 2/- each. Bright Scarlet; very shown.

E.S. PUNICEUS ALBA. White; 5ft. 2/- each. Very useful plants for training against unsightly fences, being semi-scandant.

Coprosma—

F.S. BAUERIANA PICTURATA. 6ft. 2/- each

F.S. BAUERIANA VARIEGATA. 4ft. 2/- each.

B.S. LUCIDA. 6ft. 1/- to 1/6 each.

Handsome Evergreen Shrubs, with bright shining leaves. Baue-
riana Variegata and Picturata are most beautiful variegated
Shrubs.

Coral Plant (See Erythrina).

Crimson Flowered Gum (See Eucalyptus ficifolia).

Daphne—

E.S. INDICA RUBRA. Red and white, deliciously scented. 2ft. 3/6 to 5/- each.—The best of all the Daphnes; fine little Shrubs, highly fragrant flowers. Great favourites.

Datura—

Large trumpet shaped flowers. D.S. Suaveolens; white, sweetly scented. 5ft. 2/-.

Deutzia—

D.S. GRENATA CANDISSIMA FLORA PLENA. Semi-double flowers. White. 6ft. 2/- each.

D.S. GRACILIS. White; 6ft. 2/- each. A beautiful little plant, blooming early in spring, with masses of white flowers. A great favourite.

Roses on our New Stock cannot fail anywhere.

Diosma—

E.S. ALBA (Ericoides); 2ft. 1/6 each. A neat little plant with scented foliage and white flowers.

Doryanthes—

E.S. EXCELSA (The Australian Gigantic Lily); 6ft. 2/- each.

E.S. PALMERI. Red and white; 8ft. 2/- each.

A very effective plant when in flower.

Dracæna—

E.S. AUSTRALIS (Sticta); 10ft. 1/6 each.

E.S. DRACO (Dragon Tree); 10ft. 1/6 each.

E.S. NUTANS; 10ft. 1/6 each.

Palm-like trees, very graceful, invaluable for landscape gardening; plants grow in pots, for the decoration of halls, balconies, etc. 2/- to 5/- each.

Duranta—

E.S. ALBA. White; 6ft. 1/6 each.

E.S. PLUMIERI. Blue; 12ft. 1/6 each.

Very handsome and beautiful free-flowering Shrubs, remaining in bloom the greater part of the summer and autumn.

Erythrina (Coral Plant)—

D.S. COMPACTA. Crimson; 4ft. 2/- each.

D.T. CHRISTA-GALLI. Scarlet; 8ft. 2/- each.

Very beautiful deciduous Shrubs, producing large spikes of brilliant coloured flowers. Compacta is a beautiful variety, and should be in every garden. It is one of the most gorgeous summer Shrubs yet introduced.

E.S. CAMDENII. Best of the dwarf Erythrinæ; deep crimson, 6ft. 2/- each.

Escallonia—

E.S. MONTEVIDIENSIS; 8ft. 2/- each.

This is a very hardy Evergreen Flowering Shrub; the flowers are pure white, producing freely in bunches during February, when the flowers are very scarce.

E.S. SANGUINEA. Red; 8ft. 2/- each.

Euonymus—

E.S. ALBUS YATIFOLIUS ELEGANS; 4ft. 1/6 each.

E.S. ARCENTEUS VARIEGATUS; 8ft. 1/6 each.

E.S. RADICANS VARIEGATUS; 5ft. 1/6 each.

Beautiful hardy Evergreens, with ornamental foliage.

Eucalyptus—

E.T. CITRIODORA (Lemon-scented Gum). 1/6 each.

The pleasant fragrance of the foliage of this plant renders it a most desirable acquisition. The strong lemon scent which is omitted when the leaves are gently rubbed is equally powerful and agreeable with that of lemon-scented verbenæ (Aloysia citriodora).

E.T. CORYNOCALYX (Sugar Gum); 30ft. to 40ft. 1/- each; 6/- to 9/- doz.

E.T. COMPHOCEPHALUM. (Tuart Gum). A magnificent Evergreen Tree of very rapid growth; makes a fine shade; splendid for avenues; 30ft. 1/- each; 9/- doz.

E.T. FICIFLORA (Crimson Flowered Eucalyptus); 15ft. 1/6 to 2/6 each.

One of the most beautiful Trees we ever sent out; flowers of various crimson shades, which are produced well above the foliage. When in bloom this is one of the most effective plants in cultivation, and we can highly recommend it.

E.T. GLOBULUS (Tasmanian Blue Gum); 200 ft. to 250ft. 1/- each; 9/- doz.

E.S. MACROCARPA. A native of West Australia of rather straggling habit. The leaves are of a silver nature and the flowers scarlet. Very attractive. 2/6 each.

Eulaila—

E.S. JAPONICA ZEBRINA; 3ft. 1/6 each.

E.S. JAPONICA ALBA-LINEATA; 3ft. 1/6 each.

Euphorbia—

E.S. SPLENDENS. Scarlet; 3ft. 1/6 and 2/- each.

A very pretty flowering plant, with neat brilliant scarlet flowers, admirably adapted for button-holes and dress flowers, will grow in any dry situation.

Remember the Best Seed is the Cheapest.

Nurserymen, Seedsmen and Florists.

Ficus—

E.T. AUSTRALIS, 40ft.; 2/- each.

E.T. MACROPHYLLA (Moreton Bay Fig); 40ft. 1/6 to 2/- each.

Australis and Macrophylla are fine Evergreen Trees, and most excellent for shelter. They are quite hardy around Perth, but in districts experiencing very sharp frosts they should be sheltered for a season until they get well established.

Fugosia—

E.T. PATERSONII. Pink; 20ft. 1/6 each.

Very handsome flowering Shrub, of fine pyramidal habit, very hardy, one of the finest Shrubs we possess.

Gardenia—

E.S. THURNBERGI. White; 6ft. 2/- each.

Beautiful Shrubs. with bright glossy foliage and handsome flowers, deliciously scented, they require a warm situation to expand their flowers.

Garrva—

E.S. ELLIPTICA. Green; 6ft. 2/6. Very ornamental Shrub, with bright green foliage, bears long green catkins, which have a very graceful appearance.

Geraldton Wax Plant (See Camalauceum)—

Genista—

E.S. ANDREANA. Crimson and yellow; 5ft. 1/6 each.

E.S. FRAGRANS. Hardy Shrub, with a mass of fragrant yellow flowers; 3ft. 1/6 each.

Grevillea—

E.T. ROBUSTA (The Silky Oak). Orange; 40ft. 2/- each.

G. Robusta is a fine tree, grows very rapidly, stands the heat and drought well, very hardy, and is well adapted for any kind of ornamental planting, avenues, etc.

E.S. HILLII. Bright red. Beautiful shrub; 6ft. 2/-

Guava (See Psidium).

Guelder Rose or Snowball Tree (See Viburnum).

Gynerium—

E.S. ARGENTEUM (Pampas Grass). White, with long feathery plumes; 6ft. 1/6 each.

E.S. ROSEUM (Rose-coloured) Pampas Grass); 6ft. 1/6 each.

Habrothamnus—

E.S. ELEGANS. Red; 4ft. 1/6. Clusters of tubular flowers, borne on terminal shoots. Flowers right through winter when these are scarce.

Heliotropium—

E.S. PRESIDENT GARFIELD. Bright mauve purple, large trusses; 3ft. 1/- each.

E.S. WHITE LADY. Lavender white, under glass pure white; 3ft. 1/- each.

Hibiscus—

PEACHBLOW. A beautiful double pink variety. 2/6.

E.S. LAMBERTII. Double crimson; 5ft. 1/6 each.

E.S. SPLENDENS. Rose. 1/6 each.

Hibiscus ranks among our very best flowering Shrubs, and fulfil so many requirements of the flower garden, and as they are so thoroughly adapted to our climate, they can be safely recommended.

E.S. PEDUNCULATUS. A very pretty Hibiscus of erect branching habit, with hairy stem and showy flowers, the petals blush or rose coloured. 2/- each.

E.S. PINK SPLENDENS. This is a native of W.A. and a beautiful plant; flowers freely throughout the hot summer. Highly recommended, 2/- each.

Hydrangea—

D.S. HORTENSIS. Pink and blue, sometimes on the same plant; 3ft. 1/- to 1/6 each.

D.S. THOMAS HOGG. 1/6 each. Flowers white, large trusses. These fine old favourites do best in shady situations, and require plenty of water during the dry weather. They also make capital decorative plants for conservatories, verandahs, etc.

Special Quotations for large quantities of Farm Seeds.

WILSON & JOHNS, 70 Barrack Street, Perth.

Hypericum—

E.S. MOSERIANUM. Hardy Evergreen Shrub. Yellow. 1/6.

Ilex—

E.S. AQUIFOLIUM (Common English Holly). 15ft. 1/6 each.

Japanese Pepper—

Fine ornamental tree, making thicker shade than the ordinary variety, with cleaner habit; 15ft. 1/6.

Jacaranda—

D.T. MIMOSAEFOLIA. Lilac. 1/6 to 2/- each.

A handsome Shrub or small Tree, with mimosa-like foliage and magnificent flowers.

Jasminum—

E.S. FRUTICANS. Yellow; 6ft. 2/- each.

E.S. GRANDIFLORUM. White; 6ft. 2/-

All the Jasminum are favourites, Grandiflorum is a beautiful flowering Shrub, with a most delicious perfume; can be trained either for climber or a shrub. Fruticans is a well-known yellow Jasmine.

E. PIOCOCUM. A large star-shaped single variety. 2/6.

E. FLORE PLENO. A double white variety. 2/- each.

Justicia—

E.S. CARNEA. Pink; 4ft. 1/6 each.

Lasiandra (South America)—

E.S. A beautiful Shrub, hardy and free-flowering. 1/6 each.

Lagerstroemia—

D.S. INDICA. Pink; 8ft. 2/-. Free-flowering Shrubs.

Laurestinus (See Viburnum).

Lavandula—

E. SPIGA (Common Lavender); 1ft. 6d.

E. STAECHAS (French Lavender); 2ft. 1/- each.

Lemon Scented Verbena (See Aloysia citriodora)—

Leucadendron (The Cape of Good Hope Silver Tree)—

D.S. ARGEMTEUM; 12ft. 3/6 each.

A most beautiful and distinct Shrub, leaves 6ins. to 8ins. long, and when fully developed shine as if frosted with silver. A very effective Shrub and worthy of a place in the most select collections.

Leptospermum—

E. NICHOLII. Crimson; 6ft. Pretty Shrubs, small dark foliage, covered with crimson flowers. 1/6.

Ligistrum—

E. SINENSIS. A beautiful and flowering Shrub. 2/- each.

Ligistrum (Japan)—

E.S. JAPONICUM (Japan Privet). White, 8ft. 1/6 each.

E .S. JAPONICUM VARIEGATUM; 6ft. 2/-

Very hardy Evergreen Shrubs.

Marguerite (See Chrysanthemum futescens grandiflora).

Moreton Bay Fig (See Ficus).

Melianthus (Honey Flower) Cape of Good Hope—

E.S. MAJOR. Brown; 8ft. 2/- A fine hardy, easily-grown Shrub; silvery foliage.

Magnolia—

E.S. GRANDIFLORA. White; very large flowers; 20ft. 2/6 to 5/- each. Handsome flowering plants, and beautifully scented. Grandiflora is the gem of the species. Remarkable for its immense blooms, very hardy.

Mackaya—

E.S. BELLA. Lilac; 2ft. 1/6 each.

Melia (White Cedar) E. Indies—

D.T. AZEDARACH; 30ft. 1/6 each.

Myrtus—

E.S. COMMUNIS (The Common Myrtle). White; 6ft. 1/- to 1/6 each.

E.S. COMMUNIS FLORE PLENO (Double-flowering Myrtle); 5ft. 2/- each.

Nerium (Oleander)—

E.S. ALBUM PLENUM. Semi-double white. 5ft. 1/6 each.

Special Quotations for large quantities of Farm Seeds.

Nurserymen, Seedsmen and Florists.

E.S. LUTEUM PLENUM. A semi-double variety of well-known Oleanderi. 6ft. 1/6 each.

The flowers are of a creamy-yellow, and very free-flowering, quite a distinct colour in this class of plants.

E.S. MADAME MARTIN. Beautiful clear Salmon-colour, changing rosy-salmon, distinct and fine; 6ft. 1/6 each.

E.S. MONSIEUR BELAGIER. Flowers pink, compact growing variety, very free-flowering; 5ft. 1/6 each.

E.S. PROFESSOR MARTIN. Crimson, habit dwarf and compact; 5ft. 1/6 each.

E.S. SPLENDENS. Double Pink; 6ft. 1/6 each.

E.S. SPLENDENS VARIEGATUM. The variegated leaved Nerium; 6ft. 2/- each.

Neriums or Oleanderi, the names these plants are most commonly known by, are very beautiful, and, without hesitation we class them among the best and hardiest of summer-flowering Shrubs; they stand the heat and drought of our climate with impunity. We have them now in various shades and colours—pink, white, salmon and crimson.

Nandina (Japan)—

E.S. DOMESTICA; 6ft. 2/6 each. The sacred Bamboo of Japan, with handsome green and brown foliage.

Ochnia—

E. MULIFLORA. Yellow; profuse flowerer, fragrant; 3ft. 1/6.

Oriental Plane (See Plantanus).

Pampas Grass (See Gynerium).

Pavonia—

E.S. COCCINEA. Bright scarlet Hibiscus-like Shrub; 4ft. 1/6.

Pepper Tree (See Schinus Molle).

Philadelphus (Mock Orange)—

D.S. SPECIOSA. White; 6ft. 1/6 each. A very beautiful deciduous flowering Shrub, blooming early in spring; flowers sweetly-scented and admirably adapted for bouquets. Suitable for any garden.

Phormium—

E.S. TENAX; 6ft. 2/- each.

E.S. TENAX VARIEGATA; 6ft. 2/- each.
Variegated New Zealand Flax.

Pittosporium—

E.S. TOBIRA. White; 6ft. 2/- each.

E.S. UNDULATUM. White; 15ft. 1/6 each.

Polygala (Cape of Good Hope)—

E.S. GRANDIS. Purple; 6ft. 2/- each.

E.S. SPECIOSA. Purple; 8ft. 1/6 each.

Pomegranate (See Punica).

Populus (The Popular)—

D.T. ALBA. (Silver Popular); 50ft. 1/6.

Poinciana Gilliesii (Bird of Paradise)—

D. Yellow and crimson; very beautiful; 25ft. 2/6.

Platanus—

D.T. ACERIFLORIA (Oriental Plane). A fine ornamental tree, with large broad leaves. 40ft. 2/6 each.

Peppermint Tree (See Agouis).

Plumbago—

E.S. CAPENSIS. Lavender; 4ft. 1/6.

E.S. CAPENSIS ALBA; 4ft. 1/6 each.

Capensis Alba is a sport from the old Plumbago Capensis, producing white flowers.

Plumeria—

E.S. ACUMINATA (Frangipanni). A very good Shrub, having large green leaves and yellow flowers; sweetly scented; 10ft. 3/6 each.

Podalyria—

E.S. STYRACIFOLIA. Pink; 8ft. 1/6 each. A very hardy and effective spring Flowering Shrub, with pale pink flowers.

Special Quotations for large quantities of Farm Seeds.

WILSON & JOHNS, 70 Barrack Street, Perth.

Poinsettia—

PULCHERRIMA. Scarlet flowers of large leaflet form. Does best in warm situation; 6ft. 2/- to 3/6.

Psidium—

E.S. CATTLEYANUM (Purple Guava); 6ft. 1/6 each. Produces an abundance of edible berries, which make the most delicious preserve. It is also a very fine little Evergreen Shrub.

Punica (Pomegranate)—

D.S. GRANATUM. Single scarlet; 8ft. 1/6 each.

D.S. NANA FLORE PLENO; 2ft. 1/6 each.

A dwarf-growing variety, producing bright, double scarlet flowers.

Rhamnus (Buckthorn), South Europe—

E.S. ALATERNUS. Green; 10ft. 1/6.

E.S. ALATERNUS VARIEGATA; 20ft. 1/6.

A good Evergreen Shrub, with variegated leaves.

Raphiolepis—

E.S. OVATA. White. Highly scented; 5ft. 1/6 each. A fine hardy Shrub, with dark shining leaves, and long spikes of white flowers, which are beautifully scented. A nice little Shrub for small gardens.

Romney (The Giant Californian Poppy)—

E.S. COULTERII; 6ft. 2/-. White and yellow anthers, very handsome.

Rosemarinus—

E.S. OFFICINALIS (Com. Rosmary); 2ft. 1/- each.

Salvia—

E.S. HOVEYI. Dark purplish blue; 5ft. 1/- each.

E.S. SPLENDENS. Scarlet; 3ft. 1/- each.

Sambucus (The Elderberry)—

D.T. ARGENTEA VARIEGATA; 12ft. 1/6 each.

D.T. NIGRA; 12ft. 1/- each.

Schinus (Pepper Tree)—

E.S. MOLLE. Green; 30ft. 1/- to 1/6 each.

Sparmannia—

E.S. AFRICANA FLORE PLENO; 15ft. 2/- each.

Spartium—

E.S. ALBUM (White Broom); 8ft. 1/6 each.

E.S. JUNCHEUM (Yellow Spanish Broom); 10ft. 1/6.

Junceum (Yellow Spanish Bloom); 10ft. 1/6.

Junceum is the beautiful yellow bloom that blooms so profusely in the spring; very hardy.

Spiræa—

D.S. ANTHONY WATERER; 3ft. 1/6 each. One of the finest dark-flowering Spiræas yet introduced. The colour is a rich crimson, and the plant is very hardy and vigorous.

D.S. GRANDIFLORA (Snowbush). White; 8ft. 2/6 each.

D.S. PRUNIFLORA Fl. pl., double white, 4ft. 1/- each.

D.S. REEVESIANA Fl. pl., double white; 4ft. 1/6 each.

Very handsome flowering Shrubs, blooming early in spring. Grandiflora produces pure white flowers as large as a two-shilling piece, and is a grand spring flowering plant. It is sometimes called the Snowbush. Reevesiana, fl. pl., is a fine double-flowering variety.

Statice (See Lavender)—

E.S. DICKSONI. Pink; 2ft. 2/-.

E.S. MACROPHYLLA. Blue and white; 2ft. 2/-.

Swainsonia—

E.S. ALBA. White; 3ft. 2/- each.

E.E. OSBORNEI. Various; 3ft. 1/6 each.

Very pretty flowering Shrubs.

All Flower Seeds post free to all parts.

Nurserymen, Seedsmen and Florists.

Sterculia Deversifolia—

E.T. KURRAGONG. A splendid tree for hot climates; a standby for droughty seasons, as stock eat it readily. 1/6.

Sweet Flowering Pittosporum (See *Pittosporum undulatum*).

Sweet Scented Boronia (See *Boronia megastigma*).

Syringa (The Lilac)—

D.S. VULGARIS (Common Lilac). 2/- each,

D.S. VULGARIS ALBA. White; 8ft. 2/-.

Strelitzia (Birds tongue flower)—

E. REGINA. Blue and orange. Dark green leathery foliage; the flowers are curiously shaped and interesting. 5/-.

Tamarix—

D.S. CALLICA (Flowering Cyprus). Pink; 12ft. 1/6 each. A very hardy tree for planting near the sea coast, or very exposed situations.

Tecoma—

E.S. CAPENSIS. Scarlet; 6ft. 1/6 each.

E.S. GRANDIFLORA. Orange; 6ft. 2/- each.

E.S. GUILFOYLEI; 6ft. 2/- each.

Similar in habit and growth to the well-known variety called "Grandiflora," the flowers are quite as large, of a dark red colour, quite distinct; very free-flowering.

E.S. SMITHII; 5ft. 1/6 each. Orange yellow, with brown markings.

E.S. VELUTINA. Yellow; 5ft. 1/6.

Tristia (*Lophostemon*)—

E.S. AUSTRALIS. White; 30ft. 1/6 each. A very quick-growing Evergreen Tree with broad foliage; useful for shelter.

Trumpet Flower (See *Brugmansia*)—

Vitex (*Trifolia*)—

A beautiful hardy variegated Shrub. 2/-

Veronica—

E.S. ANDERSONII. Blue; 3ft. 1/- each.

E.S. IMPERALIS; 3ft. 1/6 each. Brilliant amaranth red, changing to magenta.

E.S. PARNIFLORA. White; 3ft. 1/- each.

E.S. SALICIFLORA; 3ft. 1/- each.

Pretty little flowering Shrubs, of very compact habit and as they bear cutting in well, can be kept to any required size.

Viburnum—

D.S. OPOLUS (Guelder Rose or Snowball Tree). White; 10ft. 2/6 each.

E.S. SIEBOLDII. White; 4ft. 1/6 each.

E.S. TINUS (Laurestinus); 6ft. 1/- to 2/- each.

Splendid evergreen Shrubs, very hardy. The Laurestinus is one of the finest winter flowering shrubs we possess; it also makes a fine ornamental hedge, giving an abundance of bloom at a season when flowers of all kinds are scarce. The Guelder Rose or Snowball Tree is one of the most effective spring flowering shrubs we have, producing large heads of round, pure white flowers, resembling a snowball. A large bush of this has a grand effect.

Yucca—

E.S. ALOEFOLIA. Cream colour; 8ft. 1/6 each.

E.S. GLORIOSA. White; 8ft. 1/6 each.

E.S. RECURVATA. Cream; 6ft. 2/- each.

Very hardy and excellent plants, suitable either for single specimens on lawns, for the shrubbery or rookery. Gloriosa produces immense spikes of creamy-white flowers.

Use only Wilson & Johns' Reliable Seeds: they give results.

NOVELTIES.

NEW AND RARE PLANTS.

Lasiandra.

E.S. Edwardsii.—The blooms are a beautiful violet colour. 2/-.

Crotalaria Cunninghamii.

(Green Bird Flower).

E.S.—A native and rare plant from the North West of Australia. Flowers are green colour and yellow. In shape very much resemble a bird. Does best in warm situation. 5/- each.

Sesbania Tripetii.

(Brizilian Glory Pea).

A magnificent flowering shrub, native of Brazil and Argentine. A shapely shrub growing with very graceful mimosa like foliage. Its flowering season lasts from October to March. The flowers grow in bunches of a delightful shade of orange, scarlet or tango. Flowers year after planting. Price, 2/6.

New Poppy.

(Wilson's Hybrids).

A new single Poppy of special merit and very novel. Combines all shades of pink, rose, red, salmon, while numbers of the flowers are edged with bands of varying width, most of red shade. Very attractive and decorative. Seed limited. 1/- per pkt.

NEW CLIMBERS.

Bouganvillea.

E. Rosea.—A new rose coloured variety of these popular creepers. Very fine. Limited stock. 5/- each.

E. Lateritia (Brick Red).—Another new variety of the *Bouganvillea*. Very scarce. 7/6 each.

THUMBERGIA.

E. Gibsonii (Golden Glory Creeper).—Bright orange yellow flowers. A beautiful creeper. 2/6.

NEW FERN.

Asparagus Falcata.

E.—A splendid new fern of the *Asparagus* family of robust growth. It has leaves about 3in. long and $\frac{1}{2}$ in. wide, instead of foliage like the ordinary fern. Leaves dark shiny green; very attractive. 5/- each. Stock very limited.

Delphinium—6d. per pkt.

Climbing and Twining Plants.

For covering unsightly fences, arbours, training up verandah pillars, and other similar purposes, these plants are altogether indispensable. Several of the varieties are admirably adapted for training up poles in the shrubbery, and if a little care is bestowed on them, will produce a most beautiful effect among other plants. E., Evergreen. D., Deciduous.

Allamanda—

E. WARDLYANA. A magnificent climber, having bunches of large yellow flowers. 2/6.

Ampelopsis (Virginian Creepers)—

D. HEDERACEA. 1/6 each.

D. VIETCHII. 2/- each.

Handsome creepers for any position. The leaves are a fresh lively green throughout the summer, and change to bright

Special Quotations for large quantities of Farm Seeds.

Nurserymen, Seedsmen and Florists.

red in autumn, just before falling. Hederacea is best suited for trellis climbing, the other species cling to wood or other building material on their own accord.

Antigonon (Mexican Rose)—

- E. LEPTOPIUS. Pink. 1/6. A beautiful creeper.

Asparagus—

- E. PLUMOSUS NANUS. 1/- to 10/- each.
- E. SPRENGERI. 1/6 each.

A beautiful plant for hanging baskets.

Aristolochia (Dutchman's Pipe)—

- E. A peculiar and attractive flower resembling a pipe from whence it gets its name. 1/6 each.

Bignonia (Tecoma)—

- E. AUSTRALIS. Cream and brown. 1/6 each.
- E. JASMINOIDES. Purple and white. 1/6 each.
- E. LINDLEYANA. Lilac. 1/6 each.
- E. MACKENI. 1/6 to 2/6 each.

Mackeni is also a grand evergreen climber, and in habit and growth very much resembles Bignonia Rosea; but the flowers are more veined and much deeper in colour.

- E. ROSEA. 2/- each. A remarkably handsome climber, imported from South Africa, bearing racemes of flowers from three to four feet in length, of a rose-lilac colour. One of the finest climbers for our climate yet introduced.
- E. VENUSTA. Orange. 2/- each. Beautiful hardy climbers, with trumpet-shaped flowers, Jasminoides; when trained to a pole, makes a fine plant for the shrubbery.

Bougainvillea—

- E. BRAISLIENSIS. Dark rose, best. 2/6 each
- E. GLABRA SANDERIANA. Majenta. 1/6.
- E. INTERMEDIA. Rose-mauve. 2/- each.
- E. MAGNIFICA (variety Traili). 2/6 each.

This striking variety was introduced from the Seychelles. Its bright purple braces are produced in great profusion during the summer and autumn months. We can confidently recommend this variety as one of the best.

- E. SPLENDENS. Dark majenta. 2/- each.
- E. SPECIOSA VARIGATA. Silver variegated leaf variety. Pretty flowers; majenta. 2/-.

Canavallia—

- E. BONARIENSIS. 2/- each. The plant has hardly an equal in extent or thickness of growth, or beauty of foliage; its leaves are large and of a brilliant shining green, with bright purplish red spikes of pea-like flowers.

Clematis of Sorts—

- Plants of these beautiful climbers. 2/6 each.

Clerodendron—

- E. BALFOURI. Splendid twining plant, having large clusters of red and white flowers. 2/-.

Cobœa—

- E. SCANDENS. Dark purple. 1/6 each.
- E. SCANDENS ALBA. White. 1/6 each.

This is one of the best creepers, and very suitable for covering a trellis; it grows freely, has a fine foliage, and an abundance of bloom.

Dolichos—

- E. LIGNOSUS. 1/- each. Very useful perennial climber; flowers rosy-purple, produced in bunches and very numerous.
- E. LIGNOSUS ALBA. Very handsome, pure white flowers. 1/- each.

Ficus—

- E. STIPULATA (Climbing Fig). Will adhere to wood or brick-work. 1/6 each.

Hardenbergia—

- E. DIGITATA. Purple. 1/6 each.
 - E. MONOPHYLLA. Purple. 1/6 each.
 - E. MONOPHYLLA ALBA. White. 1/6 each.
- Exceedingly pretty climbing plants.

Sow Iceland Poppies from January to February.

WILSON & JOHNS, 70 Barrack Street, Perth.

Hedera (Ivy)—

- ELEGANS. 1/6 to 2/-. Small green leaves variegated with white.
E. ELEGANTISSIMA. 1/6 to 2/- each. A pretty compact-growing variety, with silver margin tinted red.
E. HELIX (Common Ivy). 1/- each. The well-known dark-green Ivy, with thick shining leaves.
E. JAPONICA ARGENTEA. 1/6 to 2/- each. Medium-sized heart-shaped leaves, of light green, edged pale yellow.

Honeysuckle (See *Lonicera*)—

Hoya (The Wax Plant)—

- CARNOSA. 1/6 each

Ipomæa—

- E. LEARII. 1/6 each. A fast-growing climber, producing large blue convolvus-like flowers, blooming in autumn; extremely handsome.

Jasminum—Jassamine)—

- E. GRANDIFORA. 2/- each. Plant is shrubby, half-climbing habit, with very delicate foliage, and its small white star-shaped, fragrant flowers are produced in great profusion all the year round.
E. POICOICUM. 2/6 each. A very sweet-scented variety, with white flowers; very handsome and star-like in appearance.
E. REVOLUTUM. 2/- each. Large yellow flowers, fine bold foliage; strong grower.

Kennedy—

- E. NIGRICANS. 1/6 each. A very hardy and quick-growing climber, producing very dark-coloured flowers.

Lathyrus (Everlasting Pea)—

- E. LATIFOLIUS ALBA. White. 1/- each.
E. LATIFOLIUS ROSUES. Pink. 1/- each.

Lonicera (The Honeysuckle)—

- E. AUREA RETICULATA. With golden foliage. 1/6 each.
E. CONFUSA. Yellow, very profuse. 1/6 each.
E. CAPRIFOLIUM (English Honeysuckle). 1/6 each.

All highly esteemed for their delicious perfume. *Confusa* is a remarkably free-flowering variety, and powerfully scented, one of the best climbers grown.

Mandevilla—

- D. SUAVEOLENS. 1/6 each. One of the best climbers, producing clusters of snowy-white flowers, beautifully scented, the queen of hardy, white-flowering climbing plants, and easy of cultivation.

Maurandya—

- E. ALBA. White. 1/6 each.
E. BARCLAYANA. Purple. 1/- each.
E. ROSEA. Rose-coloured. 1/- each.

Very neat, free-flowering plants, continuing to flower throughout the whole summer.

Medeola—

- E. ASPARAGOIDES. 1/6 each. A pretty herbaceous climber; particularly adapted for baskets. Commonly called American Smilax.

Passiflora (Passion Flower)—

- E. CONSTANCE ELLIOTT. Pure white. 1/6 each.
E. EDULIS. White (Passion Fruit). 6d. to 1/- each.
E. IMPERATRICE EUGENIE. Blue and white. 1/6.

Passion Fruit (See *Passiflora edulis*)—

Phaseolus—

- D. CARACALLA (Snowflower). 1/6 each. A pretty and most singular flowering climbing plant, producing fine spikes of lilac-coloured flowers, curiously curled and twisted; sweetly scented.

Rhyncospermum (*Jasminoides*)—

- E. JASMINOIDES. Variegated. 2/- each. A bright, perfumed, white flowering creeper, of quick growth and fine foliage. It is an evergreen, hardy, except in coldest districts.

All Flower Seeds post free to all parts.

Nurserymen, Seedsmen and Florists.

Salanum—

- E. JASMINOIDES. White. A fast covering climber. 1/6 each.
- E. SEAFORTHIANUM. Beautiful clusters of blue flowers. 1/6 each.
- E. WENDLANDII. 1/6 each. One of the most superb summer flowering vines it is possible to conceive; it blooms continuously, no stray blooms, each one nearly 3ins. across; as many as 100 being in a cluster. The colours are an attractive shade of lavender-blue, strikingly beautiful.

Stephanotis—

- E. FLORIBUNDA. 2/6 each. Stephanotis is prized as a first-rate plant for exhibition. It is usually grown in the greenhouse, but will do well in warm situations out of doors. The foliage is wax-like and the flowers are pure white, and produced in abundant clusters.

Snailflower (See Phoseolus)—

Tasconia (The Passion Flower)—

- E. EXONIENSIS. Rosy-cerise. 1/6 each.
- E. MANICATA (Scarlet Passion Flower). 1/6 each.
- E. MOLLISSIMA. Red (Edible Fruit). 1/6 each.
- E. VAN VOLXEMI. Crimson. 1/6 each.

Tasconias have similar flowers to the Passifloras or Passion flowers are closely allied to them. They are all quick-growing, free-flowering climbers. Mollissima produces long white edible fruits.

Virginian Creeper (See Ampeolpsis)—

Waxplant (See Hoya)—

Wistaria (Glycine)—

- D. MULTIJUGA ALBA. Pure white, very fine. 2/6 each.
- D. ALBA. White. 2/6 each.
- D. SINENSIS ALBA. White. 2/6 each.
- D. SINENSIS. Lavender. 2/6 each.
- D. SINENSIS FLORE PLENO. Lavender. 2/6 each.

A double flowering variety of this fine old hardy climbing plant, and a valuable addition to our hardy climbers. Well known climbers, are considered the queen of deciduous climbing plants, producing in early spring long racemes of beautifully scented flowers; they are very hardy, and when well established grow rapidly, thriving in any kind of soil. Sinensis alba we graft on the Sinensis, so that all shoots coming below the graft should be rubbed off.

Cupresses, Pines and other Conifers.

Araucaria—

- BIDWILLII (Bunya Bunya) 80-100ft. 3/6 each.
- EXCELSA (Norfolk Island Pine). 70-100ft. 1/6 to 3/6 each.

The genus Araucaria comprises some of the most beautiful trees. Bidwillii is the celebrated Bunya Bunya of Queensland. It thrives exceedingly in this State. Excelsa is the well-known Norfolk Island Pine.

Biota—

- AURFA (Golden Arborvitae), Garden variety; 3-6ft. 2/6 each. One of the most beautiful of the genus, of compact growth, habit dwarf; a splendid little shrub for small gardens.
- LAMBERTIANA HORIZONTALIS AURFA; 30-40ft. 3/6 each. A most handsome and distinct variety of the true horizontal branching kind, bright golden coloured foliage; highly recommended.
- LAMBERTIANA (Horizontalis); 80-100ft. 2/6 to 3/6 each.

Pinus—

- INSIGNIS (The Remarkable Pine); 50-60ft. 1/- to 2/- each. P. Insignis is undoubtedly the most popular tree in the Australian States. It is perfectly hardy, of very rapid growth, doing well in all kinds of soil, or in any locality.

Our Latest Novelties in Carnations are unsurpassable.

ROSES.

We have now established a Rose, Citrus and Hardy Plant Nursery in the Darling Ranges, near Kalamunda, where we are now growing the whole of our roses, budded on to an invaluable new special stock that is giving perfect results. The ground is especially adapted for producing hardy, healthy young rose trees, it being a very strong loam. Roses raised in this soil have a better constitution and bear transplanting far better than the Roses raised in the swamps around Perth. On referring to our Lists it will be seen that we have all the most striking kinds, either for exhibition or garden decoration, all inferior sorts having been discarded.

Standards.—We have good collections of these on stems about 2½ ft. high. Price, 3/- each. 30/- per doz.

Roses in Pots.—We grow many varieties of Roses in Pots for the convenience of those who prefer to buy in summer. 2/6 each.

PRICES—Strong, 2-year-old Roses, 2/- each, 21/- doz. Good 1-year-old Roses, 1/6 each, 15/- doz.

When selection is left to us, 1/6 each; 14/- doz.

CAROLINE TESTOUT.

ABBREVIATIONS:—H.T., Hybrid Tea; H.P., Hybrid Perpetual; B., Bourbon; N., Noisette; T., Tea Scented; P., Polyantha; C., China; Cl., Climbing.

Novelties: New Roses.

Climbing General McArthur, H.T.—A sport possessing all the good qualities of the parent. A welcome addition among the climbers. 2/6.

Climbing Mrs. Aaron Ward, H.T.—A climbing form of this much esteemed variety. Vigorous growth and free-flowering. 2/6.

Climbing Madam Edward Herriot, H.T.—Much esteemed as a bush rose; must certainly be welcomed as a distinct addition among the climbers. Very vigorous. 2/6.

Climbing Lady Hillingdon, H.T.—A vigorous sport of this good variety bearing very long orange yellow buds; sweetly perfumed. 2/6.

Salmon Spray, H.T.—Rich salmon-pink, reverse of petals carmine; borne on sprays of up to twenty flowers; mildew proof. Ideal rose for massing and table decoration. Height, 2½ to 3ft. 2/6 each.

Sunstar, H.T.—Colour, deep orange, veined vermillion; petals very stiff. A most attractive rose, both in the bud and when open. 2/6 each.

Lorraine Lee.—An exquisite, ever-blooming rose; colour, luminous orange salmon, splendid for all purposes; foliage, mildew and disease proof. 3/6 each.

General List.

Admiral Ward, H.T.—Crimson red.

Alexander Hill Gray, T.—Pure yellow; good.

Alfred K. Williams, H.P.—Carmine red; full.

Allister Stella Gray, N.Cl.—Pale yellow, in clusters.

Alliance Franco Russie, T.—Yellow, shaded salmon.

American Pillar, Cl.—Pink, yellow stamens.

Antonie Rivorie, H.T.—Rosy flesh, yellowish at base of petals.

Ards Rover, H.P.Cl.—Crimson, shaded maroon.

Auguste Comte, T.—Carmine red, yellowish centre.

Autumn Tints, H.T.—Coppery red, shaded orange.

Banksia, Cl.—White, double, clusters.

Bardou Job, H.T., Cl.—Rich crimson, strong.

Beatrice, H.T.—Deep rich pink; fine form.

Beaute Inconstante, T.—Coppery red.

Belle Siebrecht, H.T.—Bright rosy-pink, good form.

Bessie Brown, H.T.—Creamy white.

Betty, H.T.—Coppery rose, shaded yellow.

Black Boy, H.T.—Dark crimson, shaded dark maroon, climber.

Bridesmaid, T.—Bright pink; good.

British Queen, H.T.—White flushed.

Canteur Lyonnais, H.P.—Pure white.

Strong Hardy Roses for the Garden is a Speciality.

- Captain Hayward, H.P.**—Bright crimson carmine.
Carine, H.T.—Orange, carmine.
Caroline Testout, H.T.—Clear bright rose; good.
Cathrine Mermet, T.—Flesh colour; good.
Cecil Brunner, P.—Bright rose; pretty button-hole rose.
C. J. Grahame, H.T.—Orange crimson.
Chateau Des Clos Vogert, H.T.—Velvety crimson, shaded fiery red; good.
Chrissie MacKellar, H.T.—Orange shaded with deep pink.
Clara Watson, H.T.—Salmon pink; good.

Wm. Shean, H.T.—Pure pink, large and good.
Yellow Frau Karl Druschki, H.P.—Lemon yellow.
Yvonne Vacherot.—Porcelain white, suffused pink.

Remember the Best Seed is the Cheapest.

HEDGE PLANTS

Bougainvillea Sanderiana.—This plant makes a splendid hedge. It is a fine evergreen, and will grow anywhere with very little trouble. Price, 1/6 each; 15/- doz.

Cupressus Macrocarpa (from seed).—This plant makes a splendid hedge, is easy to grow, thrives well almost anywhere, and is a very quick grower. If well cultivated this variety will make a good hedge in two years. We sell thousands of these plants every year. Prices, 6/- to 15/- per doz.

Cupressus Lambertiana Horizontalis.—This makes a splendid break wind or ornamental hedge, and is admirably adapted for hiding any unsightly objects. It stands the wind better than any other plant we know. This variety need not be planted very close—four feet apart from plant to plant is quite near enough. Prices, 30/- to 42/- per dozen.

Cytissus Poliferus (Tree Lucerne).—This makes a good hedge, and is also very useful in hot and dry districts, as it stands the drought well, and is very useful for feeding cattle. 6/- to 9/- per doz.

Pittosporum Undulatum.—This is a very strong and robust growing variety; most suitable for a poor and dry soil and where a very strong hedge is required, it is perhaps the best kind to plant. We have a nice hardy stock, well established in pots of various sizes. From 10/- to 15/- per doz. Special quotations for quantities.

Plumbago Capensis.—A very hardy blue-flowering plant, which makes a pretty hedge. 12/- doz.

Tecoma Capensis.—This scarlet-flowering Tecoma, very hardy, makes a splendid hedge. 10/- to 15/- per doz., according to size.

VIOLETS

California.—The Giant Single Violet California is quite hardy and a most rampant grower, with large leaves. A single plant will produce several hundred flowers of immense size and exquisite fragrance, on stems 10 to 14 inches long. Plants out of the ground, 3/- per doz.

Swanley White.—This is the best double white violet in cultivation, and is a great favourite. Plants out of the ground, 6d. each; 4/- doz.

Princess of Wales.—This, in our opinion, is one of the finest single varieties in cultivation. Flower stalks, 6 to 8 inches long, and standing almost erect; habit vigorous and of exquisite perfume. We confidently recommend all growers and lovers of this family to obtain this variety. Plants out of the ground, 3/- doz.

Ransom's White.—A single white variety, 6d. each, 3/- doz.

Bazaars and Garden Fetes Supplied.

How to Prepare Your Garden-Beds.—Select the choicest Plants, create New Varieties, and grow them to perfection—are set forth clearly and concisely in:—

Extract from Review.—"To the experienced Gardener—A perusal of this useful book will be advantageous; to the beginner, a revelation. Gardening is reduced to simplicity itself; and the successful cultivation of choicest plants to a certainty."

Our Latest Novelties in Carnations are unsurpassable.

Japanese Chrysanthemums.

GENERAL COLLECTION OF EXHIBITION VARIETIES.

Varieties, 1/3 each; 12/- per doz., except where otherwise priced.

Bessie Robinson.—Old gold, heavily marked orange. Somewhat of the form of Golden Champion, but the colouring is new and unique in Chrysanthemums.

Dr. I. M. Inglis.—Purple amaranth, with silvery reverse.

E. L. Cahill.—Colour vieux rose, Japanese, perfect growth and stem. A most desirable variety for exhibitors.

Harry Clements.—Golden buff, Japanese; resembling that old favourite, Madame Carnot.

H. V. West.—Deepest yellow, with very broad, long petals, whorled and incurved.

Mr. T. Slack.—Crimson, perfectly reflex form that stands the weather wonderfully well.

Mrs. D. Andrew.—An immense Japanese incurved white, with a beautiful pink shade on late buds.

Roma Bayles.—Pure white, somewhat like the popular Wm. Turner, but easy to grow.

Renown.—Rich dark crimson, with gold reverse, beautifully reflexed and drooping.

Stephen Brown.—Salmon, with old gold reverse, very large, broad petals, which are whorled and incurved.

T. H. Jackson.—Crimson, with dull gold reverse. The petals are slightly incurved at the tips.

Alice Benson.—A most beautiful white Japanese.

Acme.—A strikingly handsome flower, under surface of lovely silver colour, upper surface of rich carmine rose.

Alice Lemon.—A beautiful flower of light soft pink colour.

Alfred Wilson.—Chestnut crimson, with gold reverse.

Bronze Meudon.—This is a bronze sport from the well-known and popular variety "Meudon," and is identical in every respect except colour, which varies from almost yellow on early buds to a terra-cotta on later buds.

Daily Mail, J. I.—Buttery yellow, whorled and incurved. Received many F.C.C.

Edith Cavell.—Large incurved Japanese. Colour light chestnut, with gold reverse.

Evelyn Ferguson.—Reddish salmon, bronze; good.

F. S. Vallis.—Canary yellow. One of the best.

Golden Champion.—Beautiful golden yellow; extra large.

Gladys Blackburn.—Yellow, tinged bronze.

Hammond Phillips.—Light pink, long broad petals.

Honourable Mrs. Lopes.—This is considered to be the best yellow in Great Britain.

Ilma Ratten.—Silvery pink, when fully expanded.

J. S. Lloyd.—Primrose sport, from Wm. Turner.

Kara Dow.—Chestnut with gold reverse.

Lady Stanley.—Mauve pink, with a silvery reverse.

Lady Edward Miller.—Deep yellow, with broad-whorled and incurving florets.

Louisa Pockett.—Is the most remarkable variety raised; enormous alike in stem, foliage and flower. Colour, pure white, later buds often showing blush.

Mrs. A. J. Weller.—Chestnut and gold. A prime variety.

Mrs. E. Kershaw.—Very large salmon buff, broad petals.

Roses on our New Stock cannot fail anywhere.

Nurserymen, Seedsmen and Florists.

- Miss Nellie Pocket.**—Creamy white, long drooping florets curled at the tips.
- Mrs. R. C. Pulling.**—Lemon and yellow, with broad petals.
- Mrs. Gilbert Drabble.**—White; one of the very best.
- Mrs. H. P. M. Berry.**—Citron yellow, flushed with brown.
- Mrs. H. Cannell.**—The best late white.
- Mrs. Filkins.**—A beautiful feathery variety, deep yellow.
- Mrs. R. Luxford.**—Indian red, gold reverse, dwarf and distinct; splendid for exhibition.
- Mrs. Norman Bayles.**—Large yellow, with slightly incurved petals; good for exhibition.
- Mrs. Roger Thomson.**—Most beautiful broad petalled, incurving yellow.
- Mrs. J. L. Reuter.**—A beautiful high-class bloom of purest white.
- Mrs. David Syme.**—Very large, broad petalled, white.
- Mrs. W. A. Reid.**—Intense fiery crimson.
- Meudon.**—An immense flower, bright silvery pink.
- Nellie Francis.**—Old Gold, marked reddish bronze.
- Pockett's Crimson.**—The finest deep crimson we have for exhibition purposes.
- Queen Mary.**—White. This variety has been a wonderful success in England.
- Rose Day.**—Beautiful pink, of the largest size, somewhat the colour and form of "Meudon," but much easier grown.
- Rose Pockett.**—Old gold, lightly shaded salmon.
- R. M. Quittenton.**—Crimson reflexing. Good for any purpose and a great keeper.
- Woodside.**—Yellow, of the largest size. Very distinct.
- Wm. Turner.**—Purest white, beautiful sort; a champion.
- W. Mease.**—Old gold, cerise. Good for exhibition.
- W. Woodmason.**—Crimson, of extraordinary size; very fine.
- W. P. Francis.**—Very distinct dark crimson; good grower. Exhibition standard.
- Yellow Louise Pockett.**—Identical with Louisa Pockett, except colour. A champion.

Best Single Varieties for Exhibition.

- Bronze Pagram.**—A beautiful bronze flower.
- Dorothy Dawn.**—A lovely salmon bronze; a very fine sort.
- Eleneor.**—This is one of the prettiest varieties. Orange-red, pale yellow, centre.
- Fairy.**—White; very pretty for decorations.
- Golden Gem.**—Deep yellow. Large trusses of beautiful flowers.
- Joan Edwards.**—One of the prettiest singles; colour, rose-pink.
- Janet French.**—A fine flower, beautiful pink, with large white ring round disc.
- Marjorie Francis.**—A beautiful majenta pink, with a white ring round disc.
- Mensa.**—Pure white. The finest single Chrysanthemum in commerce.
- Merstham Gem.**—Reddish crimson, yellow ring round disc.
- Mrs. W. Brown.**—White, with pink markings. A very pretty and distinct variety.
- Mrs. Yuille.**—An exquisite shade of pink.
- Mrs. D. Denton.**—Beautiful heliotrope pink.
- Mrs. F. J. Lloyd.**—Colour, chrome yellow, heavily marked blood terra-cotta.
- Mrs. F. A. Cleaver.**—Colour, lovely delicate heliotrope pink.
- Violet Merton.**—Colour, reddish terra-cotta, with markings of bronze yellow.
- Snowflake.**—Flowers large; colour, white, slightly flushed pink.

Roses on our New Stock cannot fail anywhere.

CACTUS DAHLIAS

| | Van Dyck —Salmon and buff. |

February is the best month to sow Delphiniums.

FUCHSIAS

1/- to 1/6 each. 12/6 doz.

The Fuchsia is one of the finest flowers for decorative purposes we possess. It is also a capital greenhouse and window gardening plant, and is easily cultivated.

Avalanche—Flowers very double, large and fine, tube and seppals scarlet-carmine; corolla, dark violet plum.

Beauty of Exeter.—A most striking and effective and semi-double variety, flowers large and bold; a robust grower and very free-flowering.

Black Prince.—Tube and sepals bright waxy carmine; large broad sepals with pale green tips and large open pale-pink corolla, margined with deep rose.

Beauty of Swanley.—Pure waxy-white tube and sepals, the latter elegantly reflected, corolla bright pink.

Christopher Columbus.—Large scarlet sepals, enormous double-rosy carmine corolla. This is one of the most beautiful of Fuchsias.

Countess of Hopetoun.—A large double Fuchsia, with red sepals and white corolla; very handsome.

Elegence.—Crimson sepals which are singularly contorted and twisted; corolla deep purple, broadly striped with pale red.

Rose of Castile (Improved).—Rosy blush tubes and sepals with a slightly coloured purple corolla; very hardy, free growing, abundant bloomer.

Venus Victress (Improved).—Tubes and sepals rosy blushed, tinged with green, large highly-coloured purple corolla; free and abundant bloomer.

Edmund About.—Large vermillion carmine, enormous double white corolla; suffused red.

Frau Emma Topper.—Quite a distinct and novel variety tube and sepals rosy coral colour, corolla rosy plush flowers, large and double; very free.

Jubilee.—Tube and sepals red, very large and handsome corolla; one of the best.

La France.—Large recurving bright red sepals, the large double corolla being of a bright cobalt blue; very fine.

Lady Heytesbury.—This is a first-class Fuchsia, white tube and sepals, with purple corolla.

Mrs. Bright.—Waxy white tube and sepals, clear orange scarlet corolla, enormous corolla, very full and double; of a beautiful azure violet colour, flaked with red.

Wiltshire Giant.—Semi-double stout broad tube and sepals, a beautiful pale orange-carmine; corolla large, novel and distinct in colour, being of a lovely deep magenta; very strong grower.

AND SEVERAL OTHER VARIETIES.

POTTING SOILS, FLOWER POTS and all OTHER ACCESSORIES.
All Flower Seeds post free to all parts.

The West Australian Gardening Guide

WILSON & JOHNS, 70 BARRACK ST., PERTH.

Extract from Review:—"To the experienced Gardener—A perusal of this book will be advantageous; to the beginner, a revelation. Gardening is reduced to simplicity itself; and the successful cultivation of choicest plants to a certainty."

(2/- Post Free).

Roses on our New Stock cannot fail anywhere.

ERICAS

(THE HEATH).

Ericas are a very pretty class of plants and very free-flowering. Anyone possessing a small collection may have flowers throughout the entire year; in fact, some of the varieties are scarcely ever out of bloom.

Autumnalis.—Deep rose; fine.

Bowieana.—White; fine and old variety.

Cavendishii.—Bright yellow; one of the best.

Cerithoides Coronata.—Crimson, long tube; one of the hardiest and best varieties grown.

Charsleyana.—Flowers previous to opening are white, and as they attain age change to a delicate blush colour; long spike, similar in form and shape to Bowieana.

Cruenta.—Orange scarlet.

Vulgaris Alba.—White. Heather of Scotland.

Hentyana.—A very delicate shade of pink, shaded with white from the centre to the ends of the tubes; fine large spikes. A great favourite on account of its delicate shade of colour.

Hybrida.—Light red; one of the best

Intermedia.—Large spikes of pure white, tube-shaped flowers.

Jubilee.—Large flower of Webbleyana type, but much darker colour.

Lambertiana.—White, tinged with rose.

Linnaeoides.—Purplish rose, a fine variety.

Mammosa.—Purplish crimson.

Melanthera.—Purple.

Røgerminans.—Small white; sweet scented.

Webbleyana.—The flowers of this variety are of a most lovely and delicate shade of waxy-pink, produced in long spikes, which, both in form, size, and free-flowering, resembles its parent, Bowieana.

Wilmoreaana.—Pink and white; fine hardy variety.

DOUBLE-FLOWERED, IVY-LEAVED PELARGONIUMS.

No class of plants that we have introduced of late years has given more satisfaction than the improved varieties of the Ivy-Leaved Pelargoniums, more especially the double kinds, amongst which there are now some beautiful varieties. They are well adapted for all kinds of ornamental gardening, and are most excellent plants for covering fences, or training on trellises. They are easily grown and are continually in flower. In the spring of the year, at which time they are at their best, they are a mass of bloom, their foliage being almost hidden with flowers. Price, 1/- each; 10/- per doz.

CAMELLIAS.

Camellias are indispensable where handsome flowering shrubs are required. A well-grown Camellia is a thing of beauty always. The foliage is a bright glossy green, the plant has a graceful and compact habit, and throughout the autumn and winter months they are laden with handsome flowers. To grow them successfully they require a little more attention than other shrubs. They are not particular about soil (unless it contains a large proportion of lime, which they do not like). If they are planted in a position well sheltered from strong winds in well-drained soil, and are not allowed to become dry in summer, they will succeed and make handsome shrubs. When the selection is left to us, we will supply the best varieties. 3/6 to 5/- each.

CANNAS.

There is probably no class of plants that have been so greatly improved upon during the past three or four years as the Cannas.

February is the best month to sow Delphiniums.

Nurserymen, Seedsmen and Florists.

They are particularly suited for outdoor cultivation in this State, are stately in appearance, and their broad massive foliage, relieved by deep crimson, scarlet, orange or yellow flowers during the summer and autumn months, render them eminently adapted for our gardens; in fact, there is no class of plants which produce such glorious effect. They bloom profusely for months together, and even although their flowers are destroyed by an occasional hot wind they soon recover, and are in full bloom again two or three days afterwards, and for cut flowers for table decorations they are equally as showy as Gladioli. Their culture is very easy, merely requiring a plentiful supply of water during the blooming season. 1/- each or 10/- doz.

DAHLIAS.

Dahlias do well in any ordinary garden soil, well manured. They should be planted in a position sheltered from strong winds, and securely tied to stout stakes. Plant from September to end of December, a few each month, which ensures a succession of bloom. The first planted will commence to flower in December, and the last will remain in bloom till the end of May. After the foliage dies down the tubers should be dug up and stored in a dry shed. Liquid manure will greatly improve the Dahlia. Price, 9d. to 1/6 each; 7/6 to 15/- doz.

BOUVARDIAS.

A beautiful class of plant, which will do well in our gardens, producing flowers in abundance during autumn and early winter months. Of late years there has been a vast improvement in these plants, and some very fine varieties have made their appearance. We hold a collection of the best varieties and strongly recommend them to all lovers of flowers. Price, 1/6 each; 15/- doz.

SINGLE AND DOUBLE-FLOWERED ZONAL PELARGONIUMS.

For our hot, dry climate, double and single flowering Zonal Pelargoniums are a very valuable kind of plant; in fact, many of our gardens, especially in dry seasons and where water is not obtainable, would look very bare indeed of flowers were it not for Zonal Pelargoniums. They stand the drought better than any other class of plants we know, for they grow and flower abundantly where many other plants would scarcely live. 1/- each; 9/- doz.

HORTICULTURAL SUNDRIES

Pruning and Budding Knives.—Best make, 6/- each.

Gardening Gloves.—3/6 pair.

Hanging Baskets.—For ferns, etc., 2/- each.

Button-Hole Tubes.—For keeping cut flowers fresh, 6d. each.

Indelible Pencils.—Invaluable for writing on wood, labels, etc., 6d. each.

Saucers.—25 per cent. below price of pots.

Flower Pots.—4in., 3d. each, 2/- doz.; 5in., 4d. each, 3/- doz.; 6in., 6d. each, 5/- doz.; 7in., 8d. each, 6/6 doz.; 8in., 1/- each, 9/- doz.; 9in., 1/6 each, 12/- doz.; 10in., 2/- each, 18/- doz.; 12in., 3/- each, 30/- doz.

Grafting Wax.—Indispensable for grafting, budding, etc., also for healing wounds in trees, and for stopping the bleeding of vines. Always ready for use and easily applied. 2/- and 3/- tin.

Labels and Garden Stakes.—Labels: 5in., per 100, 1/6; 6in., 2/-. Stakes: 1½ft., per 100, 4/-; 2½ft., 5/-; 3ft., 7/-.

Indelible Ink.—For writing on Labels, 1/3 per bottle.

Raffia.—Largely used by Vignerons for Vines, etc.; also by Nurserymen. The best tying material known. 2/- lb.

February is the best month to sow Delphiniums.

Decorative Palms.

It is universally admitted that the Palms and Cycads form the noblest and most prominent ornament in gardens. The beauty of palms consistently increases with age. Their multifarious uses are beyond enumeration, but as ornamental plants their adaptability to different purposes is unsurpassed—from the decoration of windows, halls and jardinières, to the building of stately avenues and picturesque groves. Many palms will thrive in full sun, some prefer partial shade. Rich soil and plenty of water when growing are desirable, but there are a few like the Phoenix, the Brahea, and others, that will thrive in rocky and dry places. The Kentia, in two varieties, we stock in all sizes.

Kentia.—Belmoreana. 1/6 to 10/6 each.

Fosteriana.—1/6 to 10/6 each.

The Kentias are the hardiest, most beautiful and most useful of all Palms

For decorative purposes they cannot be excelled.

Kentia Fosteriana—3/6 size.

Brahea (Filamentosa).—From 2/6. One of the best Palms for embellishing the garden grounds. Most suitable for planting as a single specimen in lawns and elsewhere, the quickest growing Palm; should be planted out during the warmer months of the year.

Cocus.—Plumosa (featherly) 20 to 30 feet. Southern Brazil, very graceful, tall-growing Palm. From 2/6 to 21/- each.

Corypha (Australis).—The New South Wales Cabbage-Tree Palm; when planted out make fine specimens. From 2/6.

Latania (Barbonica). From 2/6.—A very beautiful fan-leaved Palm, native of China and Japan. Has large, fan-shaped leaves of a cheerful green colour. Excellent for indoor decoration, and does well outside in sheltered position.

Phoenix Canariensis.—From 2/6 each.

Dactylifera (Date Palm), from 2/6 each.

Reclimata, from 2/6 each.

Tennis, from 2/6 each.

All splendidly adapted for ornamenting, and giving a tropical appearance to the garden; thrive well outside. In large sizes, up to 4 feet high.

THE PRICES IN THIS CATALOGUE ARE FOR HIGH-CLASS.
SEEDS ONLY.

Special Quotations for large quantities of Farm Seeds.

Verandah and Shade House Plants.

- Anthericum.**—Pretty ornamental foliage; hardy. 1/6 to 2/6 each.
- Asparagus Fern.**—A fine hardy climber. 1/6 each.

WILSON & JOHNS - - 70 BARRACK ST., PERTH.

The "Producers' Review" says:—"This book richly deserves a place among the books of any professional or amateur gardener throughout W.A."

Special Quotations for large quantities of Farm Seeds.

FLOWERING BULBS.

We devote considerable space and attention to the growth of Bulbs, and customers can rely on their soundness and correctness of name. We are constantly adding new species and varieties to our collection, and any bulbs not mentioned in this list will be supplied at current rates if obtainable.

Anemones.—These truly magnificent flowering tubers are deserving of a place in any garden, and we cannot too highly recommend them; their variety and colour, from deep crimson to white, and striped, rendering them very attractive, the brilliancy of some and exquisitely delicate colouring of others making them indispensable.

St. Brigid (The Irish Poppy-flowered Anemone).—A beautiful strain with double and semi-double flowers of the most brilliant colours. Absolutely the finest strain we can offer. During November we generally have a lovely show of these handsome blooms. 2/- doz.

Large, Specially-Selected Bulbs—2/6 per doz.

Ranunculus.

Agapanthus (*Agapanthus Umbellatus Albas*).—White, strong grower, throws up long spikes which bear a profusion of lovely flowers, suitable for bouquets, etc. 1/6.

Agapanthus Umbellatus.—Similar to the foregoing in every way differing only in colour, the flowers being a rich deep-porcelain blue. 1/6 each.

Amaryllis.—The Amaryllis and their species form one of the most gracious and attractive classes of Bulbs in cultivation; the flowers, which are funnel shaped, are of most beautiful and delicate colours, ranging through various shades. 5/- each.

Amaryllis Belladonna (*Belladonna Lily*).—Delicate pink, very sweet scented; extremely valuable for cut flower and decorative purposes. 9d. each, 6/- doz.

Amaryllis Belladonna Blanda.—A beautiful white variety; very fine. 1/6.

Babiana.—Very showy Bulbs, embracing a great variety of colours, suitable for small borders. Fine mixed varieties. 2/- doz.

Lily of the Valley.—Beautiful small white bell-shaped flowers, sweet-scented. A great favourite. In pots. 1/- each.

❀ DAFFODILS ❀

Emperor.—Perianth deep primrose, trumpet rich full yellow; very large flower; extra fine. 6d. each, 5/- doz.

Remember the Best Seed is the Cheapest.

- Empress.**—Perianth pure white, trumpet rich yellow; flowers extra large and fine. 6d. each, 5/- doz.
- Princess.**—Perianth sulphur white, trimmed yellow; large showy flower, very fine and early. 3d. each, 2/- doz.
- Aurantius.**—Perianth yellow, cups stained orange-red, one of the best for cutting. 4d. each, 3/- doz.
- Sir Watkin.**—Perianth rich sulphur-yellow, slightly tinted with orange; the giant of chalice-cupped Daffodils, the bold handsome flowers last long in water when cut. A strong, sturdy grower; extra fine. 6d. each, 4/- doz.

❁ NARCISSUS. ❁

- Hermoine.**—Pale straw colour. Very early and useful for cutting. 1/6 doz., 8/- per 100.
- Double Roman.**—4d. each, 3/- doz.
- Campernelle Jonquil.**—Perianth and cup rich golden yellow, several flowers on a stem. 3d. each, 2/- doz.
- Grand Soliel D'or.**—Yellow clusters. 4d. each, 3/- doz.
- Paper White.**—Pure white, a good early variety for cut flowers and valuable for scent making. 1/6 doz.
- Mixed Sorts.**—1/- doz.

Freesia.—We can highly recommend the Freesia. They have a most delightful perfume, bearing a great collection of beautiful flowers, and should be in every flower garden. They are, without doubt, one of the best introductions known in bulbous flowers, their strong, yet exquisite scent, surpassing every other kind, being scarcely distinguishable from a lovely Marechal Niel rose. Fine for pot culture.

Freesia Refacta Alba, 1/6 doz. 7/6 per 100.

Hyacinth.

- Gladiolus.**—Finest mixed varieties. 9d. each; 7/6 doz.
- Hyacinths.**—Valuable flowering bulbs, either for the adornment of the garden or as cut flowers; they, too, make exquisite pot plants for the decoration of the greenhouse, window, or balcony. Plant from February to May in a tolerably rich sandy loam. In growing them in Hyacinth glasses they should have plenty of air, the glasses

Remember the Best Seed is the Cheapest.

being filled with rain water and put in a dark place, the bulbs being so placed that they barely touch the water. When they have well started into growth, expose them to the light and turn occasionally to prevent ill-shape. 1/- each.

Iris.—Spanish mixed. Very beautiful shades of colour. 4d. each, 3/- doz.

Ixias.—Choice mixed. 3d. each, 2/6 per doz.

Ornithogalum. — This is a very handsome bulb, bearing a spike of pure white flowers, with deep black centre, the blooms retaining their freshness for some time after being cut.
Ornithogalum Arabicum—Very large, 3d.

Liliums (ready for delivery in May).

The Lilium family all thrive well in W.A. The Bulbs we offer are Colonial grown.

Lilium Candidum (true St. Joseph's Lily).—Pure white, very handsome. 1/-.

Lilium Tigrinum (Tiger Lily).—Single and double. 1/6 each.

Lilium Lancifolium Rubrum and **Roseum**.—Charming varieties. 1/6.

Lilium Lancifolium Album.—Pure white. 1/6.

Lilium Longiflorum. — Pure white. 1/6.

Tuberose. — One of the most beautiful summer flowering bulbs in cultivation. The blooms are of the purest white, and of the most exquisite fragrance. They are admirably adapted for bouquet making and easy to cultivate.

Tuberosa.—Double. 6d. each.

Tuberosa.—Single. 6d. each.

Ranunculus. — A favourite pretty flower. They bloom very freely and are of magnificent colours; each individual flower being a perfect specimen in itself. A light soil is the most suitable, and if a little sand is added so much the better. 2/6 per doz.

Snowflake. — A very beautiful substitute for the old English Snowdrop, which does admirably here. 1/6 doz.

Sparaxis.—We have a very fine collection of these, embracing every shade of colour, all beautifully marked. They are of very easy culture, and a few planted amongst other bulbs will blend into a dazzling display of beauty. 2/- per doz.

Watsonia O'Brieni.—A beautiful pure white Watsonia, the finest and most distinct of this splendid family. The flowers of this fine Watsonia are snow-white in colour, and regularly arranged on stalks, branching off from the main stem, somewhat resembling the gladiolus. In growth Watsonia O'Brieni is much stronger and taller than the common varieties. Bulbs procurable during February, March and April. 6d. each, 4/- doz.

Watsonia Pink.—9d. each, 7/6 doz.

Grow your own Vegetables—it is healthier and cheaper.

FRUIT TREES.

The following list contains all the best varieties in cultivation. The trees are in all cases strong, healthy and free from blight. The apples are worked on blight-proof stocks. These stocks do not prevent the Woolly Aphis from attacking the trees above ground, but roots will remain free from blight should any appear on the branches. It can be destroyed by insecticide. Varieties not enumerated can be supplied at current rates.

ALMONDS.

Price, 2/- each, 21/- per doz. Special quotations for large quantities.
Brandes Jordan.—A well-known variety of strong growth, very tender shell.

Burbank's Seedling.—A variety from Luther Burbank, tree extremely hardy and a great bearer, recommended as one of the best for this climate; flowers much later than other sorts.

Nonpareil.—A heavy and regular bearer, with very thin shell.

Paper Shell.—Very good, easily broken between the fingers.

APPLES.

All on blight-proof stock and perfectly clean.

Price, 2/- each; 21/- per dozen. Special quotations for large quantities.
Strong Selected Trees, 2/6 each.

Cleopatra.—One of the very best apples in commerce.

Cox's Orange Pippin.—Grand dessert, flowers excellent, late.

Dunn's Seedling (Syn. "Munroe's Favourite.")

Esopus Spitzenberg.—A most beautiful apple, richly flavoured; late

Dougherty (Yates Improved).—A fine dessert apple of medium size, almost covered with bright red; good bearer, late.

Five Crown Peppin.—See London Peppin.

Gravenstein.—A splendid apple, good flavour and colour; early.

Granny Smith.—Large and juicy; a greenish yellow colour; heavy bearer and good export apple.

Irish Peach.—Good bearer and does not blight; early.

Jonathan.—A most beautiful fruit for all purposes.

London Peppin.—One of the very best apples for all purposes.

Munroe's Favourite.—One of the best for all purposes; late.

Nickajack.—Large and handsome, cooking or dessert; late.

Northern Spy.—A splendid dessert apple; late.

Reinette de Canada.—A large popular apple, combining many good qualities; late.

Rokewood (Bullock's Seedling).—A highly coloured colonial raised apple, and probably the best keeping variety of all; late.

Rome Beauty.—A beautiful late apple and heavy bearer; one of the best.

Williams Favourite.—A very handsome dessert apple; early.

Yates.—Dessert apple of very fine flavour, highly coloured, good keeper, very late; without doubt the very finest late apple grown, and already sells for higher price in Perth than any other apple.

BAZAARS, FETES, ETC.

We make a speciality of growing plants suitable for Bazaars, Fetes, &c., and are in a position to supply them at specially reduced rates.

Gladiolus and Carnations are a great specialty with us.

APRICOTS.

(On Seedling Apricot Stocks.)

Price: 2/- each; 21/- per doz. Special quotations for larger quantities.
Strong Selected Trees, 2/6 each.

Cambellfield Seedling.—Gine golden yellow; an excellent variety for Jam making, hardy and good bearer; medium.

Early Golden.—A somewhat small fruit, but very early and on that account likely to bring better prices than later and finer apricots. It is a rich yellow, very productive and sweet.

Early Moorpark.—Similar to Moorpark, but earlier.

Hemskike.—Bright range, tender, rich and juicy; an excellent bearer; medium.

Large Early.—A fine early Apricot, of excellent flavour.

Moorpark.—A well-known Apricot of great excellence, medium

Newcastle Early.—A fine fruit, ripens last week in November to first week in December; good colour, regular bearer and carries well. Very early.

Oullins Early Peach.—A large fruit of most delicious flavour; one of the best early apricots.

CHERRIES.

Price: 2/- each; 21/- per doz. Special quotations for large quantities.
Strong Selected Trees, 2/6 each.

Bedford Prolific.—Large, handsome, black, a good market variety.

Early Lyons.—Black, firm, fresh; early.

Florence.—Large, very firm, a heavy bearer; late and first-class market cherry.

St. Marguerite.—Very large, black, firm; one of the best market varieties; late.

NECTARINES.

Price: 2/- each; 21/- per doz. Special quotations for large quantities.
Strong Selected Trees, 2/6 each.

Early Rivers.—Fruit of large size, skin rich crimson on side next sun, light yellow marked with red on shaded side, flesh very tender, juicy and rich, with a shaded "stanwich" flavour; very early.

Goldmine.—This Nectarine originated in the garden of Mr. Lundon, of Parnell, New Zealand. The fruit is of enormous size. It is a perfect freestone, and the pit or stone being extremely small for so large a fruit. The flesh is most beautiful creamy colour, tender, juice melting sugary, and of most delicious flavour; colour, bright bronzy-red; season of ripening, last week in February.

Hunt's Tawny.—Pale orange and deep red; rich and juicy.

Irrewarra.—Medium or above medium, highly coloured, of good flavour; a freestone and very early.

PEACHES.

Price: 2/- each; 21/- per doz. Special quotations for large quantities.
Strong Selected Trees, 2/6 each.

Amsden June.—A highly coloured, good flavour; very early.

High Early Canada.—Large fruit, greenish white, mottled with red; ripens with Early Alexander; more reliable bearer than Brigg's Early May.

Brigg's Red May.—Very early, highly coloured; rich and juicy.

Grow your own Vegetables—it is healthier and cheaper.

Nurserymen, Seedsmen and Florists.

Champion.—A new early, hardy variety, of large size; highest flavour and best shipper of early peaches; perfect freestone; colour, beautiful creamy-white, with a bright cheek; very handsome in appearance and should become a first-class market variety.

Dunhelm.—A new peach, medium size, with red cheek and of fine flavour; heavy bearer and very early, ripening end of November.

Elberta.—A splendid mid-season peach, and spoken of in the highest terms by the "American Garden." It is a large handsome peach, coloured by the sun, yields heavy crops, and carries well.

Early Sneed.—This variety was again first to ripen, and bore a good crop. Fruit medium size, creamy-white with red blush on the sunny side, of fine quality when ripe; but on account of its colour, must be gathered when quite hard for marketing.

Foster.—This is considered one of the best peaches of American origin, and before all others for drying and canning; large, deep orange-red, with red colour on exposed side; flesh yellow, rich and juicy, freestone; a few days earlier than "Early Crawford."

Hale's Early.—A really first-class Peach in every way, and always brings top price in the market.

Royal George.—A well-known variety; one of the best; medium.

Salwey.—Flesh deep yellow, similar to an apricot; late.

Wiggins.—An early Freestone, of large size and most highly coloured; ripens just after Brigg's Red May and before Hale. Tree very hardy and prolific bearer.

Triumph.—The earliest yellow Peach; fruit large with very small stone, skin yellow covered with red; flesh yellow, juicy and of excellent flavour.

Wonderful.—This peach has been awarded first premium and special prize of Silver Medal, in America. Mr. Lovett, the introducer, says: "It is of largest size, excellent quality, a regular and most prolific bearer, and in beauty excelled by no other peach."

PEARS.

Price: 2/- each; 21/- a dozen.

(All on Seedling Stocks.)

Strong Selected Trees, 2/6 each.

Bartlett.—See Williams' "Bon Cretien."

Broompark.—Good dessert variety, very hardy, skin sprinkled with russet, flesh yellowish, melting with a musky flavour.

Fertility.—A splendid medium-season Pear, large fruit, highly coloured; most valuable for market, almost certain cropper; cannot be too highly recommended.

Gansell's Bergamot.—A fine medium season round dessert pear! splendid flavour.

Jargonelle.—A well-known early pear.

Kieffer's Hybrid.—A very hardy and profitable variety; grows to a large size, does well in many parts of this State. Is a cross between "Bon Chretien" and "China." Ripens in autumn.

Lawson.—A dessert pear, crimson, on bright yellow ground, juicy and pleasant; a good keeper and shipper; the largest early pear.

Packham's Triumph.—It is of beautiful shape, large, and one of perfect flavour; a good grower, early and prolific bearer, ripens in April. Has received first prize every time it has been exhibited.

Vicar of Winkfield.—Large, melting and very juicy. A very heavy bearer, and a good market pear; late.

William's Bon Chretien.—Large, buttery and melting; one of the finest summer pears grown; early.

Flowering Gums are useful as Shade Trees.

Winter Cole.—Melting, juicy, rich and exquisite flavour; a first-class pear; late.

Winter Nelis.—One of the finest flavoured late dessert pears.

PLUMS.

Price: 2/- each; 21/- per doz. Strong Selected Trees, 2/6 each.

Coe's Golden Crop.—A splendid variety, large, yellow medium.

Diamond.—Very large, dark purple, splendid for preserving; a heavy bearer; late.

Late Black Orleans.—A really good plum, and a great cropper; late.

Green Gage.—A well-known delicious plum; medium.

Magnum Bonum, Yellow.—One of the best culinary plums, and a regular and heavy bearer; large yellow; late.

Yellow Cherry Plum.—A fine yellow plum, far superior to Red Cherry plum; first-class for preserving or jam.

Prune, D'Agen.—Large purple; the best prune grown; medium.

Pond's Seedling.—Large red, a good bearer; a first-class market plum; late.

JAPANESE PLUMS.

Price: 2/- each; 21/- per doz. Strong Selected Trees, 2/6 each.

This is a unique class of Plum, of great beauty and productiveness. The fruit is exquisitely perfumed, and with a charming attractive bloom. The trees are exceedingly ornamental and quite distinct from other varieties. The flesh is so firm and meaty that they can be safely shipped long distances, and kept in excellent condition. They are very prolific bearers.

Botan or Abundance.—Very large, showy and beautiful, amber turning to rich, bright cherry colour, with a white bloom; flesh yellow, juicy and tender.

Burbank.—Large size, nearly globular in shape, colour clear cherry-red, with a thin lilac bloom; flesh deep yellow, very sweet, with a peculiar and agreeable flavour.

Kelsey.—The fruit is very large, with a remarkably small stone. It is of excellent quality, melting, rich and juicy, and excels all other plums for canning.

October Purple.—Another of Mr. Burbank's seedlings. It is a very large purple, heart-shaped plum, with no splashes of lighter colour; flesh amber-yellow.

Satsuma or Blood Plum.—Large and most globular, the colour is dark red from skin to stone; flesh firm, juicy, and of a rich spicy flavour.

Santa Rosa.—One of the very best blood plums.

Shiro.—A very free-bearing early plum, may be gathered before it is ripe on account of its transparent yellow colour; good size; cling-stone; ripens early January.

Wright's Early.—A New Zealand raised plum, very heavy cropper, bears while quite young. Identical with "Burbank," excepting that it is earlier.

Wickson.—Raised by Mr. Luther Burbank. The fruit is evenly distributed over the tree, and from the time it is half-grown unto a few days before ripening, it is pearly-white colour, but all at once soft pink shadings creep over it, and in a few days it has changed to a glowing carmine, with a heavy white bloom.

Soudan Grass the "Camel" of the Grasses.

PERSIMMONS—JAPANESE DATE PLUMS.

Price: 2/6 each; 24/- per doz.

This fruit is becoming more popular as it becomes better known, particularly on account of it ripening during Winter months, when fruits are scarce; and their showy appearance and luscious flavours assure them a position of distinction. Many failures have occurred in the past through planting these trees in spots that were unsuitable. Persimmons require deep, rich loamy soil, moist; and with a thorough watering at the time of planting, and a good mulching on approach of hot weather. Planters may rely on successfully starting the well-rooted Persimmons we offer this season.

QUINCES.

Price: 2/- each; 21/- doz.

Apple.—Medium size; very prolific.

Champion.—Fruit very large, smooth, handsome and regularly formed. Tree very productive, bearing abundantly when quite young. Early.

Missouri Mammoth.—The fruit grows to enormous size, with smooth skin and even outline, quite free from undulations about the eye; of a mild, pleasant flavour, and unsurpassed for cooking. The tree is a luxuriant grower, and bears enormously. A first class variety.

Pear-Shaped.—Very large, medium season.

FIGS.

Strong, well-rooted Trees, 2/6 each, 24/- doz.

This State may truthfully be termed the home of the Fig, this fruit grows so well here. It seems to thrive in the poorest of soils, provided moisture is available during dry weather. We can supply leading sorts, including the following:—

Adams, Brown Turkey, White Adriatic, Sugar Fig, etc.

MULBERRIES.

Black.—A well-known variety, 3/6 to 4/6 each.

ORANGES.

Price: 3/- each; 27/- per doz.

We hold a very large stock of Citrus Trees in first-class condition.

Strong Balled Trees, 5/- to 15/- each.

Blood of Maltese.—Fruit medium size, flattened, skin deep red, filled with an abundance of deep red juice.

Jaffa.—This we consider one of the best market oranges, next to Washington and Valencia; enormous bearer, fine medium fruit; tree nearly thornless; vigorous.

Joppa.—A good Californian variety, large size, oblong, thin rind, smooth and bright; of sweet and high flavour from time it begins to colour, and will hang for weeks after ripening; thornless, vigorous, upright grower.

Mediterranean Sweet.—Remarkable for its early bearing and late ripening, a splendid flavour, of the most esteemed in California.

Siletta.—Fruit large size, flattened, skin pale yellow, very smooth and thin; abounding in juice, hardy and enormous bearer.

St. Michael.—Fruit largest size, skin deep yellow, smooth and thin, very juicy, but few seeds, hardy; most profitable market variety.

Roses on our New Stock cannot fail anywhere.

Nurserymen, Seedsmen and Florists.

Thompson's Improved Navel.—A distinct improvement on Washington Navel; fruit equal in every way to its parent, but is earlier, and is a good, even, consistent cropper.

Valencia Late.—Large, oblong and firm. The orange is very late in ripening, and valuable on that account, as it would be marketable when all other varieties are done.

Washington Navel.—No market has ever been glutted with well-grown oranges of this sort; tree hardy and vigorous, but of medium size, a quick grower and an easy and abundant bearer; does not thrive on sour and badly drained land; fruit large, solid and heavy, skin smooth, very juicy, generally seedless. Very early, good keeper, well suited for export.

ORANGE, LEMON and MANDARIN TREES.

Three and four years old; large strong trees. We have a good collection of the above. We take them up with a solid ball of earth on the roots, and by this method they transplant safely. Price: 7/6 and 10/- each, according to size; larger, 15/- each.

MANDARINES.

Price: 3/- each; 27/- a doz. Strong Balled Trees, 5/- to 15/- each.

Beauty of Glen Retreat.—A good addition to commercial varieties; fruit large, solid, skin smooth, of fine appearance; good flavour.

Emperor.—The best and most esteemed variety grown.

Scarlet.—Fruit large, flat in shape, of a very deep colour, much esteemed in warmer parts of the State.

Thorny.—Fruit smaller, but solid and highly flavoured. Price, 3/- to 10/- each, according to size.

LEMONS.

Price: 3/- each; 27/- a dozen. Strong Balled Trees, 5/- to 15/- each.

Lemon, Lisbon.—A well-known variety, probably best of all.

Lemon Lisbon Variegata.—Leaves beautiful variegated, fruit small; similar to Lisbon.

Villa Franca.—An excellent lemon that is becoming very popular on account of its hardiness and extended bearing season, ripening chiefly during summer.

Eureka.—It is considered by many to be the best lemon in existence. Habit of growth good, foliage large, and tree almost free from thorns. Bears heavily from two years of age.

VINES.

We specialise in grape vines, and have large quantities of well-grown Vines for the coming season, one or two years old. Prices: 9d. each, 7/6 doz.; extra strong plants, 1/- each, 10/6 doz.

Almeria.—Bunches very large, berries largest size, roundish, skin very tough, of a beautiful light amber colour. This is a grape which has been successfully shipped from Adelaide to London, where it arrived in perfect condition.

Black Hamburgh.—One of the best flavoured black grapes, juicy, rich, thin skinned; medium.

Black Prince.—Bunches long and fine, berries roundish oval, with rich aroma. Good market sort.

All Flower Seeds post free to all parts.

Nurserymen, Seedsmen and Florists.

- Black St. Peter.**—Very large bunches; finely flavoured and one of the best late varieties.
- Crystal.**—Early white, transparent berries, requires pruning long.
- Doradilla.**—A late white; good packer.
- Flame Tokay.**—Strong grower, long bunches, berries oblong, rose colour; a fine late grape.
- Lady's Finger** (red and white).—Well-known favourites, with very long berries; beautiful flavour; late.
- Golden Chasselas or Royal Muscadine.**—Bunch and berry medium size, round, skin fairly tough, deep golden, very juicy and good. A thoroughly hardy grape, doing well everywhere; early.
- Gros Colman.**—A round, large, black grape, of good flavour.
- Gordo Blanco.**—This is the lately introduced and very extensively grown variety for raisins, being for that purpose superior to the well-known "Muscat of Alexandria."
- Knight's Grand Centennial.**—Certainly the largest and most showy white grape ever introduced into the State. Berries about 2ins. in circumference, forming a beautiful long and compact bunch of great weight.
- Muscat of Alexandria.**—The standard of flavour for all white Muscats. It sets its berries rather loosely, which is its only fault.
- Mrs. Prince's Black Muscat.**—A really splendid late Black Muscat. Berries very large size, very rich in Muscat flavour.
- Malaga Black.**—Bunches large and tapering; berries very large oval, skin deep black, very thick. A valuable grape on account of its lateness. A splendid carrier.
- Purple Cornichon.**—A black Lady's Finger; late. Of attractive appearance and a good packer.
- Raison Des Dames.**—Berries largest size, closely set, skin tough, beautiful yellow, flesh tender, most exquisite flavour; midseason.
- Red Prince.**—Berries very large, of a deep-red colour.
- Sweetwater.**—A very early grape, of good quality, bunches and berries large, pale amber; a very heavy cropper.
- Santa Paulo or White Lady's Finger.**—
- Sultana (Seedless).**—Berries copper-coloured and seedless; chiefly valued for raisins.
- White Nice.**—A very juicy, sweet grape, large berries; excellent flavour.
- Wortley Hall.**—Bunches large, well shouldered, berries very large, oval, skin thick, deep purple, with a heavy bloom; a most handsome grape; late.
- Waltham Cross.**—Bunches very large, berries very large, round, skin thin, but tough; of a clear pale amber.
- Zante Currant.**—A small black currant grape, for drying purposes.

MISCELLANEOUS FRUITS.

- Bananas.**—Plantains, from 2/- each, 20/- per doz.
- Currants.**—White, red or black, 9d. each, 7/6 doz.
- Guavas.**—Cherry or purple, evergreen, 2/- each.
- Gooseberry.**—Green, yellow or red, 9d. each, 7/6 per doz.
- Loquat.**—Selected Seedlings, 2/- each, 18/- per doz.

Wilson & Johns' Special Mixed Parrot and Canary Seed.

RHUBARB ROOTS.

Obtainable from May to August.

Topp's Winter Improved.—Valuable on account of its earliness. Hardy and of exquisite flavour, strong roots. 1/6 each, 12/- doz.

Playford's Mammoth.—The best variety for all seasons, very large, of a beautiful crimson colour and excellent flavour; 2/- each, 18/- doz.

STRAWBERRIES.

Planting may be done from May to October. Deeply dug, well manured, fairly moist ground suits these plants; keep surface frequently stirred.

Melba or Uptip.—One of the best in cultivation, fruit large, bright, crimson scarlet, with rich and vinous flavour. 1/6 per doz., 7/6 per 100.

Sharpless.—A very hardy variety, very large, fruit bright red; will stand cold drought, heavy cropper. 1/6 per doz., 10/- per 100.

Sir Joseph Paxton.—Large bright, shining crimson, rich and highly flavoured; plants strong and productive. 1/- per doz., 7/- per 100.

Ettesburg, No. 85.—Berries large and fine flavoured; freely produced. 2/6 doz.

TOMATO.

Early Burbank.—One of the best Tomatoes ever raised, being very early. A good size, smooth red; very fine flavour. 1/- per pkt.

ROCK MELON.

Best of all. The finest Rock Melon ever raised. 1/- packet.

RANUNCULUS SEED.

Saved from a Prime Collection. 1/- per packet.

THE "ODOURLESS" ONION.

This Onion, as its name implies, is quite odourless, there being no rank or disagreeable smell after eating. It also lacks that pungent taste found in most varieties of Onions. The finest variety in cultivation for use in salads, being so mild, sweet and juicy it can be eaten raw like an apple. 1/- packet.

OUR

FLORAL BUSINESS

As we only employ **experienced lady Artists** in this branch of our business, we are enabled to carry out all orders entrusted to us in first-class style, and, which is often of the greatest importance, on the shortest possible notice.

We pack all our Flowers, Bouquets, &c., in a manner that ensures their arrival in perfect order and condition, as the testimonials we have received testify.

Country Clients who have a difficulty in obtaining Wedding Bouquets, Wreaths, etc., made up in a thoroughly high-class style, may be reminded that our experience in packing flowers, and the railway facilities, now practically place us in as good a position in supplying them as if we were their neighbours.

Bazaars, Fetes, &c.—We make a speciality of growing plants suitable for Bazaars, Fetes, etc., and are in a position to supply them at specially reduced rates.

THE PRICES IN THIS CATALOGUE ARE FOR HIGH-CLASS SEEDS ONLY.

Flowering Gums are useful as Shade Trees.

WREATHS, NATURAL FLOWERS

From 10s. 6d. to £5 5s. 0d.

Wreaths, Anchors and Crosses, composed of Cape and Artificial Flowers, which will last a long time, and are suitable for glass cases, from 10/- upwards.

Wreaths, in glass cases, from 18/6 to £5 5s. 0d.

Bridal and Ball Bouquets.—Prices from 10/6 upwards.

Presentation Bouquets, Farewell Bouquets, Basket of Flowers.—Clients having friends leaving for Europe or the East can have Floral Offerings delivered aboard steamer at Fremantle, with their cards attached, bidding them bon voyage, etc., which always constitutes a pleasing farewell memento. Prices from 15/- upwards.

Funeral Emblems (in national flowers).—To meet the growing demand for Floral Funeral Emblems, we beg to state that we are prepared to execute on short notice, orders for any design that may be required by Public Companies, Masonic and other Institutions.

SPRAYING.

There are certain sprays for certain pests. If in doubt we will advise you what to use.

Do not spray in the heat of the day. Early morning or evening will give the best results.

For the best effect, spray three or four times at weekly intervals.

A little soda added to spraying oils gives a better mixture. e

“Arresto.”—Remedy for Tomato Wilt and Blight, curl leaf on peach tree, and diseases in vegetables. 1lb. packets, 1/6; posted 2/-. 7lb. lots or more, 1/3 per lb.; freight extra.

Wilson & Johns’ Special Mixed Parrot and Canary Seed.

CHOICE COLLECTION OF GLADIOLI.

We are offering a wide range of colours in this popular section as the list discloses. All corms are large and well grown. Price: 9d. each, 7/6 per doz.

America.—Exquisite soft lavender pink, most beautiful colour.

Baron J. Hulot.—Rich violet purple with darker throat. A very old variety, but still in the front rank.

Brenchlyensis.—A splendid variety of a brilliant red shade, bearing a large number of flowers evenly placed.

Brimstone.—Sulphur yellow. A splendid variety.

Duchess of York.—Finest purple blue; splendid.

Electra.—Brilliant vermillion; extra fine.

Empress of India.—Dark brown-red, with black markings; rare colour.

Enchantress.—Pale lilac, extra fancy fine colour.

Glory of Holland.—Pure white. A splendid variety for all purposes; late.

Halley.—Salmon pink, very early; tall grower and beautiful colour.

Imperator.—Creamy buds, opening white, with enormous flowers; very tall grower.

King of the Reds (Lovefire).—The best scarlet gladioli to date.

Lidy.—Pure white flowers, medium size, and particular form.

Lily Lehmann.—Ivory white, without any markings.

L'Immaculee.—Pure white, fine long spikes. Good for all purposes.

Lovliness.—Creamy white; splendid market variety.

Marechal Foch.—Pink rose shade, carmine throat, early; large flowers.

Master Wietze.—Dark violet, self colour, fine shaped flowers.

Niagara.—Nankeen yellow; good strong spikes.

Odin.—Salmon with dark blotch, large flowers; early.

Panama.—Dark rose lilac shade; vigorous plant.

Pink Perfection.—Beautiful pink shade, with darker pink markings.

Prince of Wales.—Beautiful salmon shade; a striking and lighting colour; early.

Red Emperor.—Pure blood red, the largest flowering Gladioli; splendid

Schwaben.—Orange yellow, dark blotch; strong grower.

Senator Vallant.—Purple blue with yellow and white blotch; good.

War.—Blood red; extra large and very tall grower; late.

Wilbrink.—Clear lilac rose; darker hue in throat than Halley.

Willy Wigman.—Blush white, dark blotch; elegant flower.

White Giant.—Pure white, largest of its colour; very strong grower.

GLADIOLUS PRIMULINUS.

A new race of decorative Gladioli noted for their varying shades of orange and salmon. Flowers borne on slender stems. 9d. each, 7/6 per doz.

Atalanta.—Beautiful salmon, orange with yellow blotch.

Hermoine.—Brilliant salmon; extra fine.

Juno.—A beautiful salmon pink.

Maiden Blush.—Finest pink; earliest of all.

Niobe.—Brilliant orange red.

Souvenir.—Golden yellow. Best.

RAFFIA WORK.

A profitable pastime and becoming increasingly popular. Almost any article can be made from this material. It is a fascinating pastime and many a profitable hour can be filled in which otherwise would have been wasted. There is also a ready market for the articles made. The materials can be had cheaply.

The Raffia we supply is specially imported. It is broad and in addition to being dyed is glazed, which gives it a glossy appearance. The ordinary dyed Raffia having a dull appearance.

Colours include Yellow, Cherry, Violet, Light and Dark Green, Brown, Red, Pink, Wine, Black, Mauve, Blue. Price: Coloured, 6d. oz.; 7/6 per lb. Plain: 6d. per 1/2 lb.

Raffia Cane: In bundles, 4d., 6d., 1/- and 2/-. Raffia Needles, 2d. each.

Remember the Best Seed is the Cheapest.

Winter Flowering Spencer Sweet Peas.

The early flowering Sweet Peas are the best variety to grow in Western Australia. If sown in succession from the end of January to April they will commence to flower early in May, and continue throughout the Winter and Spring.

The ground should be well trenched and plenty of manure added and well mixed with the soil. The following list contains the best varieties yet raised. We grow our own seeds in the Hills near Kalamunda, where it ripens to perfection and produces flowers superior to those raised from seed obtained elsewhere, on account of our Winter climate being better for seed saving than the Eastern States. Price, Separate Sorts, 9d. per packet. Mixed, 1/-, and Small Mixed, 6d. per packet.

ALBURY CARMINE—Rich deep colour, large size.

ALBURY MAROON—Fine large dark maroon of very great substance.

ALBURY BEAUTY—Magnificent orange pink, blooms extra waved, long stems.

ALBURY LAVENDER.

ALBURY SALMON—Excellent variety; best of its colour.

BROOKVALE DAWN—Ivory, white suffused with light pink.

BROOKVALE MILKMAID—Pure white, beautifully waved.

BROOKVALE PURPUREA—Purple violet with silky sheen.

Very beautiful and unique.

BROOKVALE SUNRISE—A lovely shade of salmon.

BROOKVALE PANSY—Peculiar shade, best described by its name; a very fine pea and finely waved.

BROOKVALE YARALLA—A light Yaralla without the dark pink of its parent. Will produce more fours than any other.

BROOKVALE DREAMLAND—Cream Picotee, strong stiff stem; a perfect gem.

CALIFORNIAN WHITE.

CREAM BEAUTY—Cream throughout; of the finest Spencer form and largest size.

CONCORD CHARM—This dainty new pea combines the delicate shades of white and blue white wings and very light heliotrope standard, shading to nearly white.

CONCORD COUNTESS—A superbly beautiful variety of a most attractive tint of pink, the ideal flower colour.

CONCORD DAYBREAK—On opening the bud is cream with standard heavily edged buff-pink.

CONCORD EMPEROR—A rich crimson red variety.

CONCORD FASCINATION—A variety which we believe to be the very best lavender yet seen out in the Early Section.

CONCORD PURPLE—A delightful shade of mauvy purple, changing as the flower ages to a purply-blue.

CONCORD RADIANCE—A very striking shade of rosy magenta.

CONCORD WINSOME—A delightful shade of pink tinted lavender; a most fascinating colour.

CALIFORNIAN PINK.—Still holds pride of place as the best and largest shell pink.

CALIFORNIAN RED—The most solid of all bright scarlet red Peas. Very vigorous. Very large flowers on long sturdy stems.

CALIFORNIAN DEEP PINK—This Pea has been universally admired for its immense and beautiful rose pink flowers.

CALIFORNIAN LIGHT SALMON PINK—This, in the opinion of many growers to whom we have shown the blooms, is the most charming Winter Sweet Pea yet issued.

CALIFORNIAN PALE BLUE—Clear pale blue, excellent shape and size. Entirely new shade in Sweet Pea.

CREAM BEAUTY—A beautiful flower, deep cream colour.

CECIL HATCHER—A fine dark maroon.

DEVONSHIRE CREAM—Bold, waved flower.

DOBBIE'S CREAM—Pure primrose self.

DONALD J. COGHILL—White, flaked rose.

WINTER FLOWERING SPENCER SWEET PEAS

(Continued.)

-
- ERIC HATCHER**—A pink of excellent form. Beautiful for table use.
- FRANK HATCHER**—Purple and indigo on opening, changing as the flower develops to a lighter blue.
- HALDEE MOTT**—Large pink bicolor, wings paler than the extra waved standard.
- HARLEQUIN**—Crimson flake, very profuse bloomer.
- KARKOO CRIMSON FLAKE**—Crimson flake on a creamy ground.
- KARKOO CELESTIAL**—A true lavender Pea, clear in colour with well placed flowers on strong stems, with plenty of fours.
- LILLIAN LOCKLEY**—A fine pale pink.
- MARIE CHESLYN**—Pale cream pink, with a glorious touch of salmon.
- MISS ROWLEY**—A light rose heliotrope, the florists' favourite.
- MOTTE HELIOTROPE FLAKE**—A huge heliotrope of mauvy-purple-lake on a French grey ground.
- MOTTE'S BLUSH CREAM**—The type is quite equal to that of any Sweet Pea in this list, while the colour is most charming.
- MOTTE'S CRIMSON**—The finest of its colour.
- MOONSTONE**—Periwinkle blue, much admired.
- MOTTE'S MAUVE**—Very large, deep mauve.
- MOTTE'S GREY FLAKE**—Grey, white ground, flaked with chocolate, fine form, very large.
- MOTTE'S BLUSH**—An immense white ground Pea, tinged with carmine.
- MOTTE'S CHAMPAGNE.**
- MOTTE'S PURPLE.**
- MOTTE'S PINK.**
- MOTTE'S PLUM.**
- MRS. MAY HASSET**—Deep cream pink, large and wavy.
- MRS. HAMILTON C. MOTTE**—Bi-colour, purple-blue standard, blue wings, very large, extra waved.
- NARRABEEN (new)**—Red and cerise bi-colour.
- ORMONDE**—A beautiful lavender, one of the best.
- SNOWFLAKE**—The finest white.
- SALMONEA**—Bright rosy salmon.
- THALIA MOTTE**—Large and well formed, colour bright crimson; a very fine variety.
- WEDGEWOOD**—Wedgewood is appropriately named, as its colour throughout is a unique shade of wedgewood blue.
- YARRAWA**—The original first, and still one of the best.
- ZYRIS WHITE**—The best white.
-
